

# Elkhart Lake-Glenbeulah School District

*Challenge, Inspire, and Empower in a Caring, Innovative Learning Environment*

February 26, 2024

Hello,

On February 22, 2024, our district discovered that our high school calendar for the 22-23 school year incorrectly listed the "possible attendance days" on the Student Table Association Ed-Fi table for all students. The error was noticed running a special education report. The incorrect calendar gives each student **196** possible days for the school year, which was actually **177** days due to inclement weather days, teacher in service days and holiday breaks. Our December snapshot data was affected by the incorrect calendar as chronic absenteeism was a data point for the collection. The high school calendar in the WISEData portal has been updated for the 2022-2023 school year.

We apologize for the error and inconvenience.

Thank you,

A handwritten signature in black ink, appearing to read "Adam Englebretson". The signature is written in a cursive, flowing style.

Adam Englebretson
