

## BIT/ELA Equivalency Process Step-by-Step

- 1. Establish a committee to review the Business & Information Technology (BIT) education course(s) for English Language Arts (ELA) equivalent status.
- 2. Review the knowledge and skills of the course the district is seeking for equivalency.
- 3. Perform a crosswalk of current standards for Business & Information Technology and English Language Arts. Use the sample crosswalk template on the Business & Information Technology equivalency webpage. For the BIT/ELA program, a task force has already crosswalked courses that can be found on the BIT/ELA equivalency website. The final process is for the local teacher/committee to review the local curriculum to the crosswalk and include the number of days/hours and knowledge and skills.
- 4. Request school board approval for the equivalent course.
- 5. Submit all documentation which includes:
  - List of committee members and their titles
  - <u>PI 1803-BIT</u> form
  - Documentation of the equivalent course content/syllabus with instruction time
  - Completion of the crosswalk
- 6. The equivalent course will be documented on the student's transcripts by the school district using a standard identification system.
  - Example: Business Communication EE
  - The Business & Information Technology education equivalent course is to be listed under the Business & Information Technology education department. It is a Business & Information Technology education teacher teaching a Business & Information Technology education course. It is the district's decision to allow this course for the equivalent option.
- 7. The equivalent course documents will be reviewed and the school districts will be notified within 60 days of receipt.
- 8. If the equivalent course is accepted, the information will be entered into a database, which will be shared with the UW-System for their reference. The database will be updated annually and shared with the UW-System each year.
