To Whom it May Concern:

It came to our attention that some of our data in the 2020-21 school year was reported in error; specifically the unscored Postsecondary Preparation information that includes, Advanced Courses, Dual Enrollment, Industry Recognized Credentials and Work-based Learning. The data reported on the report card display numbers that are lower than the accurate levels of participation and achievement in these categories. This error was due to incorrect coding and reporting in our Student Information System (SIS). The error has been corrected in the SIS and data will be accurately reflected in future reports.

Please accept this data errata letter as an explanation for the discrepancy in our WISEdata. While the Postsecondary Preparation category is informational only and not used in the calculator of the high school report card Overall Score, our district and community greatly values the student learning that these data points represent.
