WISCONSIN SCHOOL NUTRITION

IN A NUTSHELL

Crediting Documentation:

Processed foods that are not listed in the USDA Food Buying Guide must have a Child Nutrition (CN) label, product formulation statement (PFS), or USDA Product Information Sheet to document meal component crediting.

Child Nutrition Labels

What is a Child Nutrition (CN) Label?

A statement on a product's box that clearly identifies the meal pattern contribution according to the stated serving size. If the product has a CN label, a PFS is not necessary.

Child Nutrition labels must contain:

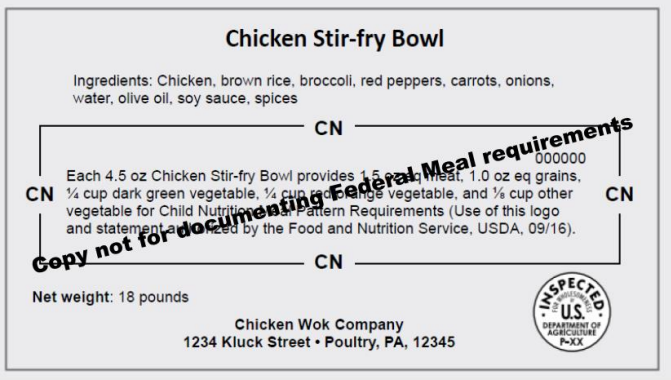
1. Product name
2. Ingredient statement
3. Meal pattern contribution and 6-digit product identification number within the CN logo
4. Inspection stamp

Acceptable forms of CN label documentation:

- The original CN label from the product package
- A photograph or photocopy of the label attached to the original package
- A watermarked CN label accompanied by the invoice (Bill of Lading) containing product name

Watermarked CN Labels

A CN label is watermarked when it is not attached to the actual product. An example is when it is provided on the manufacturer's website. It is only acceptable when accompanied by the Invoice (Bill of Lading) that contains the product name and CN number.



Product Formulation Statements

What is a Product Formulation Statement (PFS)?

A PFS is a signed statement from the manufacturer that demonstrates how the processed product contributes to meal pattern requirements.

A Product Formulation Statement is not:

Product Formulation Statement for Documenting Grains in Child Nutrition Programs

(Crediting Standards Based on Grams of Creditable Grains (ounce equivalent))

Program operators should include a copy of the label from the purchased product package in addition to the following information on letterhead signed by an official company representative. Program operators have the option to choose the crediting method that fits their specific menu planning needs.

Product Name: Wheat Smile Pancakes Code No.: 14005

Manufacturer: ABC Bread Company Serving Size: 2 pancakes – 50g (1.75 oz.)

(raw dough weight may be used to calculate creditable grains)

I. Does the product meet the whole grain-rich criteria? Yes X No ____

II. Does the product contain non-creditable grains? Yes ____ No X **How many grams?** ____

(Products with more than 0.24 ounce equivalent (oz eq) or 3.99 grams (g) for Groups A-G or 6.99g for Groups H and I of non-creditable grains do not credit toward the grains requirement for school meals.)

III. Use Exhibit A: Grain Requirements for Child Nutrition Programs in the *Food Buying Guide for Child Nutrition Programs* (FBG) to determine if the product fits into Groups A-G (baked goods), Group H (cereal grains) or Group I (RTE breakfast cereals). *(Different methodologies are applied to calculate the grains contribution based on creditable grains. Groups A-G use the standard of 16g creditable grains per oz eq; Groups H and I use the standard of 28g creditable grains per oz eq or volume.)*

Indicate which Exhibit A Group (A-I) the product belongs: C

DESCRIPTION OF CREDITABLE GRAIN INGREDIENT*	GRAMS OF CREDITABLE GRAIN INGREDIENT PER PORTION[1] A	GRAM STANDARD OF CREDITABLE GRAINS PER OZ EQ *(16g or 28g)*[2] B	CREDITABLE AMOUNT A ÷ B
Whole wheat flour (30%)	15	16	0.9375
Enriched flour (22%)	11	16	0.6875
		Total	1.625
		Total Creditable Amount[3]	1.50

* Creditable grains vary by Program. See the FBG for specific Program requirements.
[1] (Serving size) **X** (% of creditable grains in formula); serving sizes other than grams must be converted to grams.
[2] Standard grams of creditable grains from the corresponding Group in Exhibit A.
[3] Total Creditable Amount must be rounded **down** to the nearest quarter (0.25) oz eq. Do **not** round up.

Total weight (per portion) of product as purchased 50g (1.75 oz.)

Total contribution of product (per portion) 1.50 oz eq

I certify that the above information is true and correct and that a 1.75 ounce portion of this product (ready for serving) provides 1.50 oz eq grains. I further certify that non-creditable grains **are not** above 0.24 oz eq per portion. Products with more than 0.24 oz eq or 3.99g for Groups A-G or 6.99g for Groups H and I of non-creditable grains do not credit toward the grains requirement for school meals.

Nutrition Facts Labels and Exhibit A

What is Exhibit A?

A resource that provides a general guideline for crediting prepared grain items. Prepared grains are categorized into groups on Exhibit A based on their similar grain content and credited based on the baked weight. To credit a grain using Exhibit A, find the group containing the grain product and divide the grain product's weight by the minimum serving size required for that group on the right-hand side of the chart.

For example, a slice of bread weighs 31 grams. Bread is found in Group B. For Group B, 1 oz eq is equal to 28 grams. So, 31 grams / 28 gram = 1.10 oz which rounds down to 1.0 oz eq. One slice of bread weighing 31 grams credits as 1.0 oz eq grains.

Group B	Ounce Equivalent (oz eq) for Group B
Bagels	1 oz eq = 28 gm or 1.0 oz
Batter type coating	3/4 oz eq = 21 gm or 0.75 oz
Biscuits	1/2 oz eq = 14 gm or 0.5 oz
Breads - all (for example sliced, French, Italian)	1/4 oz eq = 7 gm or 0.25

Grains may also be credited using a PFS from the manufacturer. In some cases, a grain item may credit as a higher ounce equivalency using a PFS than Exhibit A.

Crediting Meat/Meat Alternate Products

1. Is the M/MA listed in the Food Buying Guide?
    a. If yes, the product has a standard of identity and the product may be credited using the Food Buying Guide.
    b. If no, the product needs crediting documentation.
2. Is the M/MA a USDA Foods Product?
    a. If yes, then credit the product using the corresponding USDA Product Information Sheet and keep this on file.
    b. If no, the product needs crediting documentation.
3. Does the M/MA have a CN label?
    a. If yes, keep the actual CN label from the product packaging on file.
    b. If no, obtain a PFS from the manufacturer.

If the M/MA cannot be credited using the Food Buying Guide, and does not have a USDA Product Information Sheet, a PFS, or CN label, then the product is not creditable in the Child Nutrition Programs.

Crediting Grain Products

1. Is the grain listed in the Food Buying Guide?
    a. If yes, the product has a standard of identity and the product may be credited using the Food Buying Guide.
    b. If no, the product needs crediting documentation.
2. Does the grain product have a PFS?
    a. If yes, then keep this documentation on file.
    b. If no, use the product's weight found on the nutrition facts label and credit the item using Exhibit A. This can be used as crediting documentation.
