WISCONSIN DEPARTMENT OF
PUBLIC INSTRUCTION

SAFE Updates At A Glance

Initially launched in 2010, the Secure Access File Exchange (SAFE) is a secure, flexible, web-based tool developed by DPI that allows authorized district and school users to access their confidential data files and reports that DPI has shared with them such as the preliminary accountability report cards. Access is managed locally by the SAFE Application Administrator in each district.

Coming Soon!

When you log in to SAFE, you will notice a new, clean user experience with updated menus and navigation. Security roles and the process to request access remain the same.

See the following pages for a breakdown of the new appearance for SAFE. You can also visit the Secure Home Information Page at https://dpi.wi.gov/wise/secure-home-info or request access from your SAFE Application Administrator here: https://apps2.dpi.wi.gov/ldsutil/admin/.
