10. Deliberations by the Appeal Panel
 - a. The Alternative Decisions
 - b. The Ballots (paper or voice vote)
 - c. Tabulation of the Ballots (paper); Announce Tally (voice vote)
 - d. Formalizing the Rationale for the Vote
11. Call for a Motion to Adjourn

the number of electors who voted for governor at the last general election in that area.

(b) If the area does not coincide with a municipality or part thereof for which election statistics are kept, the number of electors shall be determined as follows:

1. The area of the school district in square miles shall be divided by the area of the municipality in square miles in which it lies.

2. The vote for governor at the last general election in the municipality within which the school district lies shall be multiplied by the quotient determined under subd. 1. to determine the required number of electors.

(c) If a school district is in more than one municipality, the method of determination under par. (b) shall be used for each part of the school district which constitutes only a fractional part of any area for which election statistics are kept.

History: 1973 c. 90; 1975 c. 115, 189; 1977 c. 29, 206; 1979 c. 89, 301; 1983 a. 27, 189; 1985 a. 29, 225, 332; 1987 a. 46; 1993 a. 27; 2009 a. 42; 2013 a. 257.

SUBCHAPTER II

STATE SUPERINTENDENT OF PUBLIC INSTRUCTION

Cross-reference: See also *PI*, Wis. adm. code.

115.28 General duties. The state superintendent shall:

(1) **GENERAL SUPERVISION.** Ascertain the condition of the public schools, stimulate interest in education and spread as widely as possible a knowledge of the means and methods which may be employed to improve the schools.

(2) **SECTARIANISM.** Exclude all sectarian books and instruction from the public schools.

(3) **SUPERVISION OF SCHOOLS.** Supervise and inspect the public schools and day schools for children with disabilities, advise the principals and local authorities thereof and give assistance in organizing such schools.

(3m) **SUPERVISION OF COOPERATIVE EDUCATIONAL SERVICE AGENCIES; RULES.** (a) Supervise and audit the receipts and expenditures of the cooperative educational service agencies, conduct program review of the agencies, supervise boundary reorganization where necessary, advise the administrators of the agencies and provide assistance in organizing the agencies throughout the state.

(b) Promulgate rules establishing procedures for the reorganization of cooperative educational service agencies and boundary appeals.

(4) **PUBLIC INFORMATION.** By reports, bulletins, circulars, correspondence and public addresses, give the public information upon the different methods of school organization and management and the subject of education generally.

(5) **APPEALS.** Examine and determine all appeals which by law are made to the state superintendent and prescribe rules of practice in respect thereto, not inconsistent with law.

Cross-reference: See also ch. *PI 1*, Wis. adm. code.

(6) **ANNUAL CONVENTIONS.** Annually, hold conventions of school district administrators, supervisors and agency coordinators.

(7) **LICENSING OF TEACHERS.** (a) License all teachers for the public schools of the state; make rules establishing standards of attainment and procedures for the examination and licensing of teachers within the limits prescribed in ss. 118.19 (2) and (3), 118.191, 118.1915, 118.192, 118.193, 118.194, 118.195, and 118.197; prescribe by rule standards, requirements, and procedures for the approval of teacher preparatory programs leading to licensure, including a requirement that, beginning on July 1, 2012, and annually thereafter, each teacher preparatory program located in this state shall submit to the department a list of individuals who have completed the program and who have been recommended by the program for licensure under this subsection, together with each individual's date of program completion, from each term or

semester of the program's most recently completed academic year; file in the state superintendent's office all papers relating to state teachers' licenses; and register each such license.

(b) Subject to the same rules and laws concerning qualifications of applicants and granting and revocation of licenses or certificates under par. (a), the state superintendent shall grant certificates and licenses to teachers in private schools and tribal schools, except that teaching experience requirements for such certificates and licenses may be fulfilled by teaching experience in public, private, or tribal schools. An applicant is not eligible for a license or certificate unless the state superintendent finds that the private school or tribal school in which the applicant taught offered an adequate educational program during the period of the applicant's teaching therein. Private schools are not obligated to employ only licensed or certified teachers.

(c) Subject to s. 118.19 (4m), license and make rules for the examination and licensing of persons, including teachers, employed to provide publicly funded special education and related services, as those terms are defined in s. 115.76 (14) and (15).

(d) Annually, establish fees for the certification or licensure of school and public library personnel sufficient to fund certification and licensing administrative costs.

(e) 1. In this paragraph, "alternative education program" means an instructional program, approved by the school board, that utilizes successful alternative or adaptive school structures and teaching techniques and that is incorporated into existing, traditional classrooms or regularly scheduled curricular programs or that is offered in place of regularly scheduled curricular programs. "Alternative educational program" does not include a private school, a tribal school, or a home-based private educational program.

2. Promulgate rules establishing requirements for licensure as an alternative education program teacher and for the approval of teacher education programs leading to licensure as an alternative education program teacher. The rules shall encompass the teaching of multiple subjects or grade levels or both, as determined by the state superintendent. The rules may require teacher education programs to grant credit towards licensure as an alternative education program teacher for relevant experience or demonstrated proficiency in relevant skills and knowledge.

Cross-reference: See also ch. *PI 34*, Wis. adm. code.

(f) The department may not charge a fee for the issuance of a license, permit, or certificate to an individual who is eligible for the veterans fee waiver program under s. 45.44.

(g) Notwithstanding s. 118.19 (3), (4m), (6) to (9), (12), and (14), grant a charter school teaching license to any person who has a bachelor's degree and demonstrates, based upon criteria established by the department, that the person is proficient in the subject or subjects that he or she intends to teach. The license authorizes the person to teach that subject or those subjects in a charter school.

(gm) Notwithstanding s. 118.19 (8), (9), and (11), grant an initial charter school principal license to any person who is licensed, or otherwise credentialed, to be a school principal in another state if the person holds the license or other credential in good standing, has completed at least 3 years of full-time classroom teaching, and is eligible for licensure under s. 118.19 (4) and (10). The license authorizes the person to be a principal of a charter school.

(h) Promulgate a rule requiring an applicant for a license to provide his or her home address.

(7g) **EVALUATION OF TEACHER PREPARATORY PROGRAMS.** (a) The department shall, in consultation with the governor's office, the chairpersons of the committees in the assembly and senate whose subject matter is elementary and secondary education and ranking members of those committees, the Board of Regents of the University of Wisconsin System, and the Wisconsin Association of Independent Colleges and Universities, do all of the following:

SUBCHAPTER II
STATE SUPERINTENDENT OF PUBLIC INSTRUCTION

115.28 General duties. The state superintendent shall:

(1) **GENERAL SUPERVISION.** Ascertain the condition of the public schools, stimulate interest in education and spread as widely as possible a knowledge of the means and methods which may be employed to improve the schools.

(2) **SECTARIANISM.** Exclude all sectarian books and instruction from the public schools.

(3) **SUPERVISION OF SCHOOLS.** Supervise and inspect the public schools and day schools for children with disabilities, advise the principals and local authorities thereof and give assistance in organizing such schools.

(3m) **SUPERVISION OF COOPERATIVE EDUCATIONAL SERVICE AGENCIES; RULES.** (a) Supervise and audit the receipts and expenditures of the cooperative educational service agencies, conduct program review of the agencies, supervise boundary reorganization where necessary, advise the administrators of the agencies and provide assistance in organizing the agencies throughout the state.

(b) Promulgate rules establishing procedures for the reorganization of cooperative educational service agencies and boundary appeals.

(4) **PUBLIC INFORMATION.** By reports, bulletins, circulars, correspondence and public addresses, give the public information upon the different methods of school organization and management and the subject of education generally.

(5) **APPEALS.** Examine and determine all appeals which by law are made to the state superintendent and prescribe rules of practice in respect thereto, not inconsistent with law.

(6) **ANNUAL CONVENTIONS.** Annually, hold conventions of school district administrators, supervisors and agency coordinators.

assessed valuation divided by the assessment ratio of the taxation district, file a petition with the secretary of the board requesting board review of the proposed reorganization.

(b) If a petition requesting review is filed under par. (a) 1., the secretary of the board shall immediately notify the school board of the other affected school district and each of the owners of territory in the annexed territory. If a petition requesting review is filed under par. (a) 2., the secretary of the board shall immediately notify the school board of each affected school district. Before the following January 15, the board shall issue an order either affirming the denial of the proposed reorganization or detaching all or part of the annexed territory described in the resolution or petition under sub. (2) from the school district in which it is located and attaching it to the municipal school district. The board's order shall be in writing, shall include a statement of reasons for the order and shall be filed as provided under s. 117.17 (2). If the board orders territory detached from the school district in which it is located and attached to the municipal school district, the reorganization shall take effect on the following July 1.

History: 1989 a. 114; 1991 a. 269; 1999 a. 150; 2007 a. 43; 2017 a. 207 s. 5.

117.14 Appeal to court. (1) Any person aggrieved by the denial of a consolidation under s. 117.08 (2) or 117.09 (2), the granting of a detachment and attachment of territory under s. 117.11 (3) or any order of the board or an appeal panel under this chapter may, within 30 days after copies of the order are filed with the secretary of the board under s. 117.17 (2), appeal the order to a circuit court as follows:

(a) If the order is issued under ss. 117.08, 117.09 or 117.10, the appeal shall be filed with the circuit court of any county in which any territory of any affected school district is located.

(b) If the order is issued under ss. 117.105 to 117.132, the appeal shall be filed with the circuit court of any county in which any of the territory proposed to be detached from one school district and attached to, or included in, another school district is located or with the circuit court of any county in which any territory of the school district to which the territory is proposed to be attached, or the school district that is proposed to be created, is located.

(1m) Any person aggrieved by an order resolving a boundary dispute under s. 117.35 (3) may, within 30 days after copies of the order are filed with the secretary of the board under s. 117.17 (2), appeal the order to circuit court. The appeal shall be filed with the circuit court of any county in which any portion of the disputed territory is located.

(2) A person appealing under this section shall serve a written notice of appeal stating specifically the grounds upon which the appeal is based on the secretary of the board and file the notice with the clerk of the circuit court.

History: 1989 a. 114, 287; 1997 a. 286; 1999 a. 18.

117.15 Criteria for school district reorganizations. In making any decision under ss. 117.08 to 117.132, a school board, the board and an appeal panel shall consider the following factors as they affect the educational welfare of all of the children residing in all of the affected school districts, and may consider other appropriate factors:

(1) The geographical and topographical characteristics of the affected school districts, including the estimated travel time to and from school for pupils in the school districts.

(2) The educational needs of all of the children residing in the affected school districts, the educational programs currently offered by each affected school district and the ability and commitment of each school district to meet those needs and continue to offer those educational programs.

(2m) If territory is proposed to be detached from one school district and attached to an adjoining school district or proposed to be included in a new school district under s. 117.105, whether the proposed detachment will have any adverse effect on the program currently offered by the school district from which the territory is

proposed to be detached, including both curricular and extracurricular aspects of that program.

(3) The testimony of and written statements filed by the residents of the affected school districts.

(4) The estimated fiscal effect of the proposed reorganization on the affected school districts, including the effect of the apportionment of assets and liabilities.

(5) Whether the proposed reorganization will make any part of a school district's territory noncontiguous.

(6) The socioeconomic level and racial composition of the pupils who reside or will reside in territory proposed to be detached from one school district and attached to an adjoining school district, in territory proposed to be included in a new school district under s. 117.105 or in school districts proposed to be consolidated or in a school district proposed to be dissolved; the proportion of the pupils who reside in such territory who are children at risk, as defined under s. 118.153 (1) (a); and the effect that the pupils described in this paragraph will have on the present and future socioeconomic level and racial composition of the affected school districts and on the proportion of the affected school districts' enrollments that will be children at risk.

(7) The results of any referendum held under s. 117.10.

History: 1989 a. 114, 287; 1997 a. 286.

On review of a decision under this section, the only issues to be considered are whether the reorganization authority acted within its jurisdiction and whether the determination was arbitrary and capricious. While an authority is bound to consider all the factors enumerated in this section, it may consider information from other sources, including matters within its knowledge and expertise. *School District of Waukesha v. School District Boundary Appeal Board*, 201 Wis. 2d 109, 548 N.W.2d 122 (Ct. App. 1996), 95–0905.

117.17 Reorganization order. (1) **CONTENTS; EFFECTIVE DATE.** (a) Every order of school district reorganization under s. 117.08, 117.09 or 117.105 that creates a new school district shall state the school districts which are dissolved or from which territory is detached to create the new school district, name the new school district, state the type of school district and the grades to be taught by the new school district pursuant to s. 115.01 (2), (3) and (5), designate the number of school board members under s. 120.01 or 120.41, designate the terms of initial members of the school board under s. 120.02 (3) (a), designate the method of election of school board members under s. 120.06 or 120.42, direct the election of school board members under s. 120.06 or 120.42, insofar as applicable, designate the date of the first election of school board members, as provided under s. 117.22 (2) (b), and fix the time and place for the first annual meeting of the new school district, if one is to be held. The secretary of the board shall give notice of the first annual meeting, if one is to be held, under s. 120.08 (1) (c), and shall designate a person to act as temporary chairperson of the annual meeting until a chairperson is elected.

(b) Every order of school district reorganization under s. 117.10 that dissolves a school district shall state the school district that is dissolved and describe the territory, assets and liabilities of the school district. Every order of school district reorganization issued under s. 117.10 (4) shall describe the territory, assets and liabilities allocated to each other school district under that subsection.

(bm) Every order of school district reorganization under s. 117.105 shall describe the territory of the school districts from which territory is detached to create the new school district, state the school district created by the order and describe the territory of the school district created by the order.

(c) Every order of school district reorganization under ss. 117.11 to 117.132 shall state the school districts from which any territory is detached and the school district to which any territory is attached and describe the territory.

(d) Every order of school district reorganization and every order under s. 117.35 (3) shall state the date on which it is to take effect. The date shall be as specified under ss. 117.08 to 117.132, 117.27 (1) and 117.35 (3). If an appeal is made to court under s. 117.14, the court may stay enforcement under s. 227.54 of the

117.15 Criteria for school district reorganizations. In making any decision under ss. 117.08 to 117.132, a school board, the board and an appeal panel shall consider the following factors as they affect the educational welfare of all of the children residing in all of the affected school districts, and may consider other appropriate factors:

(1) The geographical and topographical characteristics of the affected school districts, including the estimated travel time to and from school for pupils in the school districts.

(2) The educational needs of all of the children residing in the affected school districts, the educational programs currently offered by each affected school district and the ability and commitment of each school district to meet those needs and continue to offer those educational programs.

(2m) If territory is proposed to be detached from one school district and attached to an adjoining school district or proposed to be included in a new school district under s. 117.105, whether the proposed detachment will have any adverse effect on the program currently offered by the school district from which the territory is proposed to be detached, including both curricular and extracurricular aspects of that program.

(3) The testimony of and written statements filed by the residents of the affected school districts.

(4) The estimated fiscal effect of the proposed reorganization on the affected school districts, including the effect of the apportionment of assets and liabilities.

(5) Whether the proposed reorganization will make any part of a school district's territory noncontiguous.

(6) The socioeconomic level and racial composition of the pupils who reside or will reside in territory proposed to be detached from one school district and attached to an adjoining school district, in territory proposed to be included in a new school district under s. 117.105 or in school districts proposed to be consolidated or in a school district proposed to be dissolved; the proportion of the pupils who reside in such territory who are children at risk, as defined under s. 118.153(1)(a); and the effect that the pupils described in this paragraph will have on the present and future socioeconomic level and racial composition of the affected school districts and on the proportion of the affected school districts' enrollments that will be children at risk.

(7) The results of any referendum held under s. 117.10.

Re: Petition to Alter School District Boundaries

Dear Ms. Reynolds:

On January 29, 2024, the School Board for the School District of West Allis-West Milwaukee, et al. received your Petition to alter the boundaries of the West Allis-West Milwaukee School District, et al., filed pursuant to s. 117.2, Wis. Stats. On February 12, 2024, you had an opportunity to meet with the School Board and present your reasons for the proposed reorganization. The School Board met at a duly noticed public meeting to consider the Petition and criteria for school reorganizations as they affect the educational welfare of all of the children residing in the affected school districts pursuant to s. 117.15, Wis. Stats.

After the discussion at the Board meeting on Monday, February 26, 2024, the School Board adopted a Resolution denying the Petition based on the criteria under s. 117.15, Wis. Stats.

A certified copy of the adopted Resolution is enclosed, along with the supporting attachments to the Resolution, which includes the rationale for denial of the Petition.

If you have additional questions or concerns, please contact me at 414-604-3005.

Very truly yours,

A handwritten signature in black ink, appearing to read 'T. Robinson'.

Learning That Works

Attachment to Resolution
March 1, 2024

The Board of Education for the School District of West Allis-West Milwaukee, et al. has voted to adopt a Resolution denying the Petition from John Schmidt and Leah Reynolds (“Petitioners”) to alter school boundaries, which sought to detach two parcels in New Berlin from the School District of West Allis-West Milwaukee, et al. (“WAWM”) and attach the property into the New Berlin School District. The Board heard testimony from the petitioners on Monday, February 12, 2024. After the discussion at the Board meeting on Monday, February 26, 2024, the Board adopted a Resolution denying the Petition based on the criteria for school reorganizations as they affect the educational welfare of all the children residing in the affected school districts pursuant to Wisconsin Statute section 117.15. Specifically, the Board has voted to deny the Petition based on the following reasons:

Criteria 1: Petitioners were concerned that the drive from their home to their neighborhood school in West Allis-West Milwaukee was further than in New Berlin School District. The petitioners stated the additional miles traveled to some of the schools were longer for their children than if they attended the New Berlin School District. This however is not factual. If you take the daily trip from their home to their respective neighborhood school in the WAWM School District and annualize it over a student's career the result is that their total travel distance is far less.

Testimonial 1: The petitioners were concerned with the test scores as they compared the West Allis-West Milwaukee School vs. the New Berlin School District. What the petitioners offered was school wide data as their evidence. What the petitioners went on to suggest is that a student who lives in New Berlin but attends the WAWM School District is not able to receive the same level of academic opportunities as would be afforded in the New Berlin School District. This however is not the case, when you look at how students who live in New Berlin and attend our schools score on state assessments vs their same aged peers in New Berlin School District the results are skewed. This shows that students who attend the WAWM School District and live in New Berlin can and do receive a similar academic experience.

Criteria 2: The petitioners were concerned with the test scores as they compared the West Allis-West Milwaukee School vs. the New Berlin School District. What the petitioners offered was school wide data as their evidence. What the petitioners went on to suggest is that a student

who lives in New Berlin but attends the WAWM School District is not able to receive the same level of academic opportunities as would be afforded in the New Berlin School District. This however is not the case, when you look at how students who live in New Berlin and attend our schools score on state assessments vs their same aged peers in New Berlin School District the results are skewed. This shows that students who attend the WAWM School District and live in New Berlin can and do receive a similar academic experience.

Testimonial 2: The petitioners cited poor financial management as a reason for a potential detachment. In reality, the WAWM School District is in a much better financial position than the New Berlin School District.

Criteria 3: The petitioner's believed that as a result of the 2022 failed referendum, the District would increase class sizes and cut programs, including athletic programs. Neither of these have occurred. The School Board has not changed class sizes and staffing targets, and has not cut programs or athletic budgets.

Further, WAWM target class sizes are considerably lower now than in New Berlin. The District has continued its commitment to smaller class sizes in spite of the failed referendum.

Testimonial 3: The petitioners cited a failed referendum as a material reason as to why they wanted to detach additionally citing tax reasons. Over the past 5 years, the New Berlin School District and the WAWM School District have asked voters to approve the same number of referendums. Both failed. Due to a DPI appeal that granted a 2023 petition to detach, New Berlin School District does have a lower mill rate. It is important to note that in 2022-23 our mill rate was lower than theirs. This snowball effect, which would continue if this petition was to be approved, is again another reason why this should be denied at every level.

Criteria 4: The petitioners stated the following: concerns about test scores, history of poor financial management, tax differences and that their territory resides in Waukesha County while the School District resides in Milwaukee County.

Testimonial 4: The petitioners cited that they live in Waukesha County and they attend school in Milwaukee County. The reality is there are over 100 school districts whose property spans multiple counties. This is not a legitimate reason to detach.

Since the failure of the 2022 referendum, the administration and school board decided that the District would not reduce or cut programming and have remained committed to class size targets. At no time, post referendum, have these things changed. The class size targets continue to be lower than the New Berlin School District

Criteria 5: If all students (or parcels) were to detach from the WAWM, it would result in an increase in the Mill rate for WAWM residents and property owners.

Provided all the New Berlin students were permitted to detach, this would mean the District would lose another 227 resident members (21 lost during the 2023 petition) both in attendance and accessing open enrollment. Based on 2024-25 per pupil amounts this would mean a total of \$2.07 million in lost revenue. The total EPV for all of New Berlin residing in the WAWM School District is \$385,108,728 this represents just under 6% of the total EPV for all municipalities

within the WAWM School District. 227 additional students is roughly 3.3% of student resident membership. If the District lost 3.3% of its membership, but 6% of the tax base, WAWM residents could expect taxes (mill rate) to increase.

Additionally, WAWM School District is in a much healthier financial position. Just comparing fund balance alone, WAWM has a fund balance of 33.50% of its overall budget and New Berlin is at 24.98%. Inside of these numbers is another indicator of strong financial planning for the future for WAWM. Per the 2021-22 Financial Statements, New Berlin does not have a Fund 46/49 which supports capital improvements.

Criteria 6: If all the parcels within New Berlin detach, it may further complicate the boundaries of the City of New Berlin and the Elmbrook School District.

Criteria 7: There is a significant difference in the economic realities of the families served in the West Allis-West Milwaukee School District compared to the New Berlin School District. Only 14.2% of New Berlin students qualify as economically disadvantaged while 63.7% of West Allis - West Milwaukee students do in the 2022-2023 school year. For comparison over time the New Berlin rate in 2016-2017 was almost the same at 11.6% while our rate increased by more than 6 percentage points from 56.2%.

The difference between the socio-economic status of the New Berlin students in the petition and New Berlin students attending the WAWM School District overall is that they are in more affluent households. In addition, there is a stark difference in the percent of economically disadvantaged families in the WAWM School District compared to New Berlin overall. WAWM also serves a higher percentage of students with disabilities.

Criteria 8: The petitioners cited a failed referendum as a material reason as to why they wanted to detach additionally citing tax reasons. Over the past 5 years, the New Berlin School District and the WAWM School District have asked voters to approve the same number of referendums. Both failed. Due to a DPI appeal that granted a 2023 petition to detach, New Berlin School District does have a lower mill rate. It is important to note that in 2022-23 our mill rate was lower than there's. This snowball effect, which would continue if this petition was to be approved, is again another reason why this should be denied at every level.

In summary, as outlined above and demonstrated by the Board's consideration of the criteria within Wisconsin Statute 117.15, it is for those such reasons that this request is being formally denied.

Testimonial 4: The petitioners cited that they live in Waukesha County and they attend school in Milwaukee County. The reality is there are over 100 school districts whose property spans multiple counties. This is not a legitimate reason to detach.

Since the failure of the 2022 referendum, the administration and school board decided that the District would not reduce or cut programming and have remained committed to class size targets. At no time, post referendum, have these things changed. The class size targets continue to be lower than the New Berlin School District

Criteria 5: If all students (or parcels) were to detach from the WAWM, it would result in an increase in the Mill rate for WAWM residents and property owners.

Provided all the New Berlin students were permitted to detach, this would mean the District would lose another 227 resident members (21 lost during the 2023 petition) both in attendance and accessing open enrollment. Based on 2024-25 per pupil amounts this would mean a total of \$2.07 million in lost revenue. The total EPV for all of New Berlin residing in the WAWM School District is \$385,108,728 this represents just under 6% of the total EPV for all municipalities

within the WAWM School District. 227 additional students is roughly 3.3% of student resident membership. If the District lost 3.3% of its membership, but 6% of the tax base, WAWM residents could expect taxes (mill rate) to increase.

Additionally, WAWM School District is in a much healthier financial position. Just comparing fund balance alone, WAWM has a fund balance of 33.50% of its overall budget and New Berlin is at 24.98%. Inside of these numbers is another indicator of strong financial planning for the future for WAWM. Per the 2021-22 Financial Statements, New Berlin does not have a Fund 46/49 which supports capital improvements.

Criteria 6: If all the parcels within New Berlin detach, it may further complicate the boundaries of the City of New Berlin and the Elmbrook School District.

Criteria 7: There is a significant difference in the economic realities of the families served in the West Allis-West Milwaukee School District compared to the New Berlin School District. Only 14.2% of New Berlin students qualify as economically disadvantaged while 63.7% of West Allis - West Milwaukee students do in the 2022-2023 school year. For comparison over time the New Berlin rate in 2016-2017 was almost the same at 11.6% while our rate increased by more than 6 percentage points from 56.2%.

The difference between the socio-economic status of the New Berlin students in the petition and New Berlin students attending the WAWM School District overall is that they are in more affluent households. In addition, there is a stark difference in the percent of economically disadvantaged families in the WAWM School District compared to New Berlin overall. WAWM also serves a higher percentage of students with disabilities.

Criteria 8: The petitioners cited a failed referendum as a material reason as to why they wanted to detach additionally citing tax reasons. Over the past 5 years, the New Berlin School District and the WAWM School District have asked voters to approve the same number of referendums. Both failed. Due to a DPI appeal that granted a 2023 petition to detach, New Berlin School District does have a lower mill rate. It is important to note that in 2022-23 our mill rate was lower than there's. This snowball effect, which would continue if this petition was to be approved, is again another reason why this should be denied at every level.

In summary, as outlined above and demonstrated by the Board's consideration of the criteria within Wisconsin Statute 117.15, it is for those such reasons that this request is being formally denied.

Noah Leigh

BOARD OF EDUCATION
NEW BERLIN, WISCONSIN**

**REGULAR MEETING
February 26, 2024**

MINUTES

A meeting of the New Berlin Board of Education, School District of New Berlin, Waukesha county, state of Wisconsin, was called to order at 6:30 p.m., on February 26, in conference room E of district office, 4333 S. Sunnyslope Road, New Berlin, Wisconsin 53151.

Members present: Amy Crosby, Renee Koneck, Jeffrey Kurth, Janet Schulz, Ron Seidl and Allison Spindler.

Others present: Superintendent Joe Garza, Chief Academic Officer Dr. Kellie Sanders, Chief Financial Officer Patrick Miller, Director of Communications David Cotey, and Assistant to the Superintendent and School Board Anne Warchol. Also in attendance were: West Principal Michael Fesenmaier, Associate Principals Trudy Wahlen and Jordan Napoli, and Athletics & Activities Director Cody Smith.

Roll Call - Adjourn to Closed Session

Motion by Kurth, second by Crosby to adjourn to closed session pursuant to Section 19.85(1)(c)(e), and (f) of the Wisconsin Statutes to consider:

- Approval of Closed Session Minutes of February 12
- Employment, performance and compensation matters pertaining to staff
- Discuss/Approve Employee Handbook
- Class Size Update
- Security Infrastructure Presentation
- Return to Open Session

By roll call, the motion was adopted.

The meeting adjourned at 7:08 p.m.

Administrative Team Report

School Update - West

The West administrative team shared an update with the board.

Superintendent's Update

Mr. Garza touched on the Winter FastBridge Data report which had been shared with the Board and asked if there were any questions.

Student Representative Update

Student representative Angelina Dorshak provided an update on recent events taking place at West.

District Reports

Incident Report

Enrollment Report

Suspension Report

Donation Report

Mr. Seidl read the donation report, acknowledging those who have made generous donations to the district and schools.

Consent Agenda

Approval of Minutes of the Board Meeting on February 12

Financial Reports

By a show of hands, a motion by Kurth, second by Seidl to approve the Consent Agenda as presented was adopted.

Regular Agenda

Discuss / Approve Financial Statement Audit for Fiscal Year Ended June 30, 2023

Mike Sama of Schumacher Sama shared an overview of last year's audit.

By a show of hands, a motion by Kurth, second by Seidl to approve the financial statement audit for fiscal year ended June 30, 2023 as presented was unanimously adopted.

Discuss / Approve 2025-26 School Year Calendar

The proposed 2025-26 school year calendar was shared with the board.

By a show of hands, a motion by Kurth, second by Seidl to approve the 2025-26 school year calendar as presented was unanimously adopted.

Discuss / Approve WAWM Citizen Petition to Alter School District Boundaries

The West Allis West Milwaukee (WAWM) citizen petition to alter school district boundaries was shared with the board.

By a show of hands, a motion by Kurth, second by Seidl to approve the West Allis West Milwaukee citizen petition to alter school district boundaries as presented was unanimously adopted.

Action on items discussed in Closed Session

Employment Services Report

By a show of hands, a motion by Spindler, second by Crosby, to approve the employment services report was unanimously adopted.

Employee Handbook

By a show of hands, a motion by Kurth, second by Seidl, to approve the employee handbook as presented was unanimously adopted.

New Hires

Newman, Mathew

Resignations

Stefancin, Andy

Future Meetings and Dates

- March 11
- March 18
- April 8

Other important events/dates:

- March 25 - 29 - Spring break - no school
- April 3 - End of quarter

Adjournment

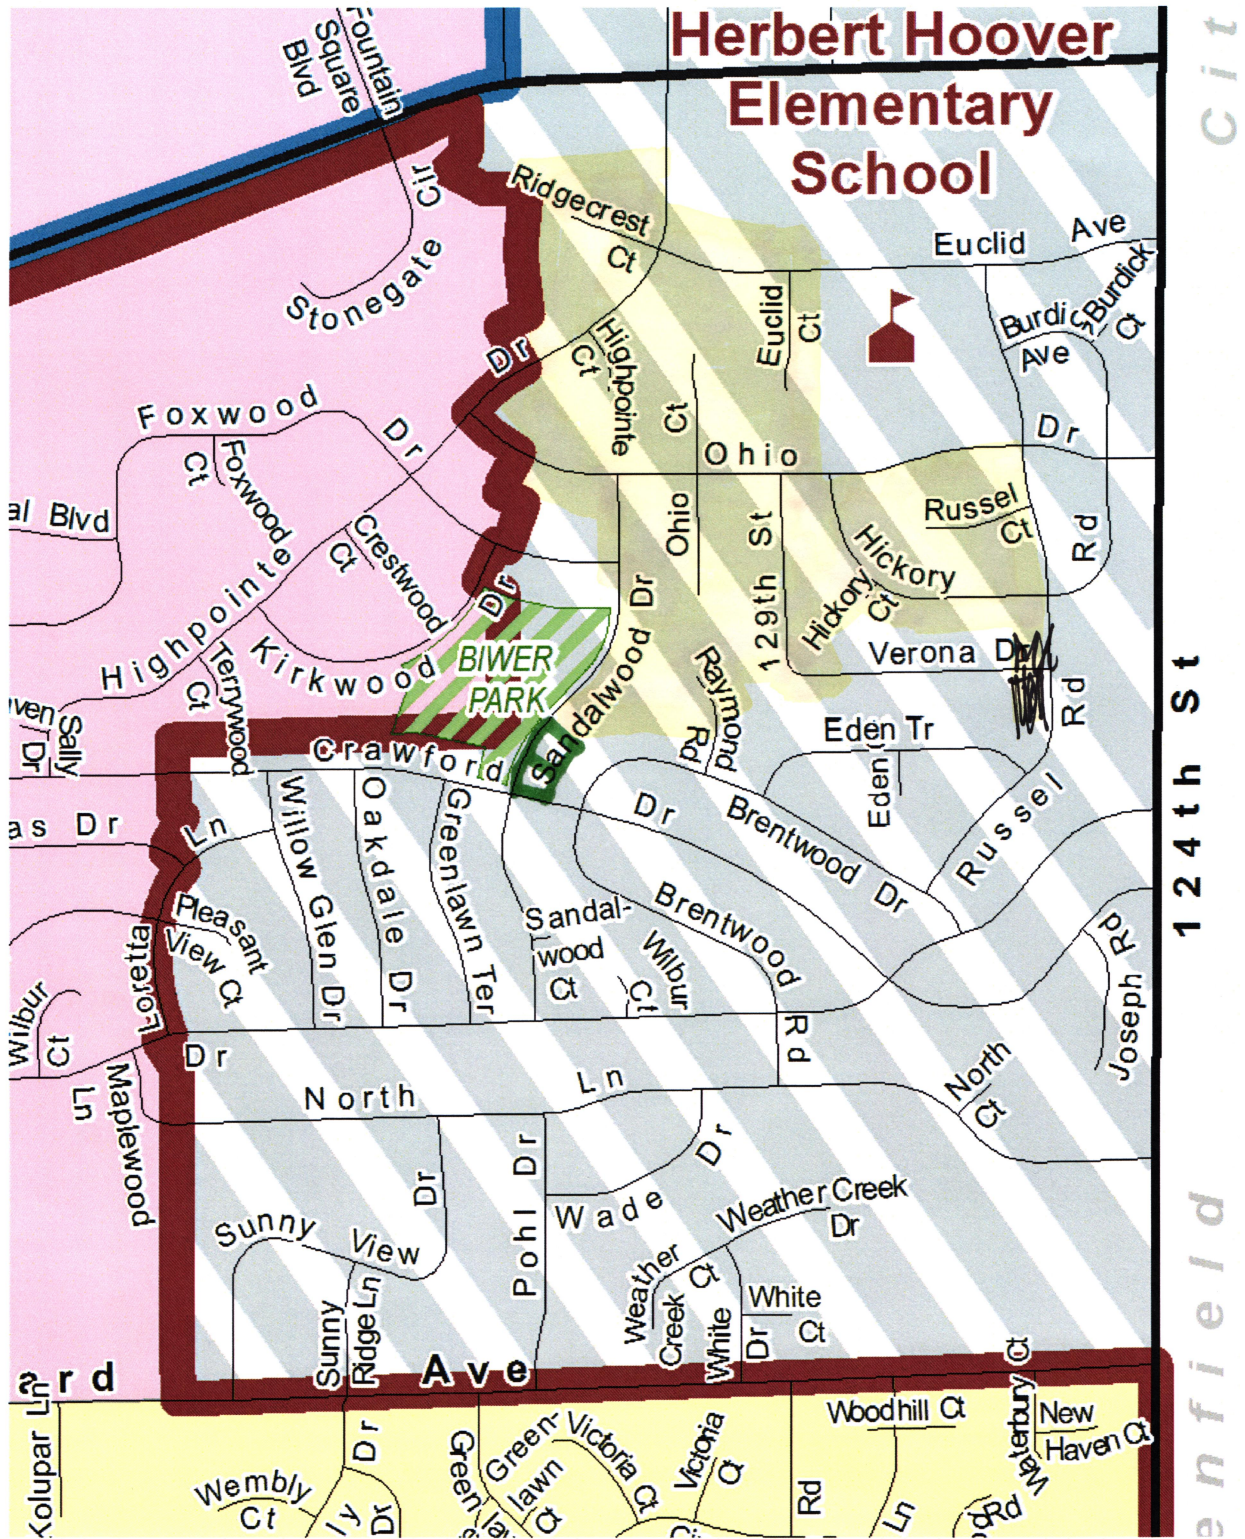

By a show of hands, a motion by Seidl, second by Kurth to adjourn was unanimously adopted.

The meeting adjourned at 7:59 p.m.

School District of New Berlin

ACADEMIC & CAREER PLANNING GUIDE

This Guide was designed to support each student in creating his/her personal Academic & Career Plan (ACP). All sections of this guide are related.

ACADEMIC & CAREER PLANNING

Students in grades 7-12 engage in the Academic and Career Planning process to set goals and action plans to achieve those goals. This information is revised annually to reflect any changes based on their experiences. Academic and Career Planning is designed to support students who are still exploring as well as those that have selected a specific area of interest.

PROGRAMS OF STUDY

Programs of Study allow students to explore, and understand the relevance of, courses and learning experiences that support a variety of career paths across industries. Students are encouraged to explore several different Programs of Study based on their interests.

[CLICK HERE TO LEARN MORE](#)

VISION OF OUR GRADUATE

COURSE OFFERINGS

Course Offerings are listed by departments. Each listing includes the course length, number of credits offered, prerequisites, if the course is offered during the summer, and if the course offers college credit and/or the opportunity to earn an industry credential.

CAREER & SERVICE BASED LEARNING

Career & Service Based Learning allows students to apply what they have learned in school in a real world environment. Students can explore paid and unpaid opportunities designed to provide additional mentorship aligned to a student's areas of interest. Students in this program are awarded elective credit and are eligible for work release.

HEALTH SCIENCE
The Health Science Program of Study (POS) connects individuals to a large variety of health care areas that is characterized by diversity and changing technologies. This Program of Study allows students to investigate and observe a large variety of health care areas. Health Science careers include planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.

ENGLISH
Graduation Requirements: 4 Credits and .5 of Speech

COURSE SELECTION FLOW CHART
Progression of courses in this department

ENGLISH 9 FOUNDATIONAL COURSE
CREDIT: 1.0
GRADE LEVEL: 9
Ninth grade English Language Arts is a course that builds on its predecessor with the continued refining of the English language through literature, writing, grammar, vocabulary, speaking, and listening. The ninth-grade course is an overview of literature across the major forms and genres: short story, novel, poem, drama, epic poetry, and literary nonfiction. Each unit focuses on a genre and a related theme. Within each unit, students will continue to develop reading strategies and vocabulary skills. Students will analyze the literature they are reading through discussion and the district-defined writing process, with a mastery of claim, evidence and reasoning in relation to a well-developed thesis. This involves pre-writing, drafting, revising, and editing to produce writing that is thoughtful and accurate. Though the writing focus is primarily analytic, students will also write creatively in English 9.

ENGLISH 10 FOUNDATIONAL COURSE
CREDIT: 1.0
GRADE LEVEL: 10
In tenth grade, students study world literature from a variety of regions, such as Russia, Asia, Africa, the Middle East, and/or Latin America. Students engage in close reading and other types of literary analysis.

ENGLISH 9-HONORS FOUNDATIONAL COURSE
CREDIT: 1.0
GRADE LEVEL: 9
English 9 Honors is for students who are committed to challenging their reading and writing skills. The honors level offers the English 9 curriculum (short novel, poetry, drama, epic poetry, and literary nonfiction) with an increased level of written and oral analysis, emphasis on reading independently. Students who register for this course are proficient or advanced writers and readers who will continue to develop those skills.

ENGLISH 10-HONORS FOUNDATIONAL COURSE
CREDIT: 1.0
GRADE LEVEL: 10
In tenth grade, students study world literature from a variety of regions, such as Russia, Asia, Africa, the Middle East, and/or Latin America. Students engage in close reading and other types of literary analysis.

COURSE TITLE
PROJECT LEAD THE WAY (PLTW): 07001 INTRO TO ENGINEERING DESIGN ★

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: A course fee up to \$20 may be charged.

COURSE DESCRIPTION
An Introduction to Engineering Design student will use 3D modeling software to apply the design process to improve existing and design new products. Emphasis is placed on analyzing potential solutions and communicating designs to others. Activities may include, but are not limited to: designing, modeling, and fabricating a puzzle cube; 3D modeling of a toy train, and reverse engineering. This is an advanced standing course through WCTC and a transcripted credit course through MSOE or another PLTW affiliate university.
SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

Academic Career & Planning Guide 4

HOW TO USE THIS GUIDE TO INFORM YOUR ACADEMIC & CAREER PLAN

STEP 1.

Familiarize yourself with important terminology used in the ACP Guide

Review pg. 4 for an overview of the different sections the guide contains.

STEP 2.

Reflect on questions on pgs. 8 and 9 to help inform your Academic and Career Plan

Now is a good time to revisit the reflective questions found on pgs. 8 and 9. Your answers today may be different from how you answered these questions in the past. That's ok and even expected. Don't skip this part, as it will set the foundation for the directions that follow.

STEP 3.

Find a Career Cluster or Clusters that appeal to you in the Program of Study section.

Once you find a Cluster or Clusters that appeal to you, review different careers in that Cluster in the Career Types by Pathway table. Consider any careers that interest you. Each are included in a Pathway. Make note of that Pathway.

STEP 4.

Find the Program of Study that supports a Pathway of interest

Review the Program of Study for the Cluster or Clusters that appeal to you. It includes links to courses, along with related student organizations and industry certifications that are available. Click on the link to the High School / College-Level Courses on pg. 62 and find your Cluster at the top of the table. Scroll down that column to find the courses that can help you explore the Cluster, build skills that will be useful for the Pathway careers within it, and/or expedite the time it takes to complete a related credential.

Some Clusters have "Examples of High School / College-Level Courses Aligned to Careers within Specific Pathways" listed in the Program of Study pages. Consider if you might want to explore a Pathway by taking those courses.

STEP 5.

Use worksheets as a tool to prepare for course request

Next, use the Middle School Worksheet on pg. 51 and/or the High School Worksheet on pg. 61 to help you plan out your courses so you can be ready to request next year's courses in Infinite Campus during the course request period.

STEP 6.

Update your Academic and Career Plan

Finally, be sure to update your Academic and Career Plan in Xello to reflect your latest goals and plans to meet those goals.

I've always loved
Biology

I'm going to look
at courses in the
Health Science and
Human Service
Programs of Study.

I'll volunteer at
the local hospital
to gain some work
experience.

Maybe I'll enroll
in the school
district's Certified
Nursing Assistant
program too!

AL

I've always liked
to build things.

Engineering
is something
that really
interests me.

I'm going to look
at courses in the
Manufacturing,
STEM and
Architecture &
Construction
Programs of Study.

I think I'll join the
Robotics Club too!

REFLECTIVE QUESTIONS FOR STUDENTS

Throughout the Academic & Career Planning (ACP) process, students are encouraged to reflect on four main questions to help develop their ACP. Students are encouraged to reflect on these questions as they develop their Academic & Career Plan.

Who
am I?
(THE MIRROR)

What interests me?

What are my strongest skills?

Which dispositions for success do I need to further develop based on my last report card?

What academic, career, and/or life skills would I like to develop before I graduate?

What is my preferred learning style and/or environment?

What do
I want
to DO?
(THE COMPASS)

Which Programs of Study am I most interested in and why?

Are there any specific career specialties/pathways that are of interest to me?

What type of degree or certificate do I need to support my post-secondary goals?

Will this career choice support what I want for my financial future?

Which internal and external courses can I take to continue to explore my interests?

What jobs would I like to shadow and when will I do that?

How do I GET there? (THE MAP)

What do I want to get out of my SkillsUSA education experience?

What schools offer a related degree/major?

What are the typical credit numbers in each subject I need for college admissions?

What will I need to provide a competitive admissions application for the schools/majors I might be interested in? For example:

- What level of math must I complete?
- Which specific science courses are required?
- Do I have to take a world language?
- Do I have to take fine arts classes?
- Do I need to complete a portfolio?
- What ACT scores are required for admission and/or merit aid?

In what areas will I pursue more rigorous coursework to support my strengths and/or areas of interest? Will I take AP Courses, Early College Credit Program, Start College Now, Transcribed Credit, Dual Enrollment, etc.?

Do I want a college level experience to further explore a major or career? If so, which ones best support my post-secondary plans?

Will my credits transfer to the school(s) I want to attend?

Which extra-curricular activities will support my interests?

What skills and work-based learning experiences will help me develop desired skills?

What adults in my life do I feel could act as a mentor as I continue to explore opportunities for my future?

What credentials should I explore?

FINANCIAL PLANNING QUESTIONS

How much do I anticipate that my post high school education might cost and how will I pay for it?

Will I qualify for need-based financial aid and/or merit scholarships?

Will I have any savings from employment, etc. during High School?

Do I know how to find/sustain employment if needed to help fund my education?

GO! (THE VEHICLE)

Students are an active participant in their Academic & Career Planning Process. Students are encouraged to reflect often on their choices and update their plans, sometimes more than yearly. This will include:

- Reviewing, adapting or modifying course selections
- Reviewing, adapting or modifying personal goals
- Conferencing with counselors and/or parents

AN ONGOING PROCESS

At each grade level, students will practice goal setting and planning by developing and/or revising their personal Academic & Career Plan with guidance from adult mentors (staff, counselors, parents, community members). This is meant to be a gradual process that builds from one year to the next and supports the unique development of each student. Student goals and plans are expected to change annually based on their personal experiences.

6th

6TH GRADE STUDENT OUTCOMES

- Understand definitions and terms related to the Academic and Career Plan.
- Learn and explore each of the 16 Programs of Study and develop Programs of Study to explore further.
- Develop an initial six-year course plan to modify over time.

7th

7TH GRADE STUDENT OUTCOMES

- Complete inventories to gain understanding of themselves and the concept of a personal brand, and use the inventories to identify potential career interests to explore further.
- Understand how to set goals, action plans to reach those goals, and use school resources to develop a six-year plan.
- Understand how to align course selection with potential career interests.

8th

8TH GRADE STUDENT OUTCOMES

- Understand graduation requirements, what makes up a high school transcript and the high school timeline of College and Career Readiness events.
- Understand how to evaluate the accuracy of stated goals and action plans to reflect past experiences.

9th

9TH GRADE STUDENT OUTCOMES

- Update personal inventories to identify any key changes that could affect goals or plans.
- Be exposed to the concept of “post-secondary alignment,” and available opportunities that support post-secondary.
- Update the remainder of your six-year plan to include post-secondary options.

10th

10TH GRADE STUDENT OUTCOMES

- Conduct structured research on potential careers.
- Identify roles and responsibilities, skills and dispositions, education/training needed for identified careers.
- Understand how to research job opportunities, create and use a network to find employment, and leverage labor market projections to assess future job opportunities.
- Learn how to create a functional resume and understand the importance of building resumes over time.
- Learn about Career and Service Based Learning Opportunities.
- Be exposed to financial planning that supports post-secondary and life.

11th

11TH GRADE STUDENT OUTCOMES

- Understand how to evaluate post-secondary opportunities, do a college search, and locate and complete a college application.
- Review assessment results and how they might impact post-secondary planning.
- Understand financial implications for alternative post-secondary options along with resources available.

12th

12TH GRADE STUDENT OUTCOMES

- Develop a financial plan to support post-secondary transition.
- Ensure Academic and Career Plan and related documents accurately reflect all honors, credentials, endorsements, etc. that comprise their high school portfolio.
- Transition Academic and Career Plan portfolio elements to ensure access after graduation.
- Understand the labor market to make informed career and post-secondary decisions.

ACP – ARTIFACTS

Students will use an online tool called Xello to take interest and skill inventories, explore post-secondary options, and store their Academic & Career Planning (ACP) artifacts. The advantage of using this platform is that it allows students to access their ACP information wherever they have internet access and they will update this information from year-to-year. Students are expected to share this information with their counselor, advisory teacher, and parents. As a parent, you are an important part of the ACP process. We recommend that you have ongoing discussions with your son or daughter about their personal, academic, social and career goals. Parents are able to review artifacts via Xello. Here are some suggestions of things you can do to become involved with your son or daughter's ACP:

- Become familiar with the information located under the College and Career Readiness webpage www.nbxcellence.org/district/ccr.cfm on the New Berlin School District website.
- Talk with your student about the reflection questions included in the ACP Guide as well as those covered during their Advisory Period.
- Discuss what subjects your student would like to learn about and what experiences they would like to participate in to develop their ACP.
- Ask your child to share their personal statement, goals, and action plan with you.
- Encourage your student to review their artifacts on Xello with you. For more information about Xello: <https://xello.world/en/>

In each grade level, students will work towards achieving different outcomes. These outcomes are differentiated by grade level. The ACP process is designed to build each year to support the development of each student. The artifacts generated by students in each grade level are outlined in the table below.

GRADE	1ST SEMESTER ARTIFACTS	2ND SEMESTER ARTIFACTS
	<ul style="list-style-type: none"> • INTEREST INVENTORY • GOAL SETTING LESSON • WORK SKILLS, INTERESTS, AND VALUES ASSESSMENT • CAREER CLUSTER ACTIVITY • CAREER DAY ACTIVITY 	<ul style="list-style-type: none"> • ALL ABOUT ME BUSINESS LETTER • CAREER PRESENTATION • COURSE PLANNING ACTIVITY • SMARTGOALS • COMPLETED ACP

PROGRAMS OF STUDY

OVERVIEW 13

THE PROGRAMS OF STUDY:

- Agriculture, Food and Natural Resources 14
- Architecture and Construction. 16
- Arts, A/V Technology, and Communications 18
- Business, Management and Administration 20
- Education and Training 22
- Finance. 24
- Government and Public Administration 26
- Health Science 28
- Hospitality and Tourism. 30
- Human Services. 32
- Information Technology. 34
- Law, Public Safety, Corrections, and Security 36
- Manufacturing 38
- Marketing. 40
- STEM (Science Technology Engineering and Math) 42
- Transportation, Distribution, and Logistics. 44

PROGRAMS OF STUDY: OVERVIEW

“Programs of Study provide a framework to connect rigorous and relevant learning experiences to a wide variety of opportunities after high school.”

What is a Program of Study?

The School District of New Berlin’s Programs of Study are based on the national Programs of Study framework, which aligns high school and postsecondary education with the demands of the changing global economy. The information provided is customized to the School District of New Berlin in alignment with the Vision of Our Graduate.

Programs of Study are designed to provide a context for purposeful conversations with counselors and staff as students develop and revise their Academic and Career Plan over time.

Career Clusters and Career Pathways within the Programs of Study

There are sixteen Career Clusters organized by a common theme or interest. Learning experiences from different Programs of Study often complement each other so it is important to review a variety of them. Career Clusters (for example, Health Science) are often refined further by career pathways (for example, Therapeutic Services) for those students who already know which career they plan to pursue. Students can get more information on the Xello website <https://xello.world/en/>.

Connecting Programs of Study to a Student’s Academic and Career Plan

We expect every Academic and Career Plan to be as unique as each of our students. For example,

- Students passionate about pursuing a specific career can pursue opportunities aligned to a single Program of Study.
- Students can choose to blend portions of one Program of Study with another based on their skills and interests.
- Students who are unsure of their long term career interests can explore opportunities in many different Programs of Study that will help them better understand themselves and the skills and knowledge needed for different careers.
- Students may also choose a liberal arts approach to their education by focusing on the course sequences in each of the core subject areas along with coursework in the humanities, fine arts and world languages. This approach defers certain aspects of career exploration to a student’s postsecondary education.
- All students are advised to select opportunities for rigor (college level coursework in academic and/or technical subjects) in their areas of strength and/or

interest to ensure that they continue to develop their knowledge, skills and dispositions for success each and every year.

Coursework listed in the Programs of Study

All students are provided with learning opportunities to understand a variety of different industries as well as potential career pathways. A variety of academic, career and technical standards are embedded into SDNB coursework and instructional strategies. Specific course selections are based on alignment to personal, academic, social and career goals.

Where possible, examples of coursework that support certain career pathways within the Programs of Study are identified. Students in the School District of New Berlin are not required to select a pathway or even follow the courses that align to a pathway as suggested. These examples highlight one of many ways a student can choose to explore a specific Program of Study. Pathways include related college-level coursework for those up to an added challenge. Students can access an even wider variety of post-secondary experiences through the Early College Credit Program. Please reference the prerequisites listed in the high school course offerings section of this guide to determine appropriate course progression.

Please note that we have not included the core academic courses needed for students’ graduation in each of the Programs of Study. However, students are encouraged to select courses that allow them to work towards college level English, math, science and social studies. For a complete list of high school courses and the Programs of Study they support, please see the High School Course Correlation Table.

Post-secondary Planning

Students can utilize Wisconsin’s Early College Credit Program, courses that provide Transcribed Credit/Advanced Standing, and Advanced Placement coursework, as well as Career and Service Based Learning credit, to begin some of their post-secondary education while still in High School. Students can also use the 16 Program of Study charts, adapted from, from Nebraska’s Career Connections <https://cestandards.education.ne.gov/> site to review what type of education is needed for each career within the cluster.

For more information about post-secondary planning in high school, click here <https://www.nbexcellence.org/district/college-in-high-school.cfm> and <https://www.nbexcellence.org/district/pathways-program.cfm>

HEALTH SCIENCE

The Health Science Program of Study (POS) connects individuals to a large variety of health care areas that are characterized by diversity and changing technologies. This Program of Study allows students to investigate and observe a large variety of health care areas. Health Science careers include planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.

INFORMATION TECHNOLOGY

Program of Study

The Information Technology/Computing Program of Study (POS) involves the design, development, support and management of hardware, software, multimedia and systems integration services. In addition to careers in the IT industry, IT careers are available in every sector of the economy - from Financial Services to Medical Services, Business to Engineering and Environmental Services. Anyone preparing for an IT career should have a solid grounding in math and science. There are obvious connections between Information Technology and other programs of study (please see those in parentheses below for possible opportunities).

TRANSPORTATION, DISTRIBUTION, & LOGISTICS

Program of Study

This Program of Study exposes students to careers and businesses involved in the planning, management, and movement of people, materials, and products by road, air, rail and water. It also includes related professional and technical support services such as infrastructure planning and management, logistic services, and the maintenance of mobile equipment and facilities.

PATHWAYS

TRANSPORTATION OPERATIONS CAREER PATH

These are the people who keep things moving—literally. Workers in this area operate the trucks, buses, planes, and trains that move people and goods from one place to another. They are also the ones who make sure that the work is occurring according to schedule. Transportation operations workers include locomotive engineers, pilots, taxi drivers, and truck drivers.

CREDIT REQUIREMENTS

The range of courses offered at our high schools is designed to prepare students for a variety of post-secondary pursuits. Admission requirements fluctuate widely with different opportunities after high school. The chart below gives students an example of what some post-secondary institutions require. As part of their academic & career planning process and prior to selecting courses, students are encouraged to review requirements for the opportunity they wish to pursue.

	SDNB GRADUATION REQUIREMENTS	UW MADISON ADMISSION SUGGESTIONS	ACT CORE CURRICULUM RECOMMENDATION	WCTC ADMISSION SUGGESTIONS
ENGLISH	4.5 credits <i>(Including .5 speech)</i>	4 credits	4 credits <i>(1 Communication Arts)</i>	4 credits
MATH	3 credits <i>(Algebra I and two credits beyond)</i>	4 credits <i>(Computer science, business math, & statistics do not apply)</i>	3 credits <i>(Algebra I, Geometry, Algebra II)</i>	3 credits
SCIENCE	3 credits <i>(Including 1 physical science & 1 biology)</i>	3-4 credits	3 credits <i>(Biology, Chemistry, Physics)</i>	3 credits
SOCIAL STUDIES	3 credits <i>(Including 1 credit of 20th Century US History or AP US History and 1 credit of World Studies or AP Human Geography) All Graduates will need to pass a Civics Assessment to graduate.</i>	3-4 credits	3 credits	3 credits
PHYSICAL EDUCATION	1.5 credits <i>(WI requirement)</i> <i>*Act 105 Waiver can be used for .5 credits</i> <i>Students must take 1.5 credits in no less than 3 years.</i>			
HEALTH	.5 credits <i>(Grade 7-12 WI requirement)</i>			
WORLD LANGUAGES	2.0 credits <i>(Any combination of fine arts, vocational, and/or world language)</i>	3-4 credits <i>(Of a single world language)</i>		
FINE ARTS		2 credits <i>(Of fine arts/additional academic credits)</i>		
ELECTIVES	6.5 credits <i>(Core classes taken above requirement will count towards the 6.5 total credits)</i>		Some colleges/universities require other courses as prerequisites to admission such as 2+ years of world language or courses in the arts, computer science, etc.	3 credits of vocational/technical credits <i>(Can include Dual Enrollment, Early College Credit, Start College Now or transcripted credit courses)</i>
TOTAL	24.0 credits			

SCHEDULING INFO

This course offering guide is intended to provide for you a broad array of options. As you plan your course sequence, please consider courses that will challenge you as well as enhance your opportunities beyond high school.

It is important when making course selections that you select courses carefully; your completed schedule is considered final. It is essential that parents and students put considerable thought into the selection of courses. We will establish the school schedule based on the course requests made during registration; we determine the number of teachers and sections of courses needed based on those requests. All course offerings are subject to student and teacher availability. Some classes offered may be cancelled because of low enrollment. Course changes later in the scheduling cycle are difficult to make and sometimes impossible.

Additional information about scheduling and grading can be found in the [Student/Parent Handbook](#) on our website.

STUDENT COURSE LOAD

Middle school students need a minimum of 6 courses per year. High school students need a minimum of 7 credits per year (exceptions may apply for some seniors with approval from counselor with CSBL or Early College Credit Program). These can include credit earnings such as co-op, Early College Credit Program (ECCP), apprenticeship, mentorship, internship and other off campus courses as approved by the administration. (Graduation Board Policy)

Please note that some course options may be accessed through a required recommendation by staff. Students will be notified when these recommendations are made and for which course(s) they will apply.

SCHEDULE CHANGES

Students and parents are encouraged to carefully consider course selections prior to signing up and taking courses for the school year. If a student is considering a class change, the student and their parent should consider the impact this adjustment will have on their transcript. After the first four weeks of a course (the beginning of the year for a year long course and each semester for a semester course) a high school student who drops a course will receive an F for the course taken.

Students who wish to drop a year long course at second semester must get the recommendation from the instructor and approval from Administration. The recommendation will only be provided if the instructor determines the student does not have the skills to be successful in the course. These decisions are not necessarily grade based, but will also take into account the effort and dedication on the part of the student to succeed in the course. All final decisions regarding dropping a course will be made by an administrator. If there are situations that arise outside of this school practice, please contact the school counselor to discuss options for support in the course(s) identified.

Adding A Course

Students may add a course in place of a free period or study hall during the first 2 weeks of a semester if space is available in the course. Students must consult with the teacher regarding make-up requirements for any missed content.

Dropping A Course

With instructor approval, students may withdraw from a course until four weeks of classes have been held in a semester. Please note in a full year course, students are only able to drop within the first four weeks of the first quarter. Students who drop a class after this time will receive a grade of "F" and have a failing grade included in their grade point average.

LEVEL CHANGES

On occasion, students may need to change the level of the class in which they are enrolled. In order to do so, students must:

- Initiate a level change discussion with their teacher,
- Demonstrate that they have completed all homework and sought additional help from the teacher or resource area staff member,
- Request that their teacher and parent/guardian(s) complete the course change form. After the teacher contacts the parents, the request will be forwarded to student services and administration for the approval process to begin.

Students must remain in class until the level change is made by the counselor. Level changes are dependent upon availability in the sections into which a student is leveling down.

Downward level changes will be allowed at any point in a semester if approved by instructor, administration, and the parent/guardian(s). The letter grade at the time of withdrawal from the class is the grade that accompanies the student to his/her new class.

SCHEDULING INFO

Auditing a Class

A student interested in taking a course for information or enrichment purposes only, may consider auditing the course provided compliance with the following:

- Student must obtain and complete an Audit Request Form from their counselor.
- There are seats available in the class.
- Student must request the audit within the first ten days of the semester.
- Student meets with and gains approval of the course instructor.
- Student and instructor have a written agreement about the requirements and expectations for the auditing student. As a general rule students who audit will be expected to meet attendance requirements, complete all assignments, take assessments, and participate in all class activities.
- Student can audit one course per semester.

**Note: When a class is audited, the student will not receive a grade or credit for the course. The audited class will be noted (AUD) on the student's high school transcript. Seniors must notify schools they have been accepted by; as auditing a class may jeopardize their acceptance status. As requirements vary among courses, students who are auditing a course need to meet with the instructor to discuss academic expectations regarding tests, labs, and projects. Students who are auditing a class are expected to meet the same behavioral and attendance requirements as students receiving credit. Failure to meet the above expectations may result in the removal of a student's auditing status.*

REPEATING HIGH SCHOOL COURSES

It shall be the policy of the District that any enrolled full-time High school student be afforded the opportunity to retake courses, in accordance with the following:

- Any student has the opportunity to retake the same course. For courses offered on an annual basis, no more than three semesters may elapse between the time the course is first taken and subsequently retaken.
- The request to retake must be in writing to the building principal designee. Approval is required prior to retaking the course.
- A student who is repeating a course will be issued the grade of the most recent course. The student's GPA and grade transcript will be altered to reflect the newly attained grade. Only the most recent course and grade will be shown on the transcript.
- A student who wishes to enroll in a course for the purpose of retaking the course must follow the established course scheduling practices of the school.

Did you know?

The School District of New Berlin has a student handbook that lists practices on grading, weighted grades, honor roll, and other important information for your Academic and Career Planning Process.

CLICK HERE TO ACCESS:

<http://www.nbexcellence.org/parents/secondary-handbook.cfm>

The Academic and Career Planning Process will inform the transition plan for students in special education and will inform Individual Goal Plans for Gifted students at the secondary level.

SCHEDULING INSTRUCTIONS

Course Request Procedure:

1. Login to your Infinite Campus student or parent portal online.
2. In the left column, click the 'More' link and then Course Registration.
3. If you have more than one student in the district, you will need to select a student from the upper right corner to begin.
4. Click the school name under Course Registration Enrollments.
5. To see all courses, simply click Add Course.
6. To narrow down the list, enter the course number (example: 05501) in the search box. Additional information can be obtained by clicking on the course itself.
7. To select the course click the + and then Request.
8. To select alternate courses, click Alternate. Students are asked to choose alternatives that are the equivalent of 2 credits.
9. We recommend you request a minimum of seven (7) credits with two (2) credits of alternative course choices.

Other Important Information:

- Courses may be run using a variety of instructional delivery models, including but not limited to blended learning, online learning, or face-to-face, in large or small group settings, each of which will be used to personalize the learning options available to our students. These will be determined based on various factors (ie. student enrollment, availability of licensed staff, budget, and external partnerships).
- **Teacher Recommendation:** This practice takes place when a course has a specific criteria as a pre-requisite for participation. In this case the course will be assigned to the student and may only be changed by the counselor. Elective courses, in which there is a pre-requisite, will be reviewed by the counseling staff to ensure that all students meet the enrollment criteria.
- **Suggested courses:** Many times there are differing levels of a specific course. In this case an instructor will suggest the appropriate course/level based upon their knowledge of the student. These suggestions will be shared at the onset of the scheduling process. In these instances, the student will have the choice to accept the suggestion of the instructor or to make his/her own determination of level or course choice.
- If you would like to make a change once you have selected the Requested Courses and/or Alternate Courses: click on the course and select Drop This Request.
- To print a copy for your records, select Print Request Summary located in the top menu.
- While the School District of New Berlin would like to offer every elective offering in this guide, there are factors that impact the courses that actually run each year, such as student choice and school enrollment. Students, please keep in mind alternative choices when registering. Additionally, courses may run at one secondary site and not the other, but students from both sites can enroll in the course. Transportation may be offered.
- Any course fees listed are based on the previous years' fees. Changes in fees may occur prior to the start of the next school year.

CAREER & SERVICE BASED LEARNING

7th & 8th GRADE CORE REQUIREMENTS

ENGLISH LANGUAGE ARTS

C2: CAREERS & COMMUNICATIONS 7 01101

*Required for all students in 7th grade.
A/B Schedule opposite Physical Education*

In this course, students will acquire communication, reading, writing, and technology skills and concepts necessary for success in middle and high school. Students will also learn how to develop effective presentations and reports that can be used in their other courses using Google applications. Exploration of Xello to develop an Academic and Career Plan will be emphasized. Students will evaluate and use outside resources for their presentations and reports.

ENGLISH 7 01710

Seventh grade English Language Arts is a course that focuses on refining the foundations of the English language through literature, writing, grammar, vocabulary, speaking, and listening. Six comprehensive thematic units of study focus on various reading strategies. In addition to rigorous literature study, there is also a focus on development of vocabulary using context clues, Greek and Latin roots, prefixes, and suffixes. Students will develop their writing through the district-defined writing process, with a mastery of claim and evidence and exposure to analysis in writing and literature. This involves pre-writing, drafting, revising, and editing to produce writing that is thoughtful and accurate. The writing focus is primarily academic and analytic. During the seventh-grade year, students will engage in a variety of learning activities, including large and small group work, presentations, project-based learning, and public speaking.

ENGLISH 7-HONORS 01711

Seventh grade Honors English Language Arts is a course that requires higher-level analytical thinking and application with more independent work than a regular Seventh Grade English Language Arts course.

ENGLISH 8 01810

Eighth grade English Language Arts is a course that builds on its predecessor with the continued refining of English language: literature, writing, grammar, vocabulary, speaking, and listening. The year is comprised of six comprehensive thematic units of study focusing on the continued development of reading strategies and vocabulary skills as well as Greek and Latin roots and affixes. The language arts and writing portion of the class is a fundamental step in the preparation for high school writing expectations with

the mastery of claim, evidence and analysis. During the year, eighth-grade students will work in varied collaborative groups in order to build both skill level and a cooperative culture.

ENGLISH 8-HONORS 01811

Eighth grade Honors English Language Arts is a course that requires higher-level analytical thinking and application with more independent work than a regular Eighth Grade English Language Arts course.

SCIENCE

SCIENCE 7 04710

New Berlin utilizes FOSS (Full Option Science System) for our science curriculum. The FOSS Program bridges research and practice by providing tools and strategies to engage students and teachers in enduring experiences that lead to deeper understanding of the natural and designed worlds. Grade seven science begins with an introduction to lab skills, including measurement, the metric system and scientific method. Students will apply the scientific method and other problem solving strategies as they participate in a variety of activities that allow them to explore the world of science. In life science, students will examine populations and ecosystems. In physical science, students will investigate characteristics of chemistry. The Earth science unit will explore Earth's history. Students will also be engaged in digital data collection using a program called Vernier. Vernier digital data collection equipment can be hooked up directly to the students chromebooks, the data will then be analyzed and discussed.

SCIENCE 8 04810

Grade eight science students will begin the year with a review of measurement, the metric system and the scientific method using inquiry based labs. FOSS life science units include heredity and adaptations along with human system interactions. The FOSS Earth science unit is planetary science. FOSS physical science curriculum includes units on waves along with gravity and kinetic energy. Students will also be engaged in digital data collection using a program called Vernier. Vernier digital data collection equipment can be hooked up directly to the students chromebooks, the data will then be analyzed and discussed.

CAREER & SERVICE BASED LEARNING

SCIENCE 8-HONORS 04811

Eighth grade Honors science is a course that requires higher-level analytical thinking and application and more independent work than a regular 8th grade science course. Additional equation work and mathematical computations are integrated throughout the year. Eighth grade Honors science students will begin the year with a review of measurement, the metric system and the scientific method using inquiry based labs. FOSS life science units include heredity and adaptations along with human system interactions. The FOSS earth science unit is planetary science. FOSS physical science curriculum includes units on waves along with gravity and kinetic energy. Eighth grade Honors will include additional project based learning approaches to the material above. Additional analytical, creative approaches to learning are explored as well as more challenging Vernier data collection integrated throughout units.

SOCIAL STUDIES

SOCIAL STUDIES 7 02710

Students will develop their knowledge of the five themes of geography (location, place, region, human-environment interaction, and movement) and mapping skills to understand how physical, historical, political, economic, and cultural conditions contribute to the uniqueness of the world. Students will also work to gain an understanding of how these different regions compare and contrast to the United States. Current events will be presented in order to assist in the understanding of geographic themes.

SOCIAL STUDIES 8 02810

Students will develop knowledge of United States history from early Native American migration through Reconstruction. Students will understand how our historical, cultural, political, and economic issues contributed to the uniqueness of the United States. Students will be able to compare and contrast historical events with contemporary issues.

MATHEMATICS

The middle school math program is designed to build the foundation for high school math requirements. The program consists of Math 7, Math 7b/8, Math 8, Algebra, and Geometry. Students have access to Algebra or beyond based on completion of Math 7b/8, Math 8, or, if accelerated, on assessment and performance data. Students who enroll in high school level math courses can earn high school math credit. The semester grades, however, will not be factored into a student's future high school GPA. Students in 7th grade should sign up for the next

course in their mathematical progression (ex. If in 6th grade math, sign up for Math 7). Students who are earning below a B- in Math 6/7a are encouraged to take Math 7.

MATH 7 03480

Students will explore all standards within the 7th grade Wisconsin Standards for Mathematics. The course develops an understanding of operations with rational numbers and an understanding and application of proportional relationships. Students will generate equivalent expressions and solve problems using linear equations and inequalities. Students will also gain an understanding of geometric relationships and solve problems involving angles, surface area, and volume. Students will analyze and compare populations and find probabilities of events.

MATH 8 * 03485

Students will explore all standards within the 8th grade Wisconsin Standards for Mathematics. The course develops an understanding of operations with real numbers, and allows further exploration of proportional relationships. Formulating, modeling, and reasoning about expressions and equations leads into an introduction of functions used to describe relationships. Students will work with and analyze two- and three-dimensional shapes to find area, volume, surface area, distance, similarity, and congruence, and use samples to draw inferences about populations.

MATH 7b/8 03491

PREREQUISITE: Successful completion of Math 6/7a in 6th grade OR Math 7a over the summer

Students will explore half the standards of 7th grade and all the standards of 8th grade within the Wisconsin Standards for Mathematics at an accelerated pace. This course develops an understanding of operations with rational numbers and continues to expand students' depth of knowledge of integers and exponents. Formulating, modeling, and reasoning about expressions and equations leads into an introduction of functions used to describe relationships. Students will work with and analyze two- and three-dimensional shapes to find area, volume, surface area, distance, similarity, and samples to draw inferences about populations. Due to the fast pace of instruction in Math 7b/8, there are fewer repetitions of concepts before mastery. *The School District of New Berlin reserves the right to remove a student from this course if his/her assessment and classroom performance data indicate the need for a different mathematics course or pace.*

★: College Level Courses

*: Offered in Summer too

CAREER & SERVICE BASED LEARNING

ALGEBRA I *

03236

CREDIT:

1.0

PREREQUISITE:

Math 8 or Math 7/8

Core Connections Algebra aims to deepen and extend student understanding built in previous courses through development of fluency with solving linear equations, inequalities, and systems. Students will extend their skills to solve quadratic and exponential functions. This course will have students explore various representations of functions, including sequences. Students will use regression techniques to analyze the fit of models to distributions of data.

SUPPLIES: Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C), graph paper, loose leaf paper, ruler.

GEOMETRY *

03242

CREDIT:

1.0

PREREQUISITE:

Algebra I

Core Connections Geometry aims to formalize and extend the geometry that students have learned in previous courses. Students will establish triangle congruence criteria using rigid motions, formal constructions, and the language of set theory to compute and interpret probabilities for compound events. This course will build a formal understanding of similarity based on dilations and proportional reasoning. Students will develop concepts of formal proof, including basic circle theorems. In this course, students will explore the properties of two- and three- dimensional objects and work with the rectangular coordinate system to verify geometric relationships.

SUPPLIES: Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C), ruler, protractor, compass, graph paper, tracing paper, scissors, colored pencils/pens, 3 x 5 notecards.

MATH SUPPORT

This class is designed to provide intervention in targeted mathematics skills. Students are placed into this course, which counts towards elective credit (.5 credit for one semester), through a SST referral process.

HEALTH

HEALTH *

CREDIT:

.5

GRADE LEVEL:

8

A/B Schedule opposite Physical Education

This course covers aspects of mental, emotional, social, environmental, spiritual and physical health. Emphasis is placed on knowledge, life skills, and critical thinking skills for development of attitudes, understanding, and practice of a preventive lifestyle for healthy living and optimal wellness. The class includes, but is not limited to the following topics:

stress management, psychological and physiological health, nutrition, disease prevention, alcohol and other drug prevention, body systems, human sexuality, violence prevention and CPR/First Aid and AED usage. These topics will assist students in obtaining accurate information, developing lifelong positive attitudes and behaviors, along with making wise decisions related to their personal health.

Health education is offered to students in grades eight through twelve. Students who transfer to New Berlin may provide documentation from their previous school of completing the required health curriculum. The documentation and course credit is subject to approval and acceptance of the curriculum by the school administration. Students may receive credit towards graduation but the grade earned will not factor into their high school grade point average.

Students completing Health as an 8th grade student will receive credit towards graduation but the grade will not calculate into the high school grade point average.

Students currently in grade 7 may take Health during the Summer Learning Opportunities program. A student who takes Health during the summer before 8th grade will have a study hall opposite Physical Education during the school year. Students cannot take a second study hall in 8th grade.

PHYSICAL EDUCATION

PHYSICAL EDUCATION (A/B DAY SCHEDULE)

Grade 7: A/B Opposite C2

05700

Grade 8: A/B Opposite Health

05800

The Middle School Physical Education course provides each student with a comprehensive program consisting of skill development, team sports, individual sports, and life-long strength training and physical fitness activities. Emphasis will be placed on physical skills, knowledge of rules, application of strategies associated with the different sports, strength training concepts, and various health and skill related fitness activities in order to instill a desire and enable safe, satisfying participation in health-enhancing lifelong activities. The program promotes lifelong fitness training skills, teamwork, leadership, fair play, friendly competition, and personal accountability.

SUPPLIES: Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock.

ART

ART 7 08017

COURSE FEE:

A course fee up to \$20 may be charged.

Seventh grade art focuses on 21st Century Skills through the foundation of all art studies. Students will be able to use 21st Century Skills to problem solve, work collaboratively, critique, gain an awareness of the global environment, and develop visual literacy through creating their own projects. Art projects may include: drawing, design layout, printmaking, pastels, paper maché, sculpture, ceramics, fibers, metals, watercolor and acrylic painting.

ART 8 SEMESTER 08008

ART 8 YEAR LONG 08018

COURSE FEE:

A course fee up to \$20 may be charged.

Eighth grade art further develops the 21st Century Skills acquired in 7th Grade using new concepts, techniques, methods, and materials. Some projects in this course may include, drawing, pastels, design, printmaking, ceramics, fibers, watercolor and acrylic painting, sculpture, and art metals. Students will continue improving skills and form the basic foundation for future specialization in high school courses. While an enrollment in 7th Grade Art is helpful, it is not required.

COMPUTERS

EXPLORING COMPUTER SCIENCE 03963

CREDIT: .5
GRADE LEVEL: 8, 9, 10

Exploring Computer Science is designed to introduce students to the breadth of the field of computer science through an exploration of engaging and accessible topics. Students will be given the opportunity to work at their own pace as well as collaborate in groups where they can learn from each other to gain an overview of the many varied ways in which computers and computing are used. Topics that will be explored include human computer interaction, problem solving, web design, computer programming, data analysis, and robotics. This course will help students develop the computational practices of algorithm development, problem solving, and programming within the context of issues that are relevant to our lives today.

SUPPLIES: Folder or binder, notebook and writing utensil.

TECHKNOW MIDDLE SCHOOL 07150

Year-long course only

PREREQUISITE: Approval of the Program Coordinator; Completion of the application process.

TechKNOW is a student-centered technology support program designed to help students develop the skills necessary to provide high-quality technology support in an enterprise environment. This program is available to students in grades 7-8 with an interest in technology.

Students will provide support for hardware and applications, assist with finding technology-based solutions and utilize both existing and emerging technologies to solve problems for students and staff. Staff from the SDNB Technology Department will provide the training required to perform these duties.

ELECTIVE WHEEL:

7th GRADE

7TH GRADE ELECTIVE WHEEL 77777

Year-long course only

COURSE FEE:

A course fee up to \$20 may be charged.

The 7th Grade Elective Wheel provides students with a project-based, hands-on opportunity to explore additional coursework that focuses on technical offerings. These course offerings include a semester of PLTW Gateway: Engineering & Design and a quarter each of Graphic Production and Computer Science. Completing the 7th Grade Elective Wheel could lead to additional Project Lead The Way, Graphic Production, and/or Computer Science courses in 8th grade and in high school.

PROJECT LEAD THE WAY (PLTW) GATEWAY

Project Lead The Way (PLTW) Gateway is a middle school program designed to help students explore math, science, and technology as problem solving tools. By engaging in hands-on, real-world projects, students understand how the skills they are learning can be applied in everyday life. Students will work cooperatively as a class or in small groups as they integrate mathematics, science, technology, and english language arts skills to solve complex problems. PLTW Gateway also helps students develop and hone skills that enable them to enter the Project Lead The Way high school program with foundational knowledge and skills essential to success in pre-engineering.

CAREER & SERVICE BASED LEARNING

Students who enroll in PLTW Gateway must meet the following expectations:

- Actively participate in learning experiences while meeting the expectations of each experience in a responsible manner.
- Apply and develop academic skills necessary for successful completion of learning experiences. Students will be expected to apply skills related to Algebra I and be able to describe learning activities in writing.
- Work cooperatively and productively with other students to meet the goals of each learning experience.

PLTW GATEWAY: ENGINEERING & DESIGN 07488

SEMESTER COURSE

GRADE LEVEL

8

PREREQUISITE:

None

COURSE FEE:

A course fee up to \$20 may be charged.

Students will, through hands on learning activities, investigate topics within the Project Lead the Way (PLTW) Design and Modeling unit and the PLTW Science of Technology unit. In the Design and Modeling unit, students discover the design process and develop an understanding of the influence of creativity and innovation in their lives. In the Science of Technology unit, students explore how physics and chemistry impacts the technology of yesterday, today, and the future. The STEM activities and projects in Engineering and Design may include, but are not limited to: 3D - computer modeling, building prototypes, creating puzzles, designing toys, constructing paper roller coasters, and engineering dragsters.

May be taken in 7th grade as part of the Elective Wheel.

PLTW GATEWAY: ELECTRICITY & ROBOTICS 07498

SEMESTER COURSE

GRADE LEVEL

8

PREREQUISITE:

PLTW Gateway: Engineering & Design or the 7th Grade Wheel

COURSE FEE:

A course fee up to \$20 may be charged.

Students will study, through hands on learning activities, topics within the PLTW Gateway Magic of Electrons unit and Automation and Robotics unit. In Magic of Electrons students will explore electricity, movement of atoms, circuit design, and sensing devices. In Automation and Robotics students will design and build automated systems incorporating principles of electronics, physics, and robotics. STEM

Projects will include, but are not limited to, creating a DC motor/generator, circuit building, and building and programming VEX robots.

PLTW GATEWAY: GREEN ARCHITECTURE 07478

SEMESTER COURSE

GRADE LEVEL

8

PREREQUISITE:

PLTW Gateway: Engineering & Design or the 7th Grade Wheel

COURSE FEE:

A course fee up to \$20 may be charged.

Students will, through hands on learning activities, investigate topics within the PLTW Gateway Energy and the Environment unit and Green Architecture unit. In the Energy and the Environment unit students will explore sustainable solutions to our energy needs and investigate the impact of energy on our lives and the world. In the Green Architecture unit students will explore the science behind affordable housing design and use their knowledge to design and model structures in 3D architectural software. STEM Projects include, but are not limited to: designing a container home, building architectural models, and 3D computer modeling with Autodesk Revit.

PLTW GATEWAY: FLIGHT & SPACE 07496

SEMESTER COURSE

GRADE LEVEL

8

PREREQUISITE: *PLTW Gateway: Engineering & Design or the 7th Grade Wheel*

COURSE FEE:

A course fee up to \$20 may be charged.

Flight & Space is one of the specialization units for Project Lead the Way's (PLTW) Gateway program. The Flight and Space module brings aerospace alive and gives students an opportunity to explore the technology and careers fields of aerospace engineering. Students explore the science and engineering behind aeronautics and apply their knowledge to design, build, and test hot air balloons, gliders, and rockets! Students will also explore what is required to travel, live and work in space. This course will stress students working together cooperatively, using information, resources, tools, equipment, and computers to design, engineer, test, and build. Emphasis will be placed on creativity and problem solving with aerospace related topics!

CAREER & SERVICE BASED LEARNING

GRAPHIC PRODUCTION I

07481

CREDIT:

.5

GRADE LEVEL

8

COURSE FEE:

A course fee up to \$20 may be charged.

Students will be introduced to the graphic arts and printing industries. Students will create projects such as screen printed t-shirts, vinyl stickers, notepads, and more! They will learn to use the Adobe Creative Cloud applications including Photoshop, Illustrator and Indesign. This class is an asset for students interested in printing and publishing, journalism, art, graphic design, and marketing. Eighth grade students can take for high school credit (GPA is not factored in high school GPA but the grade will be listed on the high school transcript).

SUPPLIES: Eisenhower concert attire is black on bottom, white on top, black dress shoes. West concert attire is white and/or black dresses, or dress pants or skirts with formal shirts/blouses, black closed-toe dress shoes. A pencil and water bottle is also needed for West.

ORCHESTRA 7

08527

PREREQUISITE: Participation in elementary orchestra or private lessons and audition with instructor.

**1st year students should contact instructor prior to summer for information on how to prepare for joining orchestra.*

RENTAL FEE: A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.

Seventh grade orchestra is a performance-based class with intensive work on both ensemble and individual playing. Students will continue to develop performance skills, build their understanding of music theory and learn to analyze music performance. Students will be exposed to cultural integration and historical contexts through music. Students will be required to participate in performance opportunities such as school concerts, community performances and solo/ensemble festival. Small group lessons are a requirement of this course.

SUPPLIES: Essential Elements 2000 (book 2), Essential Technique 2000 (book 3), binder, instrument.

MUSIC

BAND 7

08517

PREREQUISITE: Participation in elementary beginning band, private lessons, or consent of director.

**1st year students should contact instructor prior to summer for information on how to prepare for joining band.*

RENTAL FEE: A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.

Seventh grade band is designed to extend the experiences of our district's beginning band students. The class concentrates on the fundamentals of making music with wind and percussion instruments. Students perform at concerts and public performances throughout the year. 7th grade band students participate in solo/ensemble festival for the first time. All band members are also invited to play in an extra-curricular jazz ensemble that rehearses once a week outside the school day. Students are required to perform in all scheduled performances. Small group lessons are a requirement of this course.

SUPPLIES: Instrument, Essential Elements Books 1 & 2, New Berlin West concert attire is black on bottom, white long sleeve shirt on top, black dress shoes. Eisenhower concert attire is all black.

BAND 8

08518

PREREQUISITE: Participation in 7th Grade Concert Band, private lessons, or consent of director.

RENTAL FEE: A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.

Eighth grade band is a group that serves two main purposes: to extend and expand the musical experiences of our middle school band students and to prepare them for participation in the high school band program. The group prepares music of a more sophisticated nature and students are involved in the process of making music at a more mature level. Solo/ensemble and the middle school jazz ensemble experiences are more challenging this year as the students begin the process of learning how to prepare for membership in the high school band. Students are required to perform in all scheduled performances. Small group lessons are a requirement of this course.

SUPPLIES: Instrument, Essential Elements Books 2 & 3, New Berlin West concert attire is black on bottom, white long sleeve shirt on top, black dress shoes. Eisenhower concert attire is all black.

CHOIR 7

08512

Middle School Choir deals with the maturing and changing adolescent voice. Students will learn good vocal habits and basic choral techniques, basic music theory and ear-training, while exploring various styles of choral music. Students are given opportunities to increase self-confidence through required evening concerts and optional solo/ensemble festival. Attendance at all concerts is required. Small group lessons are a requirement of this course.

WORLD LANGUAGES

FRENCH I

06110

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12

Bienvenue à la classe de français I! Welcome to French I! This French course is designed to introduce students to the French language and culture of the French speaking world and France. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication. By the end of French I, students will be able to accurately communicate a message to an audience, participate in a short conversation about personal interests, understand spoken language on familiar topics, and comprehend the main idea and supporting details of short, authentic materials. In addition, students will

show mastery of the present tense to communicate in the present and the near future. Allons-y!

FRENCH II

06111

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12

PREREQUISITE: *Proficiency of previous level of language determined by teacher*

Bienvenue à la classe de français II! Welcome to French II! This year, as students continue to develop their communication skills, they will study the culture and countries of French speaking Africa. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication. By the end of French II, students will be able to make comparisons, write and speak in the present and past, use commands to direct a peer, and comprehend the main idea and supporting details of short, authentic materials. Inscrivez-vous vite!

SPANISH I

06310

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12

¡Bienvenidos a la clase de español I! Welcome to Spanish I! This Spanish course is designed to introduce students to the Spanish language and culture of Hispanics in the United States and Puerto Rico. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication. By the end of Spanish I, students will be able to accurately communicate a message to an audience, participate in a short conversation about personal interests, understand spoken language on familiar topics, and comprehend the main idea and supporting details of short, authentic materials. Students will show mastery of the present tense to communicate in the present, near future, and recent past. ¡Vámonos!

SPANISH II

06311

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12

PREREQUISITE: *Proficiency of previous level of language determined by teacher*

¡Bienvenidos a la clase de español II! Welcome to Spanish II! This year students will study the culture of Costa Rica and continue to develop skills for communicating in Spanish. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication. By the end of Spanish II, students will be able to make comparisons, narrate a story in the present and past, and use commands to direct a peer. ¡Pura vida!

SPANISH FOR HERITAGE SPEAKERS (NEW COURSE)

06321

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12

PREREQUISITE: *Prior exposure to the Spanish language in the home*

In this course, students with a Spanish language heritage will be able to practice and improve their Spanish communication skills, with an emphasis on developing a more formal register. This course is recommended for students who speak and hear the language at home but who may not have had the opportunity to practice reading and writing in formal Spanish. This class will be conducted entirely in Spanish.

En esta clase, estudiantes con una herencia de hablar español pueden practicar y mejorar su lenguaje formal a través de los cuatro modos de comunicación. Se recomienda la clase para los estudiantes que tienen una base de español y quieren aumentar su habilidad de escuchar y hablar el idioma con un nivel de lectura y escritura académica. La clase se dirige totalmente en español.

SUPPLIES: *Notebook or paper, 3-ring binder (1.4-2”), 5 tab dividers, pen/pencil, headphones/earbuds, SDNB Chromebook*

MANDARIN CHINESE I (ONLINE FORMAT)

06510

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12

Ni Hao! Huan Ying! Welcome to Mandarin I! This online Mandarin course is designed to introduce students to the Mandarin language and Chinese culture. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication.

MANDARIN CHINESE II (ONLINE FORMAT)

06511

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12

PREREQUISITE: *Proficiency of previous level of language determined by teacher*

Ni Hao! Welcome to Mandarin II! This online Mandarin course is designed to introduce students to the Mandarin language and Chinese culture. Students will study and practice the language via the presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading) modes of communication.

LATIN I (ONLINE FORMAT)

06610

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12
PREREQUISITE: None

This course is designed to introduce students to the language and culture of the Ancient Romans. The western world is indebted to the culture and language of the Romans and students in this course will expand their knowledge of English and western civilization through the study of the Latin language. By the end of Latin I, students can expect to communicate in all tenses by writing complex sentences and have an understanding of Roman family customs, religion, government, architecture, and history.

LATIN II (ONLINE FORMAT)

06611

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12
PREREQUISITE: *Latin I*

Salvete, discipuli et discipulae! Greetings, students! Welcome to Latin II. This course is designed to build upon the knowledge that students gained in Latin I as they further explore the world of the Ancient Romans. The western world is indebted to the culture and language of the Romans and students in this course will expand their knowledge of English and western civilization through the study of the Latin language. By the end of Latin II, students can expect to communicate in all tenses, voices, and moods of verbs by writing complex sentences and have a greater understanding of Roman family customs, specifically education, coming of age, and marriage.

BUSINESS

INTRODUCTION TO BUSINESS

07104

CREDIT: .5
GRADE LEVEL: 8, 9, 10

In this exploratory business course, students will be provided with a hands-on project and design-based curriculum that will introduce basic business concepts needed to be successful in the business industry. Students will continue to build upon communication, reading, writing and technology skills with an emphasis on the business environment. Completing this course will give students basic knowledge in accounting, types of business, ethics, marketing, and technology that prepares students for future business and marketing courses provided at the high school level.

■ NOT NCAA Approved

<p>ENGLISH 9 <i>FOUNDATIONAL COURSE</i> CREDIT: 1.0 GRADE LEVEL: 9</p> <p>Ninth grade English Language Arts is a course that builds on its predecessor with the continued refining of the English language through literature, writing, grammar, vocabulary, speaking, and listening. The ninth-grade course is an overview of literature across the major forms and genres: short story, novel, poetry, drama, epic poetry, and literary nonfiction. Each unit focuses on a specific thematic question. Within each unit, students will continue to develop reading strategies and vocabulary skills. Students will analyze the literature they are reading through discussion and writing. Students will develop their writing through the district-defined writing process, with a mastery of claim, evidence and reasoning in relation to a well-developed thesis. This involves pre-writing, drafting, revising, and editing to produce writing that is thoughtful and accurate. Though the writing focus is primarily analytic, students will also write creative-ly in English 9.</p>	<p>ENGLISH 9-HONORS <i>FOUNDATIONAL COURSE</i> CREDIT: 1.0 GRADE LEVEL: 9</p> <p>English 9 Honors is for students who are committed to challenging their reading and writing skills. The honors level offers the English 9 curriculum (short, novel, poetry, drama, epic poetry, and literary nonfiction) with an increased level of written and oral analysis emphasizing style. It is expected that students will be able to read independently. Students who register for this course are proficient or advanced writers and readers who will continue to develop those skills.</p>
<p>ENGLISH 10 <i>FOUNDATIONAL COURSE</i> CREDIT: 1.0 GRADE LEVEL: 10 PREREQUISITE: English 9</p> <p>In tenth grade, students study world literature from a variety of regions, such as Russia, Asia, Africa, the Middle East, and/or Latin America. Students engage in close reading and other types of literary analysis.</p>	<p>ENGLISH 12 <i>FOUNDATIONAL COURSE</i> CREDIT: 1.0 GRADE LEVEL: 12 PREREQUISITE: English 11</p>

CAREER & SERVICE BASED LEARNING

ENGLISH

In order to understand the context of the literature, students will explore the cultural, historical, and philosophical background of each region. Students will analyze universal themes through collaborative and individual assignments. Students will continue to develop and improve their multi-paragraph writing skills using the district-defined writing process. Students will write a research paper.

ENGLISH 10-HONORS 01220

FOUNDATIONAL COURSE

CREDIT: 1.0
GRADE LEVEL: 10
PREREQUISITE: English 9

English 10 Honors is for students who are especially committed to becoming sophisticated writers, readers and thinkers. The honors level offers the English 10 curriculum with an increased level of analysis that emphasizes close reading, as well as a significant increased rigor of independent reading. Students who register for this course are proficient or advanced writers and readers and will continue to develop those skills.

ENGLISH 11 01030

FOUNDATIONAL COURSE

CREDIT: 1.0
GRADE LEVEL: 11
PREREQUISITE: English 10

The eleventh grade is devoted to a study of American literature from the colonial period to the late twentieth century. This thematic study will consist of a variety of fiction and nonfiction literature as well as drama, poetry and novel studies. Students focus on the thematic relationships while engaging in academic discussions, analysis, and furthering the development of semiole texts. Academic writing and the writing process, combined with various rhetorical analyses through the integration of multiple sources and perspectives, which will result in writing longer and more complex essays. Throughout the year students will make connections with history, art, and other subjects will integrating creativity, ACT skills and high order thinking skills.

AP LANGUAGE AND COMPOSITION ★ 01230

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE: English 10

AP English Language and Composition students engage in critical readings of primarily non-fiction prose written in a variety of historical periods, disciplines, and rhetorical contexts. The study of rhetoric will help students become more effective at analyzing language use. Students will write both on-demand and process pieces often and in a variety of forms – narrative, expository, and argumentative – and on a variety of subjects. As critical readers, students will analyze the interactions among the purpose, audience, and message of a text as well as the way rhetorical devices contribute to the style and meaning of the text. Students will also demonstrate and apply their knowledge of the writing process, rhetoric, and style in their own writing. **NOTE:** Summer homework may be required for this course.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP LITERATURE AND COMPOSITION ★ 01240

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE: English 10

AP English Literature is a year-long world literature course designed for seniors who are committed to becoming critical readers of complex texts. The course will provide a survey of world literature that focuses on fictional texts and poetry from the 16th to the 21st centuries. Students will engage in critical and close readings in order to analyze the texts through extensive discussion, writing, and rewriting. Frequent on-demand and process writing will focus primarily on literary analysis. They will consider not only the structure, style, and themes of texts, but also the social and historical issues surrounding the various pieces. AP English provides students with early exposure to college-level texts and questioning in order to become independent readers, writers, and thinkers. Successful students in the AP Literature and Composition course are those who are able to make and explain connections between what the text says explicitly and the larger point about human nature that the author is making.

Students enrolled in this course are expected to take

the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

UW-COLLEGES ENGLISH 102 ★ (ONLINE)

01266DE

SDNB CREDIT: .75
UW COLLEGES CREDIT: 3.0
GRADE LEVEL: 11, 12
PREREQUISITE: AP Language score of 3 or higher or ACT English score of 25 or higher.

English 102 is the core transfer-level composition course (2nd course of 2 required English courses) for the UW-System, and it fulfills the writing requirement for the UWC Associate Degree. In almost all cases, AP English Lit does not transfer as a replacement for English 102. Composition 2 emphasizes argumentation and scholarly, research-based writing. For most students, Composition 2 is a second semester class, and the learning outcomes for the course assume that students have already had a thorough introduction to academic reading and writing either through English 101 or an advanced, writing-intensive high school curriculum (usually including AP or IB courses). A composition course focusing on researched academic writing that presents information, ideas, and arguments. Emphasis will be on the writing process, critical thinking, and critical reading. This counts as an English credit.

ENGLISH 12 COMPOSITION

01439

CREDIT: .5
GRADE LEVEL: 12
PREREQUISITE: English 11 or AP Lang and Comp

This writing-focused course is perfect for students who are interested in developing and refining their written communication skills. One of the first skills students will focus on in this course is developing a strong thesis to ensure that writing done in the course and in the future will be substantive, logical, and clear. There is a heavy focus on continuous improvement through revision. Students enrolled in this course will also develop the skills necessary to be reflective in their response to constructive criticism from their teachers, peers, and self. Students will write in a variety of discourse including narrative, expository, persuasive, and business, with a heavy emphasis on developing effective research skills. During the research unit, students will learn what comprehensive research entails, including refining a research question, evaluating sources for credibility, and effectively using research to support an argument or claim. A student taking this course will become well-versed in the requirements of MLA and/

or APA style. Students can expect to strengthen their vocabulary, grammar, and sentence variety and flow as they revise and edit their work.

ENGLISH 12 EUROPEAN LITERATURE

01182

CREDIT: .5
GRADE LEVEL: 12
PREREQUISITE: English 11 or AP Lang and Comp
 Students enrolling in this course will develop strong writing, researching, and analytic skills as they explore literature from a variety of time periods and regions. Units are set up so that students can see how earlier works inform later works and evolve over time. Students will read a variety of work from early literature to modern times. Students may also connect how European Literature work impacted or relates to literature from outside of Europe.

ENGLISH 12 AMERICAN FILM: THE TWO-WAY MIRROR

01430

CREDIT: .5
GRADE LEVEL: 12
PREREQUISITE: English 11 or AP Lang and Comp
 Students enrolling in this course will develop strong writing, researching, and analytic skills as they explore American films as stand-alone artistic works and also as works that both reflect and shape American thought, behavior, attitudes, and social mores. *This course has not yet been approved by the NCAA.

ENGLISH 12 LITERATURE OF WAR

01432

CREDIT: .5
This course will be offered 2nd semester only
GRADE LEVEL: 12
PREREQUISITE: English 11 or AP Lang and Comp
 Students enrolling in this course will develop strong writing, researching, and analytic skills as they explore the historical context of literature of war and the resulting implications for understanding the human condition as presented by each author. Students will read and analyze a variety of college-level literary fiction and non-fiction in this course.

AP RESEARCH ★

01260

CREDIT: 1.0 of English
GRADE LEVEL: 10, 11, 12
 Students would take the second course in the AP Capstone experience to design, plan, and conduct a year-long research-based investigation on a topic of individual interest. Through this inquiry and investigation, students demonstrate the ability to apply scholarly understanding to real-world problems and issues. Students further the skills developed in AP

Seminar by understanding research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information to build, present, and defend an argument. Students may choose to

- Dig deeper into a topic studied in an AP course
- Work across academic areas with an interdisciplinary topic
- Study a new area of interest, perhaps one for further study at the college level

ASSESSMENT

At the end of the research investigation, students submit an academic thesis paper, present their thesis, and orally defend their work. The AP Research Exam score is based on the paper, presentation, and defense, and is reported on the standard 1–5 AP scoring scale.

Students enrolled in AP Seminar and Research are expected to take the Advanced Placement examination in early May and submit artifacts along the way. Any students who do not partake in this process forfeit the exam fee and AP weight. The approximate cost of the exam is \$142 each.

ENGLISH 12 POETRY AND CREATIVE WRITING WORKSHOP 01433

CREDIT: .5
GRADE LEVEL: 12
PREREQUISITE: *English 11 or AP Lang and Comp*

Students who take this class will develop skills to not only give effective, constructive feedback, but also to accept, reflect on, and utilize constructive feedback. During the first quarter, students will develop a strong sense of how words relate to each other and influence understanding, as they refine a poetry portfolio of original poems focused on a single theme, written in a variety of specified styles and forms. During the second quarter of this class, students will develop a strong sense of story structure as they work on perfecting an original short story through a college-level workshop model. It is a requirement of this course that students share their writing.

ENGLISH 12 JOURNALISM IV 01438

Please see course description under ELECTIVES.

SPEECH 01600

FOUNDATIONAL COURSE
CREDIT: .5
GRADE LEVEL: 10, 11, 12
RECOMMENDED: Grade 10

Speech is a course in which students will recognize and apply the characteristics of effective communication and collaboration. Specific skills practiced and assessed include speaking and listening skills in one-to-one, group, mass, and public communication. The students will also develop a favorable attitude towards the speaking experience through study and presentation of a variety of speech communication projects including interviews, meetings, panels, various types of public speeches, electronic communication, and media.

ORAL/INTERPERSONAL COMMUNICATION 01440

(THIS COURSE WILL NOT BE OFFERED IN 2023-24 but will be available through WCTC Start College Now program online or in-person at WCTC. This course meets the .5 Speech graduation requirement.)

SDNB CREDIT: .5
WCTC TRANSCRIPTED CREDIT AVAILABLE: 3.0
GRADE LEVEL: 11, 12
PREREQUISITE: *Can be taken concurrently or after English 11*

Students who are interested in attending a technical college may want to take this course if it is part of their program of study. Students will practice the necessary skills for effective speech delivery, listening, assertiveness, conflict resolution, teamwork and general interpersonal communication. *This course has not yet been approved by the NCAA.

SUPPLIES FOR ALL ENGLISH COURSES: On a daily basis, students will need writing utensils and dedicated supplies for taking notes and organizing handouts.

ELECTIVES

These courses do not satisfy an English requirement.

JOURNALISM I 01435 JOURNALISM II 01436 JOURNALISM III 01437 JOURNALISM IV 01438

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
JOURNALISM IV PREREQUISITE:

If taken as Senior English Credit, there is a prerequisite of having taken a previous journalism course,

CAREER & SERVICE BASED LEARNING

ENGLISH

AND English 11 or AP Language and Composition, AND an expectation that the student will serve as an editor.

Students will learn the basics of journalism, news writing, reporting, interviewing, and other basic aspects of journalism in the 21st century. They will also publish a student newspaper. Students will be responsible to write, edit, and lay out the newspaper. Students in Journalism II, III, or IV will be eligible to be editors; however, to earn an English credit for 12th grade, a student must be an editor. *None of the Journalism courses are approved NCAA courses.

CREATIVE WRITING 01545

CREDIT: .5
GRADE LEVEL: 9, 10
PREREQUISITE: *English 8 or English 8 honors*
 This course will foster the development of skills through writing workshop: communication, creative thinking, problem-solving, real-world inquiry research, and flexibility throughout the writing process.
**Note: Does not replace English 9 or 10*

DIGITAL MEDIA PRODUCTION I (FORMERLY VIDEO PRODUCTION I) 01903

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
 The course is designed to introduce students to concepts related to digital media (including but not limited to: videos, podcasts, social media, vlogs, websites, etc.). This class will emphasize the creation, production, and distribution of various digital products using various programs, apps, and websites. Through hands-on experience, the student will develop competency in the basics of videography, editing, and publishing. This course is a prerequisite for Digital Media Production II (Formerly Video Production II).

DIGITAL MEDIA PRODUCTION II (FORMERLY VIDEO PRODUCTION II) 01904

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Digital Media Production I (Formerly Video Production I)*
 In Digital Media Production II, students build on concepts learned in Digital Media Production I (Formerly Video Production I) and will further develop students' skills with digital and video communication. The course is designed to allow students to experience the entire process of pre-production, production, and post-production and to be exposed to more advanced filming and editing techniques. Throughout this course, students produce projects including but not limited to: short films, documentaries, professional

interviews, live and prerecorded event coverage, newscasts, public service announcements, and other student passion projects. Students can have the opportunity to become Adobe certified.

ACADEMIC DECATHLON 09499

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: None
 Academic Decathlon is a class designed to help students prepare for a statewide interscholastic academic competition. The specific curricular topic to be covered each year is established by the national Academic Decathlon office. Though the thematic focus of the course changes yearly, the core subjects that students will study are as follows: Economics, Fine Arts, Language Arts/Literature, Mathematics, Science and Music. In studying these areas, the students will be reading, writing, researching, and reporting their findings to the class in an effort to learn the material, convey it clearly to others, and ultimately excel at the local, regional and state competitions. Delivering speeches, formal interviewing, and essay writing are also part of the competition, and are, therefore, an integral part of the class curriculum. Students may take the Academic Decathlon class more than once for an elective credit. As with any course, this course needs a minimum number of students to run.

ENGLISH LANGUAGE ARTS SUPPORT

Students are placed into the following courses, which count towards elective credit (.5 credit for one semester).

READING SUPPORT: This class is designed to provide intervention in targeted reading skills.

WRITING SUPPORT: This class is designed to provide intervention in targeted writing skills.

HEALTH

Graduation Requirements: .5 Credits (8–12th Grade)

HEALTH * 05600

CREDIT: .5

GRADE LEVEL: 8, 9, 10, 11, 12

This course covers aspects of mental, emotional, social, environmental, spiritual and physical health. Emphasis is placed on knowledge, life skills, and critical thinking skills for development of attitudes, understanding, and practice of a preventive lifestyle for healthy living and optimal wellness. The class includes, but is not limited to the following topics: stress management, psychological and physiological health, nutrition, disease prevention, alcohol and other drug prevention, body systems, human sexuality, violence prevention and CPR/First Aid and AED usage. These topics will assist students in obtaining accurate information, developing lifelong positive attitudes and behaviors, along with making wise decisions related to their personal health.

Health is a course offered to New Berlin students in grades eight through twelve. Students who come from a private school and are able to provide documentation of completing the health curriculum will receive credit, but the grade will not factor into their grade point calculations at the high school level. This documentation and course approval is subject to the approval and acceptance of the curriculum by the school administration. Enrolled students who complete Health as an 8th grade student will also count the Health credit toward graduation requirements.

This course satisfies the State Requirement of .5 credit for health education during grades 8–12.

MATH

Graduation Requirements: 3.0 Credits (Algebra I and two credits beyond)

COURSE SELECTION FLOW CHART

ALGEBRA I * 03236

FOUNDATIONAL COURSE

CREDIT: 1.0

PREREQUISITE:

Math 7b/8, Math 8, or teacher recommendation

Core Connections Algebra aims to deepen and extend student understanding built in previous courses through development of fluency with solving linear equations, inequalities, and systems. Students will extend their skills to solve quadratic and exponential functions. This course will have students explore various representations of functions, including sequences. Students will use regression techniques to analyze the fit of models to distributions of data.

SUPPLIES: Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C), graph paper, loose leaf paper, ruler.

GEOMETRY * 03242

FOUNDATIONAL COURSE

CREDIT: 1.0

PREREQUISITE:

Algebra I
Geometry and Algebra II can be taken concurrently with a grade of a B- or higher in Algebra I

Core Connections Geometry aims to formalize and extend the geometry that students have learned in previous courses. Students will establish triangle congruence criteria using rigid motions, formal constructions, and the language of set theory to compute and interpret probabilities for compound events. This course will build a formal understanding of similarity based on dilations and proportional reasoning. Students will develop concepts of formal proof, including basic circle theorems. In this course, students will explore the properties of two- and three- dimensional objects and work with the rectangular coordinate system to verify geometric relationships.

Students will develop concepts of formal proof, including basic circle theorems. In this course, students will explore the properties of two- and three- dimensional objects and work with the rectangular coordinate system to verify geometric relationships.

SUPPLIES: Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C), ruler, protractor, compass, graph paper, tracing paper, scissors, colored pencils/pens, 3 x 5 notecards.

ALGEBRA II * 03248

FOUNDATIONAL COURSE

CREDIT: 1.0

PREREQUISITE: Geometry or concurrent enrollment

Core Connections Algebra II aims to extend what students have learned in previous courses and push them to apply that learning through connections of various representations. Students make connections between representations of functions, transformations of different function families, and finding zeroes of polynomials in relation to graphs and equations of polynomials. The course models periodic phenomena with trigonometry and builds an understanding of the role of randomness and normal distribution in making statistical conclusions.

On a daily basis, students in Core Connections Algebra II collaborate in team to apply problem solving strategies while investigating a problem. Together students communicate to analyze problems, shar-

MATH

ing ideas and expertise to justify their thinking with evidence.

SUPPLIES: *Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C), binder with tabs, graph paper, pencils, colored pencils, markers, ruler, scissors, red pen.*

PRE-CALCULUS * 03254

CREDIT: 1.0
PREREQUISITE: *A successful pre-calculus student should earn a grade of C or better in Algebra II. If a student has a grade lower than a C, they should seek their current and future instructors for a discussion and potential permission to take this course.*

Pre-Calculus emphasizes several big ideas that form a foundation for calculus and other college mathematics curricula. The curriculum includes modeling using a variety of functions, transformations of functions, and periodic functions and their graphs. The course covers area under a curve as a foundation for for integration, inverses, exponentials, and logarithmic equations and applications, and limits to infinity and at a point. Students will study properties of functions including continuity increasing vs. decreasing, and concavity, as well as average rates of change and instantaneous rates of change as a foundation for derivatives. Other graphical systems including polar and parametric, applications of vectors and trigonometric functions, and algebraic fluency and simplification techniques are included in this course.

This course is structured around investigations and problem solving. Students will explore concepts and develop mathematical relationships through observation, application, and both formal and informal proof.
SUPPLIES: *Graphing Calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C).*

FUNCTIONS & TRIGONOMETRY 03351

CREDIT: .5
PREREQUISITE: *Algebra II*

Functions and Trigonometry is a semester course that will include the topics of trigonometry, functions, and real world application problems. The course will establish a solid foundation for future work in mathematics courses. This course is an extension of Algebra 2 material for students wanting to take more mathematics beyond Algebra 2 not desiring the level of rigor in a Pre-Calculus course.
SUPPLIES: *Binder, Loose leaf paper and/or notebook, Graph Paper, Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C)*

STATISTICS 03349

CREDIT: .5
PREREQUISITE: *Algebra II*

Statistics is a semester course introducing the important topics of statistics. The course's data analysis approach will move students from computation to the statistical thinking behind data gathering and interpretation. This class will reflect the way working statisticians contribute to our understanding of the world. Topics include analyzing and interpreting data associated with distributions, scatterplots, samples and surveys, experiments, and probability.
SUPPLIES: *Graphing Calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C)*

AP STATISTICS ★ 03345

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12

PREREQUISITE: *Precalculus or a B or higher in Algebra II or Statistics*

Within this course students will study the major concepts and tools for collecting, analyzing and drawing conclusions from data. Students are exposed to four broad conceptual themes: Exploring Data – describing patterns and departures from patterns; Sampling and Experimentation – planning and conducting a study; Anticipating Patterns – exploring random phenomena using probability and simulation; Statistical Inference – estimating population parameters and testing hypotheses.
SUPPLIES: *Graphing Calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C).*
Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP CALCULUS AB ★ (CALC SEM. I) 03342

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Pre-Calculus*

This course is equivalent to a semester college calculus course. Students enrolled in this course will study topics determined by the College Board. The topics studied will include functions, graphs of functions, limits, derivatives and integrals.
SUPPLIES: *Graphing Calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C).*
Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

MATH

AP CALCULUS BC ★ 03348
CALC I & II (SEM I/II COMPACTED INTO ONE YEAR)

CREDIT: 2.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: B or above in Pre-Calculus

Within this course students will study functions, their graphs, limits, derivatives, integrals, polynomial approximations, and series as determined by the College Board.

*Please note: This is a highly rigorous course that covers Calculus AB and Calculus BC content in one year. This course counts as a single credit for the Cum Laude designation system.

SUPPLIES: *Graphing Calculator (TI-83, TI-83plus, TI-84, TI-84plus, or TI-84plus C).*

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

UW MILWAUKEE AT WAUKESHA ★ 03341DE
CALCULUS AND ANALYTIC GEOMETRY 3 (MATH 223)

SDNB CREDIT: 1.0
UW MILWAUKEE AT WAUKESHA CREDIT: 4.0
This Calc course will be 1.0 credits but will be 1st semester only during one class period.
GRADE LEVEL: 10, 11, 12

PREREQUISITE: *Students must have a minimal GPA of 2.0, must be in good academic standing, must have high school and parental/guardian approval, meet UW Waukesha entrance criteria, and have passed AP Calc BC with score of 4 or higher*

This UW dual enrollment course is a continuation of Calculus BC (2nd semester Calculus). Topics mastered in this course include: analytic geometry of three dimensions, functions of several variables, partial differentiation, multiple integration, and introduction to differential equations. This course is intended for students in the sciences, mathematics, computer science and engineering, or for other students who want preparation for higher level math courses or courses in allied fields. This is a UW course, so the grade will be on our transcript as well as the UW transcript.

★: College Level Courses

*: Offered in Summer too

UW MILWAUKEE AT WAUKESHA ★ 03352DE
LINEAR MATH (MATH 224)

SDNB CREDIT: 1.0
UW MILWAUKEE AT WAUKESHA CREDIT: 4.0
PREREQUISITE: C or above in Math 223

This UW dual enrollment course is an introduction to linear algebra, vector spaces, matrices, linear transformations and eigenvalues. Students will study ordinary differential equations, linear systems of differential equations, and laplace transforms.

COLLEGE ALGEBRA ★ 03230-TC

SDNB CREDIT: 1.0
COLLEGE CREDIT: 3.0
PREREQUISITE: C- or above in both semesters of Algebra II

COURSE FEE: *A course fee of \$19 will be charged for the yearly ALEKS license.*

This WCTC-based course covers those skills needed for success in high-level math courses, such as calculus as well as college entrance tests, and many application areas on a baccalaureate level. Topics include the real and complex number systems, polynomials, exponents, radicals, solving equations and inequalities (linear and nonlinear), relations and functions, systems of equations and inequalities (linear and nonlinear), matrices, graphing, conic sections, sequences and series, combinatorics and the binomial theorem.

This course is face-to-face, but uses ALEKS, an on-line adaptive learning program.

MATH SUPPORT

This class is designed to provide intervention in targeted mathematics skills. Students are placed into this course, which counts towards elective credit (.5 credit for one semester), through a referral process.

PHYSICAL EDUCATION

Graduation Requirements: 1.5 Credits

(Students who meet criteria for Wisconsin Act 105 may be exempt from .5 PE credit)

PERSONAL & LIFETIME FITNESS * 05400

CREDIT: .5
GRADE LEVEL 9, 10, 11, 12

Students will understand the importance of sound fitness and health practices and how to implement the practices into a healthy lifestyle. Students will know how to find their Safe Target Heart Rate Zone, the 5 components of fitness, and participate in a variety of anaerobic and aerobic activities. Students will incorporate the FITT principles to set and track personal fitness goals and understand the physical, academic, psychological, social and economic benefits of fitness while participating in health enhancing levels of physical activity. Fitness activity and growth will be monitored throughout the semester and will be used to develop a personal fitness plan.

SUPPLIES: *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. Can be repeated for .5 PE credit toward graduation.*

ADVANCED PLF: THE ACTIVE LIFESTYLE ★ 05509

SDNB CREDIT: .5
UW OSHKOSH CAPP CREDITS AVAILABLE AT \$100/CREDIT: 2.0
GRADE LEVEL 11, 12
PREREQUISITE: PLF

This college level physical education course is a contemporary examination of the effects of lifestyle, wellness, and health promotion on the individual. Instruction will include procedures for self-evaluation as well as an individualized exercise program for the development of health fitness. Participation in a planned program of aerobic activity is required. Students can choose to take Advanced PLF: The Active Lifestyle for high school credit only or as a dual enrollment course, earning high school and college credit through UW Oshkosh. The dual enrollment option involves an additional fee.

SUPPLIES: *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. Can be repeated, but will only count once for .5 PE credit toward graduation.*

BFS: BETTER, FASTER, STRONGER * 05501

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12

Better, Faster, Stronger (BFS) will give students an opportunity to reach their maximum performance potential. Students will follow the BFS Program, which lends itself to a training strategy that includes weight training, flexibility and speed development directed to

improve the participants both physically and mentally. Through weight training, students will learn the technique of four core lifts including the Bench Press, Parallel Squat, Power Clean, and Dead Lift. Core lifts will be supplemented by auxiliary lifts, which can be varied according to the needs of the student. The program is a systematic approach; students record and monitor their progress throughout the semester. Students will be introduced to activities that promote agility, speed, balance, and power. Safety and proper weight lifting techniques will be emphasized.

SUPPLIES: *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. Can be repeated, but will only count once for .5 PE credit toward graduation.*

ADVANCED BFS * 05502

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: BFS

Advanced Better, Faster, Strong (BFS) will give students an extended opportunity to reach their maximum performance potential via the BFS Program. Weight training will continue to focus on the techniques of the four core lifts, including the Bench Press, Parallel Squat, Power Clean, and Dead Lift. However, students will have the opportunity to choose some activities that extend beyond the structure of the BFS program experienced in the introductory course. Core lifts will be supplemented by auxiliary lifts, which can be varied according to the needs of the student. The program is a systematic approach; students record and monitor their progress throughout the semester. Attention will continue to be given to activities that promote agility, speed, balance, and power. Safety and proper weight lifting techniques will be emphasized.

SUPPLIES: *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. Can be repeated for credit toward graduation.*

ONLINE PHY ED CONCEPTS 05100

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: \$31

This course is a combination of online coursework outside of school and face-to-face interactions during school hours on a weekly basis. It is designed to provide students with the basic skills and information needed to begin a personalized exercise program and maintain an active and healthy lifestyle. Students participate in pre and post-fitness assessments in which they measure and analyze their own levels of fitness,

PHYSICAL EDUCATION

based on the five components of physical fitness: muscular strength, endurance, cardiovascular fitness, flexibility, and body composition. Assessments will be in the form of weekly fitness logs, quizzes, writing assignments, online discussions, and the FITNESSGRAM health related standards. Students will research the benefits of physical activity, as well as the techniques, principles, and guidelines of exercise to keep them safe and healthy. Students will participate in a personal individualized weekly fitness program involving elements of cardio, strength, and flexibility. This class is a good fit for highly self-motivated students possessing strong organizational skills and the ability to perform self-directed activities. Instructors will evaluate progress and provide interventions through the variety of assessments built into the course. Required information meeting with student, parent, teacher and counselor prior to beginning the class.

SUPPLIES: *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. May be taken more than once toward the 1.5 physical education credit requirement.*

TEAM SPORTS 05506

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: None

Team sports are competitive, challenging, and will improve your fitness level. Students will achieve and maintain a health enhancing level of fitness through participation in a variety of team sports. This course appeals to students who have a desire to improve their knowledge of the rules and strategies necessary to excel competitively. Fitness concepts, goal setting, and assessments will be an integral part of the course. **SUPPLIES:** *Appropriate athletic footwear, change of appropriate athletic clothing, keyed combination lock. Team Sports can be taken once for .5 PE credit toward graduation.*

INDIVIDUAL SPORTS 05507

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: None

This course appeals to students who enjoy lifetime sports and activities which may be competitive or non-competitive while improving and maintaining a health enhancing level of fitness. Students will practice the skills, strategies and tactics necessary to actively participate in individual/dual sports and lifetime activities. Fitness concepts, goal setting, and assessments will be an integral part of the course. Activities may include badminton, tennis, golf, Frisbee golf, pickleball, track & field, bocce ball or archery. **SUPPLIES:** *Appropriate athletic footwear, change of*

appropriate athletic clothing, keyed combination lock. Can be taken once for .5 PE credit toward graduation.

LIFEGUARDING 05508

CREDIT: .5 credits
GRADE LEVEL: 10, 11, 12

PREREQUISITE: *Ability to perform the following minimum swim skills: Swim 300 yards continuously using front crawl or breaststroke; timed brick retrieval from the bottom of the deep end and swim 20 yards using only legs; tread water for two minutes using only legs.*

Students will have the ability to earn American Red Cross Lifeguarding and First Aid Certification. Students will also learn skills in Oxygen Administration, Preventing Disease Transmission and CPR/AED.

COURSE FEE: *If students choose to become certified through Red Cross there is a fee for certification.*

-Consumable books and course materials that students keep for future reference.

*- \$35 for Red Cross Registration**

- \$32 for Hip Packs and Materials

**Dependent on meeting Red Cross requirements*

PHY ED ELECTIVE

This elective course does not satisfy PE graduation requirements.

NUTRITION 05504

CREDIT: .5
GRADE LEVEL: 11, 12

This one semester course will provide students an overview of good nutrition principles that are needed for physical & mental wellness. Discussion of digestion, basic nutrients, weight management, sports & fitness, and life-span nutrition is included. Application to today's food and eating trends, plus learning to assess for reliable nutrition information is emphasized.

PHYSICAL EDUCATION CREDIT THROUGH ATHLETIC PARTICIPATION

High school students who actively complete 95% of an athletic season may complete an additional .5 credit in English, mathematics, science, social studies, or a health elective in lieu of the final .5 credit of their physical education requirement.

FOUNDATIONAL COURSE

CREDIT: 1.0

GRADE LEVEL: 9

The successful Biology student will be able to demonstrate a working knowledge of the scientific method, chemical/structural basis of living things, the anatomy/physiology of the cell, growth/reproduction of the cell, cellular respiration and photosynthesis, genetics, general human anatomy and physiology, ecology, and evolution. Students will use technology to obtain and model data for graphical analysis. A successful Biology student will be able to perform a controlled scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.
SUPPLIES: *Binder and Folder/Composition Books(1/quarter), Pens, Pencils, Colored Pencils*

BIOLOGY-HONORS

will be stressed as a tool to assist in the interpretation, analysis, communication, and conclusion of findings through evidence gathered.

SUPPLIES: *Binder and Folder/Composition Books (1/quarter), Pens, Pencils, Colored Pencils*

CHEMISTRY 04411

FOUNDATIONAL COURSE

CREDIT: 1.0

GRADE LEVEL: 10, 11, 12

PREREQUISITE:

Biology or Biology concurrent enrollment, grade of C or higher in Algebra I

The successful Chemistry student will be able to correctly classify matter, name compounds, write formulas, and balance chemical equations. Students will also learn how to analyze the behavior of atoms and molecules. They will become familiar with the parts of an atom and atomic models. They will understand the scientific discoveries of the atom and the periodic table, analyze periodic trends and properties. They will understand and apply the kinetic molecular theory and the gas laws. Students will be able to solve quantitative problems based on chemical principles, and understand the properties of solids, liquids, and gases. Students will use technology to obtain and model data for graphical analysis. A successful Chemistry student will be able to perform a controlled scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.

SUPPLIES: *Calculator, state-approved chemical splash-proof goggles, 3-ring binder, loose-leaf paper*

CHEMISTRY-HONORS 04421

FOUNDATIONAL COURSE

CREDIT: 1.0

GRADE LEVEL: 10, 11, 12

PREREQUISITE:

Biology or Biology concurrent enrollment, grade of B or higher in Algebra I

This course is intended to prepare students for AP Chemistry. The successful Chemistry student will be able to correctly classify matter, name compounds, write formulas, and balance chemical equations. Students will also learn how to analyze the behavior of atoms and molecules. They will become familiar with the parts of an atom and atomic models. They will understand the scientific discoveries of the atom and the periodic table, analyze periodic trends and properties. They will understand and apply the kinetic molecular theory and the gas laws. Students will be able to solve quantitative problems based on chemical principles, and understand the properties of solids, liquids, and gases. Students will use technology to obtain and model data for graphical analysis. A successful Chemistry student will be able to perform a controlled

scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.

SUPPLIES: *Calculator, state-approved chemical splash-proof goggles, 3-ring binder, loose-leaf paper, lab notebook*

PHYSICS 04511

CREDIT: 1.0

GRADE LEVEL: 10, 11, 12

PREREQUISITE: *Biology or concurrent enrollment in Biology or Chemistry; grade of C or higher in Algebra I*

The successful Physics student will: develop the ability to think critically and logically while solving problems and conducting experiments related to measurement, graphical analysis including slope, y-intercept, and area under the curve, vector analysis, kinematics in one and two dimensions, projectile motion, circular motion, forces, momentum, energy, simple harmonic motion, wave behavior, optics, and modern physics. Students will use technology to obtain and model data for graphical analysis. A successful Physics student will be able to perform a controlled scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.

SUPPLIES: *Scientific calculator (graphing allowed)*

ANATOMY & PHYSIOLOGY I (SEM. I) 04227

CREDIT: .5

GRADE LEVEL: 11, 12

PREREQUISITE: *Biology and Chemistry*

Anatomy and Physiology (A&P) A is a 1 semester course typically taken in conjunction with Anatomy and Physiology II second semester. The successful A&P I student will know how structure (molecule, cell, tissue, organ, system, organism) complements function, learn from hands-on experimentation (including dissections), and use proper anatomical and physiological terminology in learning about the systems of the human body. Possible systems covered are circulatory, digestive, and respiratory, and excretory.

This course is designed for those students with an interest in anatomy and physiology and a medical career. Students will be assessed on their ability to perform laboratory skills, interpret information, communicate experimental results, and demonstrate understanding through a variety of assessments. Students will use technology to obtain and model data for graphical analysis. A successful Anatomy & Physiology I student will be able to perform a controlled scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.

SUPPLIES: *Pens, pencils, colored pencils, notebook/binder*

ANATOMY &
PHYSIOLOGY II (SEM. II)

04228

CREDIT: .5
GRADE LEVEL: 11, 12
PREREQUISITE: *Biology, Chemistry and Anatomy & Physiology I*

Anatomy and Physiology (A&P) B is a 1 semester course typically taken in conjunction with Anatomy and Physiology I first semester. The successful A&P II student will know how structure (molecule, cell, tissue, organ, system, organism) complements function, learn from hands-on experimentation (including dissections), and use proper anatomical and physiological terminology in learning about the systems of the human body. Possible systems covered are immune/lymphatic, skeletal, muscular, nervous, endocrine, and reproductive.

This course is designed for those students with an interest in anatomy and physiology and a medical career. Students will be assessed on their ability to perform laboratory skills, interpret information, communicate experimental results, and demonstrate understanding through a variety of assessments.
SUPPLIES: *Pens, pencils, colored pencils, notebook/binder*

AP BIOLOGY ★

04231

CREDIT: 2.0
GRADE LEVEL: 11, 12
PREREQUISITE: *Completion of Biology and Chemistry*

Students who take the AP Biology course will develop advanced inquiry and reasoning skills, such as designing a plan for collecting data, analyzing data, applying mathematical routines, and connecting concepts in and across all 4 Biological Domains (Evolution drives diversity, Biological systems utilize free energy, Living systems use information for life processes, Biological systems/organisms interact). The result will be readiness for the study of advanced topics in subsequent college courses.

The AP Biology course is equivalent to a two-semester college introductory biology course. More than 90 percent of four-year colleges and universities in the United States grant students credit, placement, or both on the basis of successful AP Exam scores. Research consistently shows that students who score a 3 or higher on AP Exams typically experience greater academic success in college and have higher graduation rates than otherwise comparable non-AP peers.
SUPPLIES: *3-ring binder (3 inch), colored pencils, highlighters, lab notebook, safety goggles, scientific calculator.*

★: College Level Courses

*: Offered in Summer too

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP CHEMISTRY ★

04441

CREDIT: 2.0
GRADE LEVEL: 11, 12
PREREQUISITE: *Completion of Biology and Chemistry as well as Algebra II*
COURSE FEE: \$10

This AP Chemistry course is designed to be the equivalent of the general chemistry course usually taken during the first year of college. The successful AP Chemistry student will be able to: display an in-depth understanding of chemical structure/principles; explain real-world events logically/coherently using chemical theory; solve quantitative problems, rapidly/accurately; evaluate the process of science in the development of theories; communicate laboratory evidence/conclusions logically/coherently.

SUPPLIES: *Calculator, state-approved chemical splash-proof goggles, 3-ring binder, loose-leaf paper, lab notebook*

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP ENVIRONMENTAL SCIENCE ★ 04113

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE: *Biology, Chemistry and Algebra*

The goal of the AP Environmental Science course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them.

Environmental science is interdisciplinary; it embraces a wide variety of topics from different areas of study. There are several major unifying constructs, or themes, that cut across the many topics included in the study of environmental science.

SUPPLIES: *Folder and notebook or 3 ring binder with loose-leaf paper and writing utensils*

Students enrolled in this course are expected to take the Advanced Placement examination in early May.

Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP PHYSICS I ★ 04515

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE:

Biology, Algebra II with a B or higher
AP Physics 1: Algebra-Based is the equivalent to a first-semester college course in algebra-based physics. Students will develop a deep understanding of foundational principles of physics in classical mechanics and apply these principles to complex physical situations.

Students will discuss, confer, and debate with classmates to explain a physical phenomenon investigated in class. Students will design and conduct inquiry-based laboratory investigations to solve problems through first-hand observations, data collection, analysis and interpretation.

SUPPLIES: *Scientific calculator (graphing allowed), Lab notebook - Bound (quad ruled composition notebook)*

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP PHYSICS II ★ 04516

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE: *Any Physics course*

AP Physics 2: Algebra-Based is the equivalent to a second-semester college course in algebra-based physics. The course covers fluid mechanics; thermodynamics; electricity and magnetism; optics; atomic and nuclear physics. Students will develop a deep understanding of foundational principles of physics by applying these principles to complex physical situations.

Students will discuss, confer, and debate with classmates to explain a physical phenomenon investigated in class. Students will design and conduct inquiry-based laboratory investigations to solve problems through first-hand observations, data collection, analysis and interpretation.

SUPPLIES: *Scientific calculator (graphing allowed), Lab notebook - Bound (quad ruled composition notebook)*

Students enrolled in this course are expected to take

the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP PHYSICS C MECHANICS ★ 04522

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE:

Biology, AP Calc AB or BC - concurrently enrolled
The successful AP Physics C-Mechanics student will develop a deep understanding of foundational principles of physics in classical mechanics by applying these principles to complex physical situations that combine multiple aspects of physics rather than present concepts in isolation.

Students will discuss, confer, and debate with classmates to explain a physical phenomenon investigated in class. Students will design and conduct inquiry-based laboratory investigations to solve problems through first-hand observations, data collection, analysis and interpretation.

SUPPLIES: *Scientific calculator (graphing allowed), Lab notebook - Bound (quad ruled composition notebook)*

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP PHYSICS C ELECTRICITY AND MAGNETISM - INDEPENDENT STUDY ★ 04523

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE:

Any Physics, and AP Cal AB or BC - concurrently enrolled

The successful AP Physics C-Electricity and Magnetism student will develop a deep understanding of foundational principles of physics in classical E & M theory including electrical field, potential, current circuits, magnetic field, and electromagnetism. Students will apply these principles to complex physical situations that combine multiple aspects of physics rather than present concepts in isolation. Students may discuss, confer, and debate with classmates to explain the physical phenomenon investigated in class.

Students will conduct inquiry-based laboratory investigations to solve problems through first-hand observations, data collection, analysis and interpretation.

Students enrolled in this course are expected to take

ENVIRONMENTAL SCIENCE 04112

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE:

Chemistry or concurrent enrollment in Chemistry
The successful Environmental Science student will be able to adequately demonstrate a working knowledge of physics, chemistry, biology, ecosystems, biodiversity, natural resources, populations, pollution, land use, energy flow, conservation, and current issues. Students will complete labs and activities that develop critical thinking skills based on the scientific method.

This course is recommended for students considering a career in environmental engineering, natural resources, public health, conservation, safety, city planning, or education. Human interaction and effects on the environment are highly stressed throughout each unit. The underlying goal of the course is to increase awareness and appreciation of the importance of the environment on all living things, especially humans through the processes of conservation and sustainability.

SUPPLIES: Writing utensil, notebook, folder(s)/binder

EARTH AND SPACE SCIENCE 04120

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE:

Chemistry or concurrent enrollment in Chemistry
The successful Earth Science student will be able to demonstrate a working knowledge of the physical and chemical characteristic of the earth (such as minerals, rocks, soils, energy, and water). Understand the earth as a dynamic system through the study of geologic time, plate tectonics, erosional processes, oceanography, weather/climate, and earth's place in our solar system. Students will also gather information in situ and through remote sensing. Students will use technology to obtain and model data for graphical analysis. A successful Earth Science student will be able to perform a controlled scientific investigation; gather, interpret, and analyze data; and present final conclusions in various forms.

SUPPLIES: Folder/Notebook or 3 ring binder/loose-leaf paper, Writing utensils

UW WAUKESHA HEREDITY ★ 07232DE

SDNB CREDIT: .75 (but semester in length)
UW MILWAUKEE AT WAUKESHA CREDIT: 3.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: Biology
UW-Waukesha Dual Enrollment Course: BIO 141

This college course is designed to expose students to current advances in genetics and their bearing on the life sciences. Instruction will engage students through demonstration, discussion, field trips, and lecture-based instruction. The successful Heredity student will be able to apply the principles of heredity to plant, animal, and human inheritance. This course counts as an introductory level biology class in the University of Wisconsin System. Students who successfully complete the class will earn three (3) college credits that will be indicated on a UW transcript.

SCIENCE ELECTIVES:

PROJECT LEAD THE WAY (PLTW) PRINCIPLES OF BIOMEDICAL SCIENCE 07007

CREDIT: Elective Credit of 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE:

Biology or concurrent enrollment in Biology
In the introductory course of the PLTW Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems.

FOUNDATIONAL COURSE

CREDIT:

1.0

CREDIT:

1.0

GRADE LEVEL:

9, 10

GRADE LEVEL:

9, 10

RECOMMENDED in Grade 9

RECOMMENDED in Grade 10

The successful students of 20th Century US History will be able to develop an awareness of their historical heritage and an appreciation of the development of the United States as a free nation. Students will survey the events and ideas beginning with post-industrial revolution labor management issues continuing through U.S. imperialism, the World Wars, Great Depression, Cold War, Vietnam, and on to late 20th century. This is the second of two courses in a two-year course sequence.

Students will develop their knowledge of global regions and understand how physical, political, historical, economic and cultural conditions contribute to the uniqueness of our world. Students will also work to gain an understanding of how these different regions compare and contrast to the United States and how they impact their lives in order to become better global citizens. Current events will be presented by students throughout the year in order to assist in the understanding of these themes.

AP U.S. HISTORY ★

02575

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12

PREREQUISITE: 20th Century US, AP Human Geography, World Studies or consent of teacher

The successful AP US History student will be able to develop an understanding and perspective of United States History from the Columbian Exchange to the 21st century. If a student successfully completes the coursework provided they should be able to earn a “3” or higher on the required national AP exam in early May.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP MICROECONOMICS ★

02461

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12

PREREQUISITE: Any 10th grade student taking this course must have earned a B or better in both Algebra and Geometry

The purpose of the Advanced Placement course in Microeconomics is to give students a thorough and advanced understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within the larger mixed market economic system. Microeconomics places primary emphasis on the nature and functions of decision making by households and firms.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97.

AP HUMAN GEOGRAPHY ★

02590

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12

PREREQUISITE: Recommendation of 8th grade Social Studies teacher.

The successful AP Human Geography student will develop an understanding of the systematic study of patterns and processes that have shaped the ways in which humans understand, use, and alter the earth’s surface. Students use spatial concepts and landscape analysis to examine human social organization and its environmental consequences and also learn about the methods and tools geographers use in their science and practice.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP US GOVERNMENT & POLITICS ★

02595

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12

PREREQUISITE: 20th Century US History or AP US History

AP U.S. Government and Politics begins with the foundations of the United States government and a focus on the three branches of government. Second semester begins with completion of the unit on the judicial branch and continues with the development of civil liberties. In addition, various groups that influence the U.S. government including political parties, the media, and various interest groups with be analyzed. The second semester concludes with public policies and services.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP EUROPEAN HISTORY ★

02580

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12

The study of European history since 1450 introduces students to cultural, economic, political, and social developments that played a fundamental role in shaping the world in which they live. Without this knowledge, we would lack the context for understanding the development of contemporary institutions, the role of continuity and change in present-day society and politics, and the evolution of current forms of artistic expression and intellectual discourse.

Students enrolled in this course are expected to take the Advanced Placement examination in early May.

AP PSYCHOLOGY ★

02442

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12

The successful AP Psychology student will understand the main subfields of psychology and be able to apply their knowledge in practical ways. The class will provide an in-depth introduction to the mental

and behavioral processes of humans and animals, research methods, and ethics. Major areas of study include history, biological bases of behavior, learning, cognition, abnormal psychology, treatment of disorders, and social psychology.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97.

PSYCHOLOGY 02440

CREDIT: .5
GRADE LEVEL: 10, 11, 12
Students in this course will gain an understanding of the science of psychology, its history, and experimental procedures. Throughout this course, students will gain an understanding in the effects of conditioning, the environment on behavior and learning, and lifespan development. In addition, students will gain an understanding of the various mental health disorders and their treatments.

ECONOMICS 02460

CREDIT: .5
GRADE LEVEL: 11, 12
The successful Economics student will examine economic principles including supply and demand, business organization, types of economies in the world, trade, money, and how to measure the economy. The class will use a variety of instructional methods to prepare students for participation in the economy as decision makers and consumers.

GOVERNMENT * 02221

CREDIT: .5
GRADE LEVEL: 11, 12
Students will gain a working knowledge of the structure and function of local, state, and federal government. Students will investigate the basic principles of our government, the rights, freedoms, and responsibilities of U.S. citizens, the adaptability of our democratic system to our changing world and society, the role of public opinion and special interests in policy-making, the nature of political parties, and basic election procedures.

★: College Level Courses

*: Offered in Summer too

PHILOSOPHY 02465

CREDIT: .5
GRADE LEVEL: 11, 12
The successful Philosophy student will be able to understand and analyze basic, philosophical concepts. These ideas will then be applied to discussions and projects that deal with some of the major issues and ethical decisions facing the individual and society today.

WARS 02435

CREDIT: .5
GRADE LEVEL: 11, 12
The successful Wars student will develop an awareness and appreciation of the wars of the 20th century including World War I, World War II, the Korean War, and the Vietnam War. Over the course of the semester we will study the causes, events, and outcomes of these conflicts. In this course students will discover how all of these wars link together into a century long theme of conflict.

SOCIOLOGY ★ 02446

SDNB CREDIT: .5
WCTC TRANSCRIPTED CREDIT AVAILABLE: 3.0
This course is also part of the Universal Credit Transfer Agreement, meaning it is likely to transfer from WCTC to UW credits.
GRADE LEVEL: 11, 12
During this course of study, students will develop an understanding and be able to apply sociological concepts and perspectives that include attention to socialization, culture, organization, stratification and societies. This course will have students access a variety of resources to discuss/research and make claims based on text dependent evidence. Students will express their views and knowledge of concepts through class discussion and writing.

EARLY WORLD HISTORY 02451

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
Students in this course will understand the foundations of modern society through the study of the ancient and medieval world. Students will examine major historical topics including the rise and spread of civilization, the ancient Near East, ancient Greece and Rome, early India and China, medieval Europe and Africa, and pre-Columbian America. Students will also make connections between historical and current events.

ART

DIGITAL ART PHOTOGRAPHY

08160

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Passing Digital Art Design with a C or better.*

COURSE FEE: *A course fee up to \$20 may be charged.*

In this advanced design course, students will apply the elements and principles of design in two dimensional images, as well as gain an understanding of the parts and functions of digital cameras, design rules, photo manipulation software, digital printing and finishing techniques. The history, current trends, and career opportunities of photography are discussed. A personal digital camera (preferably an SLR) of 8 megapixels or larger, is required for this course.

SUPPLIES: *Memory card and digital camera.*

CERAMICS I

08110

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: *A course fee up to \$20 may be charged.*

In this introductory ceramics course, students will create functional and decorative pottery projects focusing on a variety of constructions, to include hand building and wheel throwing, as well as finishing techniques. Students will be expected to learn, use & apply the art elements and principles of design. Students will gain a greater understanding and appreciation of the clay medium through analysis of their work, reflections, and self & peer critiques. This course is a prerequisite for Ceramics II and a necessary foundation for AP 3-D Art & Design.

CERAMICS II

08112

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Ceramics I*

COURSE FEE: *A course fee up to \$20 may be charged.*

In this advanced ceramics course, students will continue to create functional and decorative pottery projects focusing on a variety of constructions, to include hand building and wheel throwing, as well as finishing techniques. Students will be expected to learn, use & apply the art elements and principles of design. Students will gain a greater understanding and appreciation of the clay medium through analysis of their work, reflections, and self/peer critiques.

DRAWING I

08130

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: *A course fee up to \$20 may be charged.*

In this introductory drawing course, students will learn observational and expressive rendering skills. It provides students with the critical skills necessary to develop their visual awareness through representational drawing, perspective, and compositional strategies. Students will be taught to effectively use various drawing media, techniques and concepts. This course is a necessary foundation for Painting, Drawing II and AP 2-D Art & Design.

DRAWING II ★

08131

SDNB CREDIT: .5
WCTC TRANSCRIPTED CREDIT AVAILABLE: 3.0
as Design Drawing & Color Theory
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Drawing I*

COURSE FEE: *A course fee up to \$20 may be charged.*

In this advanced drawing course, students will further develop and refine drawing techniques and methods based on the elements and principles of design. Students will gain a greater understanding and appreciation of self and others through problem solving, self and group reflections and evaluations, as well as portfolio reviews. This course is a necessary foundation for Painting and AP Drawing. This course is eligible for transcribed credits.

PAINTING I 08132

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Drawing I*
COURSE FEE: *A course fee up to \$20 may be charged.*

In this introductory painting course, students will be provided with the opportunity to experiment with variety of brush strokes/effects, painting styles and techniques. Students will be able to develop their creative expression through a variety of painting media and problem solving techniques, as well as gain an understanding and appreciation of painting as depicted through various cultures. This course is a necessary foundation for Painting II and AP Drawing.

PAINTING II 08133

CREDIT: .5
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Painting I*
COURSE FEE: *A course fee up to \$20 may be charged.*

In this advanced painting course, students will continue to practice and refine various painting techniques and methods based on the elements and principles of design.

SCULPTURE I 08150

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: *A course fee up to \$20 may be charged.*

In this introductory sculpture course, students will be provided with the skills necessary to work with a variety of materials to create 3-Dimensional forms that are both functional and decorative. Materials may include, but not limited to, clay, metals, wax, plaster, paper, and cardboard. This course is a necessary foundation for AP 3-D Art & Design.

SCULPTURE II 08151

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *Sculpture I*
COURSE FEE: *A course fee up to \$20 may be charged.*

In this advanced sculpture course, students will continue to create 3-dimensional forms that are functional and decorative building upon the skills acquired during sculpture I. Materials may include, but not limited to, clay, metals, stained glass, cardboard and resin.

AP ART HISTORY ★ 08453

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Enrolled in Honors or AP English course to demonstrate college-level writing ability*

The successful student in AP Art History will be able to visually analyze works of art through understanding

their visual and contextual content. The student will be able to develop an understanding and perspective of World Art History and should be enrolled in Honors or AP English course to demonstrate college-level writing ability. Experience in a basic level art class would be helpful. Enrollment in this course required taking the Advanced Placement examination in early May following completion of AP Art History. This course will be offered in 2020-21 and every other year after.

AP 2-D ART & DESIGN I ★ 08454

CREDIT: 1.0 per year; a 2-year course
GRADE LEVEL: 11
PREREQUISITE: *Digital Art Design, Photography, Drawing I. The instructor must approve the portfolios of work. Summer projects must be completed by the 1st day of school.*

COURSE FEE: *A course fee up to \$50 may be charged.*
 The successful student will be experienced in using formal and technical/expressive means available to visual artists; be knowledgeable of media craftsmanship in a wide variety of techniques; demonstrate inventiveness, commitment, and expressive content; be able to self-critique in both written and oral forms, use peer/teacher feedback; and have perception of environment and cultural awareness.

SUPPLIES: *Flash drive 1 GB or larger*

AP 2-D ART & DESIGN II ★ 08455

CREDIT: 1.0 per year; a 2-year course
GRADE LEVEL: 12
PREREQUISITE: *AP 2-D Art & Design I.*

Summer projects must be completed by the 1st day of school.

COURSE FEE: *A course fee up to \$50 may be charged.*
 The successful student will be experienced in using formal and technical/expressive means available to visual artists; acquire an in depth knowledge of a specific media and high craftsmanship in a chosen technique; demonstrate inventiveness, commitment, and expressive content. The student will also be able to self-critique in both written and oral forms, use peer/teacher feedback; and have perception of environment and cultural awareness.

BUSINESS & MARKETING

is recommended for students who are planning to major in any business program in college. Principles of Marketing is a prerequisite for Retail Operations Management and Sports and Event Marketing. WCTC course standards will be followed and transcribed credit will be offered.

SUPPLIES: Folder or binder, notebook and writing utensil.

INTRODUCTION TO BUSINESS 07104

CREDIT: .5

GRADE LEVEL: 8, 9, 10

In this exploratory business course, students will be provided with a hands-on project and design-based curriculum that will introduce basic business concepts needed to be successful in the business industry. Students will continue to build upon communication, reading, writing and technology skills with an emphasis on the business environment. Completing this course will give students basic knowledge in accounting, types of business, ethics, marketing, and technology that prepares students for future business and marketing courses provided at the high school level.

RETAIL OPERATIONS MANAGEMENT 07127

CREDIT: 1.0

GRADE LEVEL: 11, 12

PREREQUISITE: *Principles of Marketing earning a C or better. IT IS HIGHLY RECOMMENDED, BUT NOT REQUIRED, THAT STUDENTS ENROLL CONCURRENTLY IN APPLIED RETAIL OPERATIONS MANAGEMENT A&B.*

Retail Operations Management is a capstone class for a student who is seriously interested in a business, management, and/or marketing career. Students in this course will be reviewing marketing, applying market research techniques, exploring promotional mix elements in-depth and learning about accounting and pricing. First semester will be rounded out with a unit in current events and trends. Second semester will include a focus on selling, channel management, consumerism, ethics and social responsibility, human resources and global business.

APPLIED RETAIL OPERATIONS MANAGEMENT A (1st Semester) 07128

CREDIT: .5

GRADE LEVEL: 11, 12

PREREQUISITE: *Principles of Marketing earning a C or better. STUDENTS MUST ALSO BE ENROLLED CONCURRENTLY IN RETAIL OPERATIONS MANAGEMENT.*

Students will work in the school store during the first semester completing various assigned duties in running a successful business through merchandising, ordering, marketing, budgeting, scheduling, managing, etc. The student will be scheduled three to five hours per week before school, during lunch, and after school hours. Students will gain valuable work experience while experimenting in entrepreneurial, retail and management industries (may be taken for more than one semester).

APPLIED RETAIL OPERATIONS MANAGEMENT B (2nd Semester) 07129

CREDIT: .5

GRADE LEVEL: 11, 12

PREREQUISITE: *Principles of Marketing earning a C or better. STUDENTS MUST ALSO BE ENROLLED CONCURRENTLY IN RETAIL OPERATIONS MANAGEMENT.*

Students will work in the school store during the second semester completing various assigned duties in running a successful business through merchandising, ordering, marketing, budgeting, scheduling, managing, etc. The student will be scheduled three to five hours per week before school, during lunch, and after school hours. Students will gain valuable work experience while experimenting in entrepreneurial, retail and management industries (may be taken for more than one semester).

SPORTS & EVENT MARKETING 07123

CREDIT: .5

GRADE LEVEL: 10, 11, 12

PREREQUISITE: *Principles of Marketing*

There is more to sports than statistics and who won the game. Look behind the scenes of multi-billion dollar industries and find out about the business side of sports, entertainment and event planning. Topics will include sales, promotions, branding and licensing, advertising, public relations, broadcasting, drafts and salary caps, and the role of sports and entertainment in American culture. The course builds on the topics learned in the Principles of Marketing course and applies them as they relate to the sports and entertainment world.

SUPPLIES: Folder or binder, notebook and writing utensil.

APPLIED ANALYTICS: ADVANCED DATA SCIENCE HONORS (UW MILWAUKEE DATA SCIENCE)

07126

SDNB CREDIT: .5 (2nd semester course only)
UW Milwaukee MathStat 216: Intro to Statistical Computing & Data Science 3 credits through this course.

GRADE LEVEL: 10, 11, 12
PREREQUISITE: Prior or concurrent enrollment in Statistics or AP Statistics

Get started discovering, analyzing, visualizing, and presenting data in a meaningful way with this capstone course! Students will work with different types of data and various sources of data to build their analytic skills using excel and R to improve business processes and decision-making. This course introduces students to the field of analytics and a brief introduction to Artificial Intelligence, including using analysis to support data driven decision making to improve organizational performance. Through the application of a standard analysis process, students will gain hands-on experience applying exploratory data analysis and statistical techniques to business case studies. Data Analytics is connected to all programs of study as it is an important skill set for our future workforce. For example, extracting patterns, trends, and actionable information from large and small sets of data is an important process in healthcare, manufacturing, IT, politics, etc. This course is held at New Berlin Eisenhower.

SUPPLIES: Folder or binder, notebook and writing utensil.

INNOVATE - HONORS 07426

SDNB CREDIT: 1.0 (semester only, one period only)
UW Milwaukee credits available only if you attend UW Milwaukee after graduation.

GRADE LEVEL: 11, 12
PREREQUISITE: Students must have earned a B or better in one or more of the following to register (or prior authorization): AP Science course, AP Computer Science, AP Math, AP Social Studies, PLTW Software Engineering, PLTW Principles of Engineering
The following courses are highly recommended as prerequisites or to be taken concurrently: - Entrepreneurship, Marketing courses, TechKNOW, AP Research, AP English, AP Art

This interdisciplinary project-based course allows student teams to dig into real world problems and design a solution/product to address customer needs. Teams will work on challenges related to Innovations in Technology, Business, Retail, Healthcare and/or Engineering. Industry mentors will be assigned to the teams to support them with customer discovery, solution definition, and the preparation of their final pitch/expo presentation. Students will be connected to outside resources and companies as needed to support their project. Students will develop the following critical skills: design systems thinking, project management, creativity, problem solving, interpersonal skills, etc.. This course is designed to provide real world experiences that students can draw from in the college admissions process and apply to their work as they pursue their post-secondary program of study. Students will complete a portfolio that can be submitted to their post-secondary education institution to be considered for 'credit for prior learning'. Check the INNOVATE webpage for additional program information and eligibility information. Students who do not meet eligibility requirements may be allowed to register with a teacher/counselor/administrator recommendation.

SUPPLIES: Folder or binder, notebook and writing utensil.

EXPLORING COMPUTER SCIENCE

03963

CREDIT: .5
GRADE LEVEL: 8, 9, 10
 Exploring Computer Science is designed to introduce students to the breadth of the field of computer science through an exploration of engaging and accessible topics. Students will be given the opportunity to work at their own pace as well as collaborate in groups where they can learn from each other to gain an overview of the many varied ways in which computers and computing are used. Topics that will be explored include human computer interaction, problem solving, web design, computer programming, data analysis, and robotics. This course will help students develop the computational practices of algorithm development, problem solving, and programming within the context of issues that are relevant to our lives today.
SUPPLIES: Folder or binder, notebook and writing utensil.

03971

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
 This course is designed for students with some exposure to computer science, but there are no specific course prerequisites. Students will learn foundational cybersecurity topics including digital citizenship and cyber hygiene, the basics of cryptography, software security, networking fundamentals, and basic system administration and all through the CodeHS web-based platform. Students will complete projects at the end of each module, and a culminating course project where they will complete a simulated hacking walkthrough.
SUPPLIES: Folder or binder, notebook and writing utensil.

WEB DEVELOPMENT I

03932

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: None
 Web Development I will start out by introducing students to the elements of design and how to sketch webpages. The class will then transition into covering the fundamental concepts necessary for the construction of web pages using HTML and CSS.
SUPPLIES: Folder or binder, notebook and writing utensil.

COMPUTER SCIENCE

WEB DEVELOPMENT II (ONLINE) 03933

(THIS COURSE IS CALLED WEB DEVELOPMENT I – SEMESTER 2 – THROUGH WISCONSIN VIRTUAL ACADEMY)

CREDIT: .5

GRADE LEVEL: 10, 11, 12

PREREQUISITE: C or above average in Web Development I

Students will learn how to enhance their websites with dynamic content by adding JavaScript code to their pages. Students will be introduced to JavaScript basics from a web development perspective. By the end of the course, students will be able to write their own simple JavaScript applications. A good working knowledge of HTML is required for enrollment. Students completing the class are eligible to take Web Design II through WI Virtual School for 1.0 credit.

SUPPLIES: Folder or binder, notebook and writing utensil.

GAME DESIGN 03945

CREDIT: .5

GRADE LEVEL: 9, 10, 11, 12

This course will introduce students to the basic skills necessary for game design. They will study various games and analyze their approach in terms of design and development. The student will explore the process and art of creating game elements such as story, levels, sound, and user interfaces. Game analysis will include an orientation to the gaming market and the impact innovative techniques have on it. Finally, the student will merge all these elements into a functional prototype that demonstrates their understanding of the game design process.

SUPPLIES: USB flashdrive, folder or binder, notebook and writing utensil.

COMPUTER PROGRAMMING 03970

CREDIT: .5

GRADE LEVEL: 9, 10, 11, 12

PREREQUISITE: Algebra 1

This course introduces students to basic programming concepts using the Java language. Students will explore the program design process. They will learn about variable declaration and assignments, arithmetic operators, logical operators, conditional statements, loops, arrays, and methods. This course is a prerequisite for students planning on taking the AP Computer Science A course.

SUPPLIES: USB flashdrive, folder or binder, notebook and writing utensil.

AP COMPUTER SCIENCE PRINCIPLES ★ 03927

CREDIT: 1.0

GRADE LEVEL: 9, 10, 11, 12

The AP CSP Curriculum Framework focuses on the creative aspect of computing and computational thinking practices that enable students to experience how computing impacts their everyday lives. This course emphasizes the themes of Creativity, Abstraction, Algorithms, Data, Programming, Internet, and Impact. This course will benefit all students including those that are not pursuing a career in the Computer Science field.

SUPPLIES: USB flashdrive, folder or binder, notebook and writing utensil.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

AP COMPUTER SCIENCE A ★ 03937

CREDIT: 1.0

GRADE LEVEL: 10, 11, 12

PREREQUISITE: Either Computer Programming OR AP Computer Science Principles OR recommendation of teacher

The AP Computer Science A course looks deeply into the Java programming language. Students will be exposed to fundamental computer science topics including problem solving, design strategies and methodologies, organization of data (data structures), approaches to processing data (algorithms), analysis of potential solutions, inheritance and polymorphism, recursion, and the ethical and social implications of computing. The course emphasizes both object-oriented and imperative problem solving and design.

SUPPLIES: Notebook, writing utensil and USB flashdrive.

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

Important considerations prior to taking this course:

- Knowledge of mathematics at the Algebra II level and experience in problem-solving.
- Comfort with functions and the concepts found in the uses of functional notations, such as $f(x) = x + 2$ and $f(x) = g(h(x))$.
- Some previous programming experience is recommended.

COMPUTER SCIENCE

- This course is equivalent to a first year university or college level course and the content is covered quickly.
- An introductory course in C + + , Pascal, Visual Basic, Java or similar course. HTML is not considered a programming language and would not give the students enough of a background to be successful.
- A basic understanding of networks.
- Knowledge of the responsible use of computer systems, including system reliability, privacy, legal issues, intellectual property, and social and ethical ramifications of computer use.

DATA STRUCTURES ★ 03938

SDNB CREDIT: .75

MARQUETTE UNIVERSITY CREDITS: 3.0

1st semester course

GRADE LEVEL: 10, 11, 12

PREREQUISITE: Score of 4 or higher on AP

Computer Science A exam

Data Structures focuses on programming theory and advanced algorithms in the Java programming language and applying it to real world projects. Students learn how to select and design data structures and algorithms that are appropriate for problems that they might encounter, as well as showing the correctness of algorithms and their computational complexities. This course offers students a mixture of theoretical knowledge and practical experience. Data Structures content includes exception handling, linked lists, stacks, queues, trees, heaps, hash tables, and maps.

SUPPLIES: USB flashdrive, Graphing calculator (TI-83, TI-83plus, TI-84, TI-84plus or TI-84plus C), folder or binder, notebook and writing utensil.

Graduation Requirements: 2.0 Credits (*Fine Arts, Vocational, and/or World Languages*)
Electives: 6.5 Credits

COURSE SELECTION FLOW CHART

PROJECT LEAD THE WAY (PLTW): 07001 INTRODUCTION TO ENGINEERING DESIGN ★

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Concurrent enrollment in Algebra I or has taken Algebra I
COURSE FEE:

A course fee up to \$20 may be charged.

Students will dig deep into the engineering design process, applying math, science, and engineering standards to hands-on projects. They work both individually and in teams to design solutions to a variety of problems using 3-D modeling software, and use an engineering notebook to document their work. Activities and projects may include, but are not limited to: solving instant design challenges, modeling using industry level 3D modeling software, and creating an automata design. This course is eligible for a college transcript with a grade, transcribed credits without a grade, scholarships, or advanced standing at local and national post-secondary institutions. Visit <https://www.pltw.org/experience-pltw/student-opportunities> for more information.

SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

★: College Level Courses

*: Offered in Summer too

PROJECT LEAD THE WAY (PLTW): 07002 PRINCIPLES OF ENGINEERING ★

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Algebra I
COURSE FEE:

A course fee up to \$20 may be charged.

A PLTW Principles of Engineering student will explore engineering fields including, but not limited to, mechanical, electrical, civil, and materials engineering. Through activity, project, and problem-based learning, students will develop skills in problem solving, communication, critical thinking, and teamwork. This course will include hands-on problem solving activities such as building complex machines, robotic marble sorter, a ballistic launcher, and fabricating a model truss. This course is eligible for a college transcript with a grade, transcribed credits without a grade, scholarships, or advanced standing at local and national post-secondary institutions. Visit <https://www.pltw.org/experience-pltw/student-opportunities> for more information.

SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

CAREER & SERVICE BASED LEARNING

ENGINEERING & TECHNOLOGY

PROJECT LEAD THE WAY (PLTW): 07003 CIVIL ENGINEERING & ARCHITECTURE ★
(THIS COURSE WILL BE HELD AT NEW BERLIN WEST.)

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Algebra I

A PLTW Civil Engineering and Architecture student will explore building and site design. By working both individually and in teams, students will apply math, science, and engineering tools to residential and commercial design projects. Through activity, project, and problem-based learning, students will develop skills in problem solving, communication, critical thinking, and teamwork. Students will document designs using 3D architectural design software. This course will include hands-on problem solving activities such as architectural style modeling, efficiency home design, surveying, and soil testing. This course is eligible for a college transcript with a grade, transcribed credits without a grade, scholarships, or advanced standing at local and national post-secondary institutions. Visit <https://www.pltw.org/experience-pltw/student-opportunities> for more information.
SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

PROJECT LEAD THE WAY (PLTW): 07004 DIGITAL ELECTRONICS ★
(THIS COURSE WILL BE HELD AT EISENHOWER.)

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Algebra I
COURSE FEE: A course fee up to \$20 may be charged.

A PLTW Digital Electronics student will explore combinational and sequential logic, circuit design tools used in industry, and electronic components including logic gates, integrated circuits, and programmable logic devices. Through activity, project, and problem-based learning, students will develop skills in problem solving, communication, critical thinking, and teamwork. This course will include hands-on problem solving activities such as constructing a game counter, prototyping circuits, and computer simulated circuits. This course is eligible for a college transcript with a grade, transcribed credits without a grade, scholarships, or advanced standing at local and national post-secondary institutions. Visit <https://www.pltw.org/experience-pltw/student-opportunities> for more information.
SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

PROJECT LEAD THE WAY (PLTW): 07005 ENGINEERING DESIGN & DEVELOPMENT

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Completion of two different high school PLTW courses
COURSE FEE: A course fee up to \$50 may be charged.

Engineering Design and Development (EDD) is the capstone course in the PLTW high school engineering program. It is an engineering research course in which students work in teams to design and develop an original solution to a valid open-ended technical problem by applying the engineering design process. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology.

Students will perform research to choose, validate, and justify a technical problem. After carefully defining the problem, teams of students will design, build, and test their solution. Finally, student teams will present and defend their original solution to an outside panel. While progressing through the engineering design process, students will work closely with experts and will continually hone their organizational, communication and interpersonal skills, their creative and problem solving abilities, and their understanding of the design process. This course can be taken more than once.

SUPPLIES: Writing utensils, folder, notebook, flash drive and calculator.

HOW MACHINES WORK 07449

CREDIT: .5
GRADE LEVEL: 9, 10, 11, 12
COURSE FEE: A course fee of up to \$10 may be charged.

Did you ever wonder how machines work? In this course, students will create products using a variety of machines by rotating through the following units: turning, milling, CNC, cutting, automation, mechatronics, and thermoforming. Students will have the opportunity to program an industrial digital computer (a.k.a. PLC) to control a FANUC robot. Students will also learn how modernized manufacturing (including Industrial IoT and Industry 4.0) enables “SMART Factories” that share data between machines to facilitate “shop floor analytics” for efficient troubleshooting and better decision making. Students will have the opportunity to earn an industry credential recognizing their ability to troubleshoot issues that may arise with the operation of both manual and automated machines.

HOW MACHINES WORK II

07409

CREDIT: .5
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *How Machines Work*
COURSE FEE: *A course fee of up to \$20 may be charged.*

The How Machines Work II course will allow students to develop and produce unique, authentic parts/products based on his/her own designs. Students will be expected to apply blueprint reading, 3D modeling, machining, and technical reading and writing skills while earning a MSSC industry credential. This course will use the lean process of manufacturing and project management in relation to a personalized project.

INDEPENDENT STUDY: MANUFACTURING SKILL STANDARDS COUNCIL (MSSC) CERTIFICATION

07740

CREDIT: .5 credit per certification passed. *This course will be graded pass/fail based on successful completion of the certification.*
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: *How Machines Work and successful completion of MSSC Safety Certification*
COURSE FEE: *If students need to retake the certification test, the test fee will be charged.*

This course gives students the opportunity to independently work through the modules of the other Manufacturing Skill Standards Council (MSSC) certifications (quality practices & measurement, manufacturing production and process, maintenance awareness, and green production). Students in this course would be expected to meet with his or her Manufacturing teacher during flex for support and complete the modules online.

CONSTRUCTION I

07431

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITES: None
COURSE FEE: *A course fee up to \$20 may be charged.*

This course is designed for 10th – 12th grade students interested in the techniques and principles of residential and commercial building construction. Topics of study will include: foundations, floor systems, wall systems, roof systems, tools, concrete, wood, plumbing, and electrical. Students will be given a number of in-class projects to reinforce the concepts of the course and to improve problem solving skills.
SUPPLIES: *Writing utensils, folder, notebook, flash drive and calculator.*

CONSTRUCTION II

07432

CREDIT: 1.0, Semester Course
GRADE LEVEL: 11, 12
PREREQUISITE: *Construction I*
COURSE FEE: *A course fee up to \$20 may be charged.*

In this course, students will have the opportunity to further develop skills that were introduced in Construction I, and that are integral to the construction industry. Through hands-on projects, students will develop proficiency in, but not limited to, masonry, framing, finishing, and mechanical systems. This course will also provide students with the opportunity to explore different career paths in construction which could lead to future work experiences.
SUPPLIES: *Writing utensils, folder, notebook, flash drive and calculator.*

CONSTRUCTION III

07448

CREDIT: 2.0 credits; 6:45am - 11am fall semester
GRADE LEVEL: 11, 12
PREREQUISITE: *Construction I and II*
COURSE FEE: *A course fee up to \$20 may be charged.*

Construction III is the capstone course in the Construction Pathway. In this course, students will work with Tim O'Brien homes and trade's people (ex. Framing, roofing, plumbing, electrical, HVAC, and finish carpentry) on a student-built actual residential home. While working on this home, and various projects, students will be applying the skills that are correlated with the apprenticeship skills standards. Students will plan for construction, employ power and hand tools, problem solve, collaborate with companies and each other, and use a variety of materials. **Students will need to provide their own transportation to and from job site.**
SUPPLIES: *Writing utensils, folder, notebook, flash drive and calculator.*

UW MILWAUKEE ARCHITECTURE (ONLINE) ★

07233DE

SDNB CREDIT: .75 (but 1st semester online)
UW MILWAUKEE CREDITS: 3.0
GRADE LEVEL: 11, 12

An introductory course about architecture and architectural making. 2D and 3D form and space tested through the theoretical, pragmatic, and contextual issues that influence architecture. This course will be online. **This is an online course that will be on a UW transcript. The course is typically held 1st semester.**

ENGINEERING & TECHNOLOGY

GRAPHIC PRODUCTION I

07481

CREDIT: .5
GRADE LEVEL: 8, 9, 10, 11, 12
COURSE FEE: A course fee up to \$20 may be charged.

Students will be introduced to the graphic design and printing industries. Students will create projects using the basic printing processes to produce items such as screen printed t-shirts, vinyl stickers, notepads, and more! They will learn to use the Adobe Creative Cloud applications including Photoshop, Illustrator and Indesign. This class is an asset for students interested in printing and publishing, journalism, art, graphic design, and marketing.

SUPPLIES: Writing utensils, folder, and headphones.

GRAPHIC PRODUCTION II

07482

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Graphic Production I
COURSE FEE: A course fee up to \$20 may be charged.

Students will continue to expand their knowledge and skills within the graphic arts and printing industries. They will learn to use the more advanced features and techniques in the Adobe Creative Cloud applications including Photoshop, Illustrator and Indesign. Students will have the opportunity to earn the Adobe Certified Associate certification through Adobe Illustrator. As part of the class, students will also create multi-color screen prints, multi-color vinyl applications, large format printing, and long term design and printed product projects. This class is an asset for students interested in printing and publishing, journalism, art, graphic design, and marketing.

SUPPLIES: Writing utensils, folder, and headphones.

GRAPHIC PRODUCTION III

07483

CREDIT: 1.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: Graphic Production II
COURSE FEE: A course fee up to \$20 may be charged.

In this course, students will further their skills and learn advanced concepts in desktop publishing and other printing processes. Students will use their developed skills on school-related printing/design projects to get hands-on experience of the manufacturing process and how to make it more lean. This course will run like a business with individual projects and customers.

SUPPLIES: Writing utensils and folder.

PROJECT LEAD THE WAY (PLTW) PRINCIPLES OF BIOMEDICAL SCIENCE

07007

CREDIT: Elective Credit of 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: Concurrent enrollment in Biology or has taken Biology

In the introductory course of the PLTW Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems.

LAUNCH INTO AVIATION

07490

CREDIT: 1.0
GRADE LEVEL: 9, 10, 11, 12
PREREQUISITE: None
COURSE FEE: \$30

Launch Into Aviation will provide the foundation for advanced exploration in the areas of flying, aerospace engineering, and unmanned aircraft systems. Students will learn about engineering practices, problem-solving, and the innovations and technological developments that have made today's aviation and aerospace industries possible. Along with studying aviation students will have the opportunity to problem solve with hands-on projects including but not limited to building a wind tunnel, designing rockets, and creating flying machines.

CAREER & SERVICE BASED LEARNING

HEALTH SCIENCES

Graduation Requirements: 2.0 Credits *(Fine Arts, Vocational, and/or World Languages)*

Electives: 6.5 Credits

The Health Sciences Pathway curriculum has been designed to assist students in pursuing both on-site and external learning experiences that will provide a broad academic and technical exposure to the career choices available in the field of Health and Wellness. This is the first ‘Pathway’ curriculum developed in the School District of New Berlin. It refines the recommendations found in the Program of Study guide in support of Health Science and/or Human Services careers to provide specific guidance for students who are interested in pursuing a career in the Health Sciences but are not quite sure which one.

It can be used as a resource to students as they develop their Academic and Career Plan. Health Sciences was chosen, in part, because our student population has a strong interest in related Program of Studys. However, this example can be applied by students interested in other Program of Studys by referencing the School District of New Berlin Program of Study guide.

Students can choose to pursue the Health Sciences Pathway curriculum as designed or choose alternative coursework that better aligns to their skills, interests and post-secondary plans. Students are always encouraged to choose both academically and technically rigorous coursework that they feel will best support their personal goals.

Elective Coursework:

- Nutrition and Wellness
- Psychology and/or AP Psychology
- Heredity (Dual Enrollment with UW-Waukesha)
- Medical Terminology (Dual Enrollment with WCTC)
- Culture of Healthcare
- Digital Literacy in Healthcare

Foundational Coursework in Science:

- Biology 9, Anatomy & Physiology I and II, and/or AP Biology
- Chemistry, Chemistry Honors, and/or AP Chemistry

Health Education (required for all students)

RECOMMENDED INTERNAL COURSEWORK

Certified Nursing Assistant – CNA: This course will provide additional college credit towards a licensed nursing degree and is considered a prerequisite for some four year degree programs in Health Science. It provides a broad exposure to many Health Care careers and includes clinicals which are completed in a Health Care setting. It is offered at Eisenhower High School through WCTC during the school year and during the summer.

RECOMMENDED EXTERNAL ELECTIVE COURSEWORK

Lifespan Psychology: This college level course provides an in depth study of the psychology of working with people at different phases of life to help students identify the types of Health Care professions to which they may be best suited. This external coursework dives even deeper by focusing on the psychology of children and/or the elderly if a student is interested in caring for a specific segment of the population. It is offered through the Early College Credit program at a variety of colleges.

HEALTH SCIENCES

Recommended Career Experiences

- Job Shadowing experiences and field trips are an integral part of the Health Sciences. Shadowing experiences can be pursued with physicians, athletic trainers, nurses, physical therapists, dental hygienists, and other areas of health care.
- Students who are interested in developing specific skills to support continued career exploration and the development of workforce credentials should refer to the additional opportunities highlighted on the Career & Service Based Learning (CSBL) Opportunity Board found on the district website.

Job Shadows may be pursued in addition to your regular course schedule in grades 7-12. Health may be taken as early as 8th grade or online to leave room in your schedule for additional electives. You may qualify for the Phy Ed waiver and/or take Phy Ed online as well.

CULTURE OF HEALTHCARE ★ 07601

SDNB CREDIT: .5 (semester)
WCTC TRANSCRIPTED CREDIT AVAILABLE: 2.0
GRADE LEVEL: 9, 10, 11, 12
 This course is designed as an introduction to health-care customer service for those interested in working in various healthcare settings. Students investigate healthcare systems, safety standards, and the workforce. Students apply professionalism and confidentiality in relation to customer service in healthcare. Oral communication in healthcare scenarios is analyzed. Written communication in health settings is applied to various health careers.

★: College Level Courses

*: Offered in Summer too

MEDICAL TERMINOLOGY ★ 07602

SDNB CREDIT: 1.0 (all year)
WCTC TRANSCRIPTED CREDIT AVAILABLE: 3.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: Completion of Biology and Chemistry
 Focuses on the component parts of medical terms: prefixes, suffixes, and root words. Students practice formation, analysis and reconstruction terms. Emphasis is placed on spelling, definition, and pronunciation. The course also includes an introduction to operative, diagnostic, therapeutic, and symptomatic terminology of all body systems, as well as, systemic, and surgical terminology. This is a transcribed credit course.

E-book titled "Skyepack" at a cost of \$40, which is paid through IC.

DIGITAL LITERACY IN HEALTHCARE ★

07603

SDNB CREDIT: .5
WCTC TRANSCRIPTED CREDIT AVAILABLE: 2.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Medical Terminology*

The focus of this course is the use of technology in healthcare. Learners use common business software applications, including word processing, presentation, spreadsheet, and databases. Communication methods using technology are addressed. Learners gain experience with using the electronic health record (EHR). Healthcare EHR security issues, social media use, and digital healthcare resources are examined.

UW MILWAUKEE INTRODUCTION TO DIAGNOSTIC MEDICINE (ONLINE) ★

07235DE

SDNB CREDIT: .75 (but 1st semester online)
UW MILWAUKEE CREDITS: 3.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Biology or Honors Biology*

This course, also known at UW Milwaukee as BMS 205, will provide a framework for understanding medical diagnostic tests in terms of procedures, risks, interpretation of results and relevant science behind the tests.

CERTIFIED NURSING ASSISTANT (CNA) WCTC ★ *

07604DE

SDNB CREDIT: .75
WCTC TRANSCRIPTED CREDIT AVAILABLE: 2.0
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Biology. Students must be 16 years of age at the beginning of the course. May need to pass a reading competency exam.*

SCHEDULE IMPACT: This course will be provided all hours before lunch/flex as both instruction and clinical hours will be during this time this year. Students are also encouraged to take the online UW Milwaukee Introduction to Diagnostic Medicine if they want more credits during this block of time.

In this 89 hour Nursing Assistant program, students gain proficiency in fundamental nursing skills through demonstrations, classroom discussion, and hands on activities in a specialized nursing lab. Students learn basic nursing skills required for care of individuals in hospitals, longterm care facilities and home health care situations. Once these skills are mastered, students will practice with patients in a nursing home or hospital setting under the supervision of an instructor. This course is taught by WCTC instructors, and meets at New Berlin Eisenhower.

- Upon successful completion of the Nursing Assistant program, graduates will be eligible to take the state exam, which allows the student to be placed on the Nursing Assistant Registry in the state of Wisconsin.
- Completion of the Nursing Assistant Technical Diploma provides practice and insight into other nursing and healthcare professions

MATERIALS/RESOURCES:

- Nursing Assisting- A Foundation in Care-giving by Diana L. Dugan, RN Fifth Edition
- Lab and clinical days – You will be expected to participate with fellow students in skill practice and check off. Cobalt blue scrub top and pants and white shoes are the basic uniform for both skill days and clinical. You must purchase the scrubs at the WCTC bookstore. You must purchase a gait belt for lab days/clinical days.
- A watch with a second hand and a flexible watchband is also required for class and clinical as is white tennis shoes.

NOTE: Students must have their own transportation to skills courses.

For more information about the CNA course and for forms, see <http://www.nbexcellence.org/district/cna.cfm>

Graduation Requirements: 2.0 Credits (*Fine Arts, Vocational, and/or World Languages*)

Electives: 6.5 Credits

COURSE SELECTION FLOW CHART

CONCERT CHOIR

08501

CREDIT: 1.0

GRADE LEVEL: 9, 10, 11, 12

The successful Concert Choir student will demonstrate the ability to satisfactorily perform proper singing techniques (breathing, vowel formation, diction, expressive elements); demonstrate the ability to sing with proper intonation; demonstrate the ability to read extended melodies/rhythmic patterns; demonstrate ability to sing harmonically as it relates to balance/texture commensurate with the age and ability of the student. Students are required to perform in all scheduled concerts and choral festivals.

SUPPLIES: Students must supply black dress shoes; robes and stoles will be provided. West requires a pencil and water bottle.

CONCERT ORCHESTRA

08523

CREDIT: 1.0

GRADE LEVEL: 9, 10, 11

PREREQUISITE: Participation in middle school orchestra or private lessons and audition with instructor

COURSE/RENTAL FEE: A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.

Concert Orchestra is a non auditioned, performance-based class for string players in grades 9,

10 and 11. The Concert Orchestra curriculum will enhance ensemble and individual playing and refine and extend instrumental techniques. Students will develop: advanced instrumental performance skills and techniques, music theory and analysis understanding, and make connections to cultural and historical contexts within music. Concert Orchestra is required of all freshmen string players and is a prerequisite for Chamber Orchestra. Students will be required to participate in performance opportunities such as school concerts, community performances, and solo/ensemble festival.

SUPPLIES: *Essential Technique 2000 (book 3), binder, instrument.*

JAZZ ENSEMBLE

08504

CREDIT: 1.0

GRADE LEVEL: 9, 10, 11, 12

PREREQUISITE: Enrollment in Symphonic Band or consent of instructor

COURSE/RENTAL FEE: A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.

The successful student of Jazz Ensemble will be able to perform music in the style of swing, be-bop, jazz, rock, funk, and latin jazz. They will analyze melodies, rhythms, harmonies, timbre, texture, form, as they relate to the jazz idiom. There is an emphasis on improvisation techniques and styles in relation to

CHAMBER ORCHESTRA

08524

CREDIT:

1.0

GRADE LEVEL:

10, 11, 12

PREREQUISITE:

Audition and approval of instructor

COURSE/RENTAL FEE: *A course fee up to \$125 may be charged for rental of a school instrument for home use, when applicable.*

Chamber Orchestra is an auditioned, performance-based class for string players in grades 10, 11, and 12. The Chamber Orchestra curriculum will enhance ensemble and individual playing, hone and extend musical techniques, focus on original works for both chamber and full orchestra, and prepare students for the option to play music in a post-secondary setting. Students will refine: advanced instrumental performance skills and techniques, music theory and analysis understanding, and make connections to cultural and historical contexts within music. Chamber Orchestra is an auditioned ensemble that requires a year in Concert Orchestra. Students will be required to participate in performance opportunities such as school concerts, community performances, and solo/ensemble festival.

SUPPLIES: *Essential Elements Advanced/Technique (book 4); binder, instrument.*

MUSIC APPRECIATION

08511

CREDIT:

1.0

GRADE LEVEL:

9, 10, 11, 12

Music Appreciation will explore and follow music's place in history and culture and world. Students will be exposed to contemporary and historical art forms and music genres through project based learning and guided discovery. No prior music knowledge is necessary. This course is an introductory level music course. It is not intended to replace or supplement a performance-based course.

SUPPLIES: *Pencils, binder, spiral notebook, Finale Notepad (free download from home), flash drive.*

AP MUSIC THEORY ★

08510

(NEXT OFFERED IN 2024-25.)

CREDIT

1.0

GRADE LEVEL

11, 12

The student's ability to read and write musical notation is fundamental in AP Music Theory. It is strongly encouraged that the student has at least basic performance skills in voice or an instrument. Students should have advanced music experience, a basic understanding of music theory concepts, and be participants in one of the school's performance ensembles.

AP Music Theory is an advanced placement course designed to create a complete understanding of music theory, composition, and ear-training. The course is taught at a college level. Musicianship skills such as dictation and other listening skills, sight-reading, and keyboard harmony are considered an important part of the theory course. The ultimate goal of an AP Music Theory course is to develop a student's ability to recognize, understand, and describe the basic materials and processes of music that are heard or presented in a score. Students considering a career in music are strongly encouraged to take this course.

SUPPLIES: *Pencils, binder, spiral notebook, Finale Notepad for at home use (free download), flash drive.*

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

SPANISH V 06314

SDNB CREDIT: 1.0
UW Oshkosh CAPP credits available at \$100/credit.
GRADE LEVEL: 11, 12
PREREQUISITE: Proficiency in previous level of language determined by teacher

¡Bienvenidos a la clase de español V! Welcome to Spanish V! This year students will study the culture of Argentina and refine their Spanish skills in a full-immersion setting via the three modes of communication – presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading). By the end of Spanish V, students will be able to read authentic texts, comprehend authentic films/video clips, write and speak in a variety of tenses and participate in discussions and debates (in Spanish). Students will exhibit mastery of all forms of the subjunctive. ¡Mira vos!

Students can choose to take Spanish V for high school credit only or as a dual enrollment course, earning high school and college credit through UW Oshkosh. The dual enrollment option involves an additional fee (in 20-21 the cost was \$500 for the UW Oshkosh 5 credit course and 11 retroactive credits).

SUPPLIES: Notebook or paper, 3-ring binder (1.5-2”), 5 tab dividers, pen/pencil, headphones/earbuds, SDNB Chromebook

SPANISH VI 06316

CREDIT: 1.0
GRADE LEVEL: 11, 12
PREREQUISITE: Proficiency in previous level of language determined by teacher

¡Bienvenidos a la clase de español VI! Welcome to Spanish VI! This year students will study the cultures of Guatemala, Cuba, Spain, and the Dominican Republic. Students will refine their Spanish skills in a full-immersion setting via the three modes of communication – presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading). By the end of Spanish VI, students will be able to read authentic texts, comprehend authentic films/video clips, participate in discussions, debates (in Spanish), and write complex essays. ¡Cómo mola!

SUPPLIES: Notebook or paper, 3-ring binder (1.5-2”), 5 tab dividers, pen/pencil, headphones/earbuds, SDNB Chromebook

SPANISH FOR HERITAGE SPEAKERS I 06321

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12
PREREQUISITE: Prior exposure to the Spanish language in the home

SPANISH FOR HERITAGE SPEAKERS II 06322

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12
PREREQUISITE: Spanish for Heritage Speakers I

In this course, students with a Spanish language heritage will be able to practice and improve their Spanish communication skills, with an emphasis on developing a more formal register. This course is recommended for students who speak and hear the language at home but who may not have had the opportunity to practice reading and writing in formal Spanish. This class will be conducted entirely in Spanish.

En esta clase, estudiantes con una herencia de hablar español pueden practicar y mejorar su

WORLD LANGUAGE

World Languages apply to some aspects of all Programs of Study and may be a requirement for college entrance.

lenguaje formal a través de los cuatro modos de comunicación. Se recomienda la clase para los estudiantes que tienen una base de español y quieren aumentar su habilidad de escuchar y hablar el idioma con un nivel de lectura y escritura académica. La clase se dirige totalmente en español.

SUPPLIES: Notebook or paper, 3-ring binder (1.4-2”), 5 tab dividers, pen/pencil, headphones/earbuds, SDNB Chromebook

AP SPANISH LANGUAGE & CULTURE ★ 06317

CREDIT: 1.0
GRADE LEVEL: 11, 12

PREREQUISITE: Proficiency in previous level of language determined by teacher

¡Bienvenidos a la clase de español AP! Welcome to AP Spanish! This year students will study the cultures of Guatemala, Cuba, Spain, and the Dominican Republic. This course is designed to be a natural progression from the lower levels of Spanish providing students the necessary tools and rigor to review and refine their communicative skills in the Spanish language. This will be done via the three modes of communication – presentational (formal writing and speaking), interpersonal (informal writing and speaking), and interpretive (listening, reading). The course is designed to prepare students for the AP Spanish Language and Culture examination and will be taught entirely in Spanish. ¡Cómo mola!

SUPPLIES: Notebook or paper, 3-ring binder (1.5-2”), 5 tab dividers, pen/pencil, headphones/earbuds, SDNB Chromebook

Students enrolled in this course are expected to take the Advanced Placement examination in early May. Not taking the AP Exam will result in forfeiture of the GPA bonus for the class and the exam fee. AP Exam approximate cost: \$97

LATIN I (ONLINE FORMAT) 06610

CREDIT: 1.0
GRADE LEVEL: 7, 8, 9, 10, 11, 12
PREREQUISITE: None

This course is designed to introduce students to the language and culture of the Ancient Romans, who were a major influence on the modern western world. Students will expand their knowledge of English and western civilization through the study of the Latin language. By the end of Latin I, students will be able to communicate in all tenses by writing complex sentences. In addition, they will have an understanding of Roman family customs, religion,

government, architecture, and history.

LATIN II (ONLINE FORMAT) 06611

CREDIT: 1.0
GRADE LEVEL: 8, 9, 10, 11, 12
PREREQUISITE: Latin I

Salvete, discipuli et discipulae! Greetings, students! Welcome to Latin II. This course is designed to build upon the knowledge that students gained in Latin I as they further explore the world of the Ancient Romans. The western world is indebted to the culture and language of the Romans and students in this course will expand their knowledge of English and western civilization through the study of the Latin language. By the end of Latin II, students can expect to communicate in all tenses, voices, and moods of verbs by writing complex sentences and have a greater understanding of Roman family customs, specifically education, coming of age, and marriage.

MANDARIN CHINESE (ONLINE FORMAT)

May be taken online. Interested students should use the following course numbers when completing your course request.

- Mandarin Chinese I 06510
- Mandarin Chinese II 06511
- Mandarin Chinese III 06512
- Mandarin Chinese IV 06513
- Mandarin Chinese V 06514
- Mandarin Chinese VI 06515
- AP Mandarin Chinese 06516

Did you know?

INNOVATE - HONORS (FORMERLY CALLED ADVANCED INNOVATION AND DESIGN (IAID))

07426

SDNB CREDIT: 1.0 (semester only, one period only)
UW Milwaukee credits available only if you attend UW Milwaukee after graduation.

GRADE LEVEL: 10, 11, 12

PREREQUISITE: Students must have earned a B or better in one or more of the following to register (or prior authorization): AP Science course, AP Computer Science, AP Math, AP Social Studies, PLTW Software Engineering, PLTW Principles of Engineering
The following courses are highly recommended as prerequisites or to be taken concurrently:

- *Entrepreneurship, Marketing courses, TechKNOW, AP Research, AP English, AP Art*

This interdisciplinary project-based course allows student teams to dig into real world problems and design a solution/product to address customer needs. Teams will work on challenges related to Innovations in Technology, Business, Retail, Healthcare and/or Engineering. Industry mentors will be assigned to the teams to support them with customer discovery, solution definition, and the preparation of their final pitch/expo presentation. Students will be connected to outside resources and companies as needed to support their project. Students will develop the following critical skills: design systems thinking, project management, creativity, problem solving, interpersonal skills, etc.. This course is designed to provide real world experiences that students can draw from in the college admissions process and apply to their work as they pursue their post-secondary program of study. Students will complete a portfolio that can be submitted to their post-secondary education institution to be considered for 'credit for prior learning'.

Check the Innovate webpage for additional program information and eligibility information. Students who do not meet eligibility requirements may be allowed to register with a teacher/counselor/administrator recommendation.

INNOVATE - HONORS II (FORMERLY CALLED ADVANCED INNOVATION AND DESIGN (IAID))

07427

CREDIT: 1.0

GRADE LEVEL: 11, 12

PREREQUISITE: *Advanced Innovation and Design (iAID) - Honors I*

Student can repeat the Advanced Innovation and Design Honors course a second time for a new challenge.

★: College Level Courses

*: Offered in Summer too

AP CAPSTONE

Students take AP Seminar in the 10th or 11th grade, followed by AP Research. Students who earn scores of 3 or higher in AP Seminar and AP Research and on four additional AP Exams of their choosing will receive the AP Capstone Diploma. This signifies their outstanding achievement and attainment of college-level academic and research skills.

Alternatively, students who earn scores of 3 or higher in AP Seminar and AP Research will receive the AP Seminar and Research Certificate signifying their attainment of college-level academic and research skills.

AP SEMINAR ★

01241

CREDIT: 1.0 of elective

GRADE LEVEL: 10, 11, 12

AP Seminar is the foundational course for the AP Capstone experience. Students develop and strengthen analytic and inquiry skills, exploring two to four relevant issues chosen by the student and/or teacher. Students learn to consider an issue from multiple perspectives, evaluate the strength of an argument, and make logical, fact-based decisions. Students will question, research, explore, pose solutions, develop arguments, collaborate, and communicate using various media.

Themes are chosen that allow for deep exploration based on student interests, local and/or civic issues, global or international topics, and concepts from other AP courses are typically selected. For example, students may explore the question of whether national security is more important than a citizen's right to privacy.

Assessment

During the course, students complete a team project, an individual paper and presentation, and take a written final exam. The AP Seminar Exam score is based on all three components and is reported on the 1-5 AP scoring scale. This AP elective transfers to colleges as elective credit when applicable.

AP RESEARCH ★

CREDIT:

01260
1.0 of English

GRADE LEVEL:

10, 11, 12

Students would take the second course in the AP Capstone experience to design, plan, and conduct a year-long research-based investigation on a topic of individual interest. Through this inquiry and investigation, students demonstrate the ability to apply scholarly understanding to real-world problems and issues. Students further the skills developed in AP Seminar by understanding research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information to build, present, and defend an argument. Students may choose to

- Dig deeper into a topic studied in an AP course
- Work across academic areas with an interdisciplinary topic
- Study a new area of interest, perhaps one for further study at the college level

Assessment

At the end of the research investigation, students submit an academic thesis paper, present their thesis, and orally defend their work. The AP Research Exam score is based on the paper, presentation, and defense, and is reported on the standard 1–5 AP scoring scale.

Students enrolled in AP Seminar and Research are expected to take the Advanced PLacement examination in early May and submit artifacts along the way. Any students who do not partake in this process forfeit the exam fee and AP weight. The approximate cost of the exam is \$142 each.

UW-WAUKESHA EDUCATION CONCEPTS ★

SDNB CREDIT:

1.0 (year-long course)

UW WAUKESHA AT MILWAUKEE CREDITS:

09102DE

3.0

GRADE LEVEL:

11, 12

PREREQUISITE: *AP Psychology or concurrent enrollment of AP Psychology*

Classroom discussion (two periods per week) of educational principles, concepts, and issues related to student-teacher-school-community interactions, including developmental aspects, sociocultural influences, and human relations. Off-campus experiences at a SDNB elementary school involving active participation in the program at an educational institution is also required.

★: College Level Courses

*: Offered in Summer too

APPLIED ANALYTICS: ADVANCED DATA SCIENCE HONORS

07126

SDNB CREDIT:

.5 ((2nd semester course only)

MSOE credits available only if you attend MSOE after graduation.

PREREQUISITE: *Prior or concurrent enrollment in Statistics or AP Statistics*

Get started discovering, analyzing, visualizing, and presenting data in a meaningful way with this capstone course! Students will work with different types of data and various sources of data to build their analytic skills using excel and R to improve business processes and decision-making. This course introduces students to the field of analytics and a brief introduction to Artificial Intelligence, including using analysis to support data driven decision making to improve organizational performance. Through the application of a standard analysis process, students will gain hands-on experience applying exploratory data analysis and statistical techniques to business case studies. Data Analytics is connected to all programs of study as it is an important skill set for our future workforce. For example, extracting patterns, trends, and actionable information from large and small sets of data is an important process in healthcare, manufacturing, IT, politics, etc.

ACT PREP COURSE ★

09402

CREDIT:

.5 (1st semester course only)

GRADE LEVEL:

10, 11

COURSE FEE:

\$15 preACT Test

Through this ACT preparatory experience students will have the opportunity to:

- Challenge themselves academically in math, science, English, and reading (no writing focus in this course)
- Conquer test anxiety
- Preview the ACT standardized test experience
- Improve overall study skills that can be applied to coursework
- Extend their academic vocabulary
- Increase comprehension of difficult passages in the areas of reading and science
- Learn how to write a position/support essay
- Review K-10 mathematical topics currently on the ACT and best strategies to attack math problems.

accomplish more in 4

Accomplish More in 4 is the School District of New Berlin's initiative to provide all students with the opportunity to successfully complete college-level coursework prior to graduation. This is coursework that can count towards both a student's high school diploma, and possibly a college degree, allowing the student to accomplish more in their four years of high school than just their diploma.

How Can Taking College-level Coursework While In High School Help You Accomplish More During Your 4 Years Than Just A Diploma...

KEY CREDIT MILESTONES ALONG A CONTINUUM OF COLLEGE CREDITS

3 COLLEGE CREDITS

=

One college course

15 COLLEGE CREDITS

=

The equivalent of one full semester of college

30 COLLEGE CREDITS

=

The equivalent of one full year of college

60 COLLEGE CREDITS

=

Can potentially translate to an associate degree

Why Would You Want To Complete College-level Coursework In High School...

Research has shown that students who enter college with 15 or more credits are twice as likely to graduate with a four-year degree. This is referred to as, "The Power of 15". Even having just one post-secondary learning experience while in high school can allow students to:

- ✓ Show that you're ready for college level coursework, which can help you decide what type of post-secondary education is right for you.
- ✓ Demonstrate that you've selected high school coursework with a higher degree of rigor, which is desirable on college applications and could help you get admitted to the college of your choice.
- ✓ Earn college credits or test into possible credits and courses, which could save you time and money in attaining a college degree.
- ✓ Support a strong start to your college transcript (improve the likelihood of better grades) by providing content knowledge, regardless of whether or not you end up applying the credits to a college transcript.

What Are Your Options to Earn College Credits While in High School...

Onsite in your building:

- Advanced Placement (AP)
- Dual Enrollment (DE) - UW Waukesha, UW Milwaukee and Marquette
- UW Oshkosh Cooperative Academic Partnership Program (CAPP) Courses
- Transcribed Credit (TC) and Certified Nursing Assistant (CNA) through WCTC
- Project Lead The Way (PLTW) selected course-work

Offsite:

- Early College Credit program
- Waukesha County Technical College Dual
- Enrollment Academy UW College online courses
- College Level Examination Program (CLEP)

Interested In Finding Out More? Here's Next Steps...

- ✓ Begin by visiting the SDNB website at: www.nbexcellence.org/district/college-in-high-school.cfm or just scan the code at right with your smartphone's QR code reader app.
- ✓ Then, set up an appointment with your counselor to map out a plan that supports your goal to accomplish more in four.

COLLEGE LEVEL WORK

The following programs are the most commonly used by students while exploring a post-secondary learning experience. They allow students to assess college and career readiness, gain a post-secondary admission credential, access appropriate rigor, explore to inform a post-secondary investment, and/or gain credits from a post-secondary institution.

	ADVANCED PLACEMENT (AP)	TRANSCRIPTED CREDIT (TC)	ON-SITE CONCURRENT ENROLLMENT
DESCRIPTION	AP courses provide exposure to college level coursework. Success on AP coursework is a good indication of college readiness.	<p>Transcripted credit (TC) is a type of concurrent enrollment; however, is most often used to describe concurrent enrollment within the WI Technical College System (WTCS). Regardless, all concurrent enrollment courses are 'transcripted' in that student receive a formal transcript from the provider.</p> <p>WTC course standards and grading exceptions will be followed in all of our TC courses.</p>	Concurrent enrollment opportunities are structured similar to Youth Options but offered on site in the SDNB.
LOCATION	New Berlin West or New Berlin Eisenhower	TC is provided when courses are taken at a WTCS college and for certain courses offered on site in the SDNB.	New Berlin West or New Berlin Eisenhower
TAUGHT BY	New Berlin teachers (unless taken online)	WTCS professor (Offsite) OR New Berlin High School teachers (Onsite) who have been certified by the WTCS.	College professor or New Berlin High School teachers who have been certified by the college awarding the credits.
REQUIREMENTS	<p>Most AP courses have prerequisites. In the SDNB, students who enroll in the course are expected to prepare for and take the AP exam in May.</p> <p>AP courses are otherwise considered independent of the AP exam. Students are able to take AP exams without taking the course if they feel they can independently prepare for the exam.</p>	Varies by course taken	Varies by course taken
GRADES & CREDIT OPPORTUNITY	<p>A student's grade is based on class performance. However, the ability for credit transfer is based on their score on the AP exam. Typically, scores of 3 or above (1-5 scale) are considered passing; however, some schools require a score of 4 or 5 for a direct credit transfer.</p> <p>AP Credits are considered 'credits in escrow' as they are not guaranteed nor are they 'transcripted' until a student is admitted to a post-secondary institution. Many AP courses will transfer as elective credit. To find schools that offer credit or placement see https://apstudent.collegeboard.org/creditandplacement</p> <p>Students receive AP exam scores in July.</p>	<p>Grades are earned through the college awarding credit.</p> <p>Taking any form of concurrent enrollment begins your official college transcript.</p> <p>In some cases, you apply prior to taking the course. In others, you apply for your credits following successful completion of the course.</p> <p>Credit transfer is at the sole discretion of your selected post-secondary institution. Please refer to Transferology for more information. https://www.transferology.com/state/wisconsin.htm</p>	<p>Grades are earned through the college awarding credit.</p> <p>Taking any form of concurrent enrollment begins your official college transcript.</p> <p>In some cases, you apply prior to taking the course. In others, you apply for your credits following successful completion of the course.</p> <p>Credit transfer is at the sole discretion of your selected post-secondary institution. Please refer to Transferology for more information. https://www.transferology.com/state/wisconsin.htm</p>
WEIGHTED GRADE	Yes. However, if students don't take the AP exam, they don't get the weighted grade	No	No
COST	The AP exams cost about \$97. AP College Board dictates the cost per year. AP Capstone courses do cost more.	None	In some cases, the college awarding credit will require a small processing fee to provide the transcript.

COLLEGE LEVEL WORK

	EARLY COLLEGE CREDIT PROGRAM (WI PRIVATE & PUBLIC COLLEGE SYSTEM)	WCTC DUAL ENROLLMENT ACADEMY (DEA)	ADVANCED STANDING OR CREDIT FOR PRIOR LEARNING
DESCRIPTION	The Early College Credit Program (ECCP) allows students to take college level coursework through a participating private or public post-secondary institution.	DEA allows students with a confirmed interest select career specialties to be considered for inclusion in regional cohort of high school students who will work towards an industry recognized credential and 17-25 WTCS transcribed credits prior to graduation. See Pg 119	High school students are eligible to receive technical or college credit if they successfully complete a course taught by a high school teacher using a high school curriculum wherein the high school and the technical college have aligned curriculum competencies and developed an "Articulation Agreement." Upon enrollment to that specific college the student is awarded credit for the course(s) taken in high school only for that specific college. In addition to articulation resulting from these course to course agreements, there are other learning opportunities such as Youth Apprenticeship and Certified Cooperative Education programs that could result in advanced standing credit.
LOCATION	At participating WI Colleges or online through UW Learning Extensions.	Students attend WCTC from 8 am to 12 pm and return to their home school for the remainder of the day.	New Berlin Eisenhower or New Berlin West
TAUGHT BY	College professor	University staff	New Berlin teachers (unless taken online)
REQUIREMENTS	Admission requirements are set by provider awarding credit. Must fill out an application by February 1 for summer semester, March 1 for first semester, and October 1 for second semester. Course must not be offered in District.	Minimum GPA 2.0. On track to graduate. ACT score of 17 or above in core subjects (or receive a qualifying score on WCTC Compass test). Competitive application process.	Students must pass the course with an A or B for WCTC cases. In other cases, it varies.
GRADES & CREDIT OPPORTUNITY	Grades are earned through the college at a ratio of 4 college credits=1 high school credit. These credits will be added to your transcript AFTER you turn in proof of registration to student services and final grades from the attending institution. You are officially admitted as a student to the post-secondary institution before starting the course. Credit transfer to other colleges is at the sole discretion of your selected post secondary institution. Please refer to Transferology for more information. https://www.wisconsin.edu/transfer/wizards/	Grades are earned through the college awarding credit. Taking any form of concurrent enrollment begins your official college transcript. You are officially admitted as a WCTC student prior to taking the course. Credit transfer is at the sole discretion of your selected post-secondary institution. Please refer to Transferology for more information. https://www.wisconsin.edu/transfer/wizards/ Students must turn in their schedule from the attending institution to Student Services.	Credit is not given until the student attends that college.
WEIGHTED GRADE	No	No	No
COST	Transportation is not provided. School District pays for books and course credits if student passes. Student will need to pay if the student withdraws or earns below a D.	Transportation may be provided. The District is responsible for the remaining costs of program participation. Student will need to pay if the student withdraws or is removed from WCTC Dual Enrollment Academy.	No

COLLEGE LEVEL WORK

	UW OSHKOSH (CAPP) / UW GREEN BAY CIHS	START COLLEGE NOW PROGRAM (WI TECHNICAL COLLEGE SYSTEM)
DESCRIPTION	UW Oshkosh CAPP and UW Green Bay CIHS are initiatives and collaborations with participating high schools to provide academically capable students an opportunity to earn college credit while still in high school. They are concurrent enrollment programs, meaning courses are taught for the most part during the regular school day, by certified high school teachers who hold adjunct lecturer status. You receive both high school and college credit for your work, thereby decreasing your time to earn a college degree.	The Start College Now Program (SCN) allows students to take college level coursework through a Wisconsin technical college while in high school.
LOCATION	New Berlin Eisenhower and New Berlin West	Wisconsin Technical College System School ex. WCTC or MATC
TAUGHT BY	New Berlin teachers	College professor
REQUIREMENTS	See UW Oshkosh (CAPP) and UW Green Bay CIHS websites at: https://uwosh.edu/capp/ and https://www.uwgb.edu/ccih/	Must have completed 10th grade Good academic standing Students should submit applications by March 1 for the fall semester and October 1 for the spring semester.
GRADES & CREDIT OPPORTUNITY	<u>Spanish CAPP:</u> Students who receive a grade of a D or higher in the CAPP course will earn 5 college credits. Students who receive a grade of a B or higher in the course can receive retroactive credits for previous language courses completed in high school, typically equaling an additional 11 credits for a total of 16 credits. To find out where these credits transfer, see: https://uwosh.edu/capp/students/transferring-credits/ CAPP & CIHS grades and credits start your UW transcript.	Grades are earned through the college at a ratio of 4 college credits=1 high school credit. These credits will be added to your transcript AFTER you turn in proof of registration to student services and final grades from the attending institution. You are officially admitted as a student to the post-secondary institution before starting the course. Credit transfer to other colleges is at the sole discretion of your selected post secondary institution. Please refer to Transferology for more information. https://www.wisconsin.edu/transfer/wizards/
WEIGHTED GRADE	No	No
COST	For the school year, it was \$100/credit.	Transportation. School District pays for books and course credits if student passes. Student will need to pay if the student withdraws or earns below a D.

Associate Degree:

Students who are interested in receiving a UW Colleges Associate's Degree using some of these College in High School options should see their counselor and check out the SDNB Associate Degree Website: <https://www.nbexcellence.org/district/UW-Colleges-Associate-Degree.cfm>

Students who are interested in receiving an Associate Degree through the Wisconsin Technical College System should talk to their counselor and the WCTC Dual Enrollment advisor as it requires personalized conversations.

COLLEGE LEVEL END OF THE COURSE EXAMINATIONS

In addition to Advanced Placement (AP) courses available at both Eisenhower and West, there are also courses that the School District of New Berlin offers that are available for different end of the course assessments.

PLTW END OF COURSE ASSESSMENT DESCRIPTION

WHAT IS THE PROJECT LEAD THE WAY: END OF COURSE ASSESSMENT (PLTW: EOCA)?

The PLTW: EoCA is a national, standardized, internet administered assessment that assesses the cumulative engineering course knowledge of each PLTW student. The PLTW: EoCA is generally between 55 and 65 high level multiple choice questions, is composed of two 40 minute sections, and is administered over the course of 2 school days.

WHY IS THIS ASSESSMENT ADMINISTERED?

The PLTW: EoCA is administered nationally to PLTW students to assess how much engineering knowledge has been learned over the course of the school year. Assessment data from the PLTW: EoCA is used: to monitor student progress, to monitor PLTW nationally approved programs, and to monitor PLTW course content. Most importantly for students, the assessment is used to determine if a student is eligible to receive Transcribed Credits through PLTW affiliate universities, such as the Milwaukee School of Engineering (MSOE).

HOW IS THE PLTW: EOCA SCORED?

A student's performance on the assessment is compared to the national, standardized student performance level, and then the student is awarded a score based on their level of achievement. A score of one, two, or three indicates a Basic achievement level. A score of four, five, six, or seven indicates a Proficient achievement level. Lastly, a score of eight or nine indicates an Advanced achievement level. A score of seven, eight, or nine is required to obtain Transcribed Credits through MSOE if all other criteria are met.

WHO WILL TAKE THE PLTW: EOCA?

All students enrolled in the following PLTW courses are required to complete the PLTW: EoCA:

- Introduction to Engineering Design (PLTW: IED)
- Principles of Engineering (PLTW: POE)
- Digital Electronics (PLTW: DE)
- Civil Engineering and Architecture (PLTW: CEA)

WHEN IS IT ADMINISTERED?

The assessment will be administered between the end of May and beginning of June each school year.

WHERE IS IT TAKEN?

The PLTW: EoCA is typically administered over the span of 2 school days during that particular PLTW class period. For example, an Introduction to Engineering Design student will complete the first half of the assessment, in class, on Monday, and then complete the second half of the assessment, in class, on Tuesday.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

DESCRIPTION: The College-Level Examination Program® (CLEP) offers you the opportunity to earn a score for information that you already know. If you earn qualifying scores on any of the 33 college subject examinations it could accelerate your post-secondary education by earning a potential of 3-12 college credits. Students can teach themselves the subject matter or take an exam after an official course in any of the following areas featured at the CLEP site <http://clep.collegeboard.org/>.

COST: One CLEP exam currently costs \$89 (not paid by the School District). The 90 to 120-minute exams are administered at 1,800 test centers, and 2,900 colleges and universities.

CLEP ACCEPTANCE: Each post-secondary institution decides which CLEP exams it will grant credit for and how many credits it will award. So talk to your admissions officer, academic advisor or test center administrator to learn more about your institution's CLEP Policy before you take an exam. See <https://clep.collegeboard.org/> for more information.

CREDENTIALS AND HONORS

Having a comprehensive picture of what you have accomplished or what you plan to accomplish, both in and outside of school, is important to understanding you as a student and person. Credentials can provide documentation of things that you are good at, what is important to you, and what you may be preparing for in the future. They are used to indicate the completion of specific training or education programs, to verify successful completion of tests and exams, and to provide independent endorsement of an individual's possession of the knowledge, skills, and ability necessary to practice a particular occupation competently.

Credentials serve a variety of purposes. Students should make their counselor aware of any credentials they earn, or have an interest in earning, and should be recorded in the student's Academic & Career Plan (ACP).

Credentials to Assist in College Admissions and Scholarship Eligibility

Students who plan to attend college after high school are encouraged to attain credentials that will help them build a competitive college application. The credentials you choose to pursue depend on the type of post-secondary education you want to pursue, along with your unique capabilities and interests. Credentials for college admission or scholarship eligibility may include:

- Grade point
- College entrance exam scores (ACT, SAT, SAT2, PSAT/NMSQT)
- Honors/Awards aligned to stated areas of interest
- Success in college level coursework aligned to stated areas of interest
- AP Scholar Designation
- Honors Diploma
- Technical Diploma**
- PLTW + AP Student Recognition

Credentials Indicating Distinction in Global Awareness

The curriculum in the School District is intended to support all students in developing knowledge, skills and dispositions that will help them understand and contribute to the world they live in. The State of WI Global Education Achievement Certificate recognizes students who have demonstrated a strong interest in global citizenship. This certificate, issued by the Wisconsin Department of Public Instruction, is given to those students who successfully complete a global education curriculum and engage in co-curricular activities and experiences that foster the development of global competencies. More information on this certificate can be found at <http://www.nbboxcellence.org/district/global-citizenship.cfm>.

State of WI Leadership Skills Certificate

Students who value leadership tend to have a natural aptitude to communicate a vision and support and guide a team in support of a stated objective. Securing a leadership position in a student organization does not necessarily mean that a student possesses leadership skills. Many times, students ask for letters of recommendation from employers, staff or advisors to attest to their leadership skills. The School District of New Berlin recognizes a student's mastery and exhibition of leadership skills valued by employers, communities, and organizations. This credential, issued by the Wisconsin Department of Public Instruction, requires completion of 90 leadership and/or service hours.

Service Related Credentials

Students who place value on giving back to their community and others in need often pursue service-related credentials. For example,

- Key Club
- National Honor Society
- Student Council
- Community-based civic organization
- Service projects/roles in a student's church, school, or community

Technical and Employment-Related Credentials

Understanding how to navigate the world of work is one of the opportunities provided by the School District of New Berlin. We want every student to have the opportunity to graduate ready for employment regardless of post-secondary pursuits. This allows students to transition directly into a career, be eligible for work-study as part of their financial aid at a post-secondary institution, qualify for internships, etc. Work experiences also help students invest wisely in their post-secondary education.

In addition to credentials earned throughout a student's Academic and Career Planning process, students have the opportunity to earn other awards and/or honors. One honor, given at senior honors night and graduation is the Technical Honor in Excellence Certificate.

In addition, students who participate in one of the Career Experience Opportunities (see page 132) can also work to attain one or more of the following credentials:

- The Wisconsin Employability Skills Certificate (awarded through the WI Department of Instruction) recognizes a student's mastery of employability skills valued by employers, to help students explore their career interests, and to provide a state credential of student mastery. Requires 90 on-the-job work hours.
- The Wisconsin Cooperative Education Skill Standards Certificate (awarded through the WI Department of Instruction) builds upon the scope of the Employability Skills Certificate to recognize students who have shown mastery of specific skill standards developed in partnership with industry, business, and educators to support a specific career interest and/or occupational area. Requires 480 hours of on-the-job work hours.
- The Wisconsin Youth Apprenticeship Certificate (awarded through the WI Department of Workforce Development) is similar in nature to the Wisconsin Cooperative Education

CREDENTIALS AND HONORS

Skills Standards Certificate. However, students must successfully complete a Youth Apprenticeship program to receive this certificate. The Wisconsin Common College Application does provide recognition for students who have successfully completed a Youth Apprenticeship program. Requires 450 hours of on-the-job work hours.

- Lastly, students can investigate which industry recognized credentials might be valuable for what they may want to do someday. Preparatory courses can be taken through Early College Credit Program or Start Now! Program at WCTC/MATC as well as through other providers to prepare for associated exams. These experiences can also help students get a deeper understanding of what skills may be required to be successful in a student's chosen career cluster to help confirm what they want to do, as well as what they don't want to do someday. For example,

- Certified Nursing Assistant (CNA): Provides exposure to careers and develops advanced skills in Health Care
- CompTIA and/or Cisco Certified Network Associate: Provides exposure to careers and develops advanced skills in Information Technology
- AutoCAD: Provides exposure to careers and develops advanced skills in Engineering Design
- Adobe: Provides exposure to careers and develops advanced skills in Graphic Arts
- For a complete listing of technical credentials that are available to high school students, please refer to <https://dpi.wi.gov/sites/default/files/imce/cte/pdf/approvedcerts.pdf>

Technical Honors Certificates

Technical Honors Certificates recognize students who have demonstrated excellence in their technical coursework aligned to a specific program of study - such as Computer Science, Engineering, Information Technology and Manufacturing - in addition to demonstrating a commitment to their other coursework.

Students selected for Technical Honors Certificates earned a minimum:

- GPA of 3.5 or above in 3.0 credits (or more) of technical coursework aligned to a specific program of study; and
- GPA of 3.0 in all coursework

Recognition for Technical Honors is provided at secondary honors nights and graduation. Students can earn a Technical Honors in Excellence in Engineering, Business Management and Administration, Construction and Architecture, Manufacturing, Computer Science/Information Technology, Health Science, and A/V Technology and Communications.

*Please contact your counselor for information on awards/honors they are aware of that might align to your Academic & Career Plan (ACP). Additional opportunities become available often.

**Support for these credentials are currently developed in the School District of New Berlin. Please see your counselor if you are interested in receiving more information.

WAUKESHA
COUNTY TECHNICAL
COLLEGE

Waukesha County Technical College

WCTC's Dual Enrollment Academy program provides a unique approach for High School Seniors to get a head start on college. The following programs have been developed in cooperation with Industry and the State of WI to allow students to graduate high school with WTCS credits AND a workforce certificate that can be provided to future employers to help secure meaningful employment. All program credits articulate to a Technical Diploma and/or Associate Degree. WCTC Associate Degrees can be transferred to allow students to pursue a bachelor's degree in the future. Students attend classes at WCTC M-F and return to their home school to take any remaining coursework needed for graduation.

More information about WCTC Dual Enrollment Academy opportunities can be found at: www.wctc.edu/dual-enroll. Please talk to your counselor if you are interested in any of these programs for more information about WCTC registration and informational meetings.

AUTOMATION SYSTEM (ROBOTICS)
COURSE # WCTC-ASYS

Automated systems have become the standard in many industries to provide reliable ways to program and control machine movements. There is a growing need for qualified technicians to build, program, integrate, service and maintain automated and robotic systems. In the Automation Systems Technology (AST) option, focus on the integration of mechanical, electrical, hydraulic and robotic methods. Learn about robotics, programmable logic controllers (PLCs), the principles of automation, and how they apply to multiple industries, and develop skills to work with complex computers and machinery in automated production lines.

CREDENTIALS EARNED: Upon successful completion of the program, participants will earn the WCTC Automation-Industrial PLC Certificate. The 22 credits earned through the Dual Enrollment Academy can be used to continue on your educational pathway at WCTC.

BUILDING CONSTRUCTION TRADES
COURSE # WCTC-BCT

Building Construction Trades is one of the most enduring and rewarding careers. Whether you construct wood-framed residences, heavy construction commercial projects, industrial projects, or infrastructure projects, your legacy will stand for generations. In the Building Construction Trades program, skilled journey-level trade workers will instruct construction safety, hand and power tool usage, wood framing, wiring basics, plumbing theory, and the latest software used in building construction. This program can lead students to

a variety of career paths within the construction trades, including apprenticeship options.

CREDENTIALS EARNED: OSHA 10-Hour for Construction Certificate. Students will earn a total of 23 credit through this Dual Enrollment course.

BUILDING CONSTRUCTION TRADES -
ELECTRICAL APPRENTICESHIP EMPHASIS
COURSE # WCTC-BCT-EA

In the Building Construction Trades Electrical Apprenticeship Emphasis program, skilled journey-level trade workers will instruct construction safety, hand and power tool usage, wood framing and wiring basics, with an emphasis on ABC Electrical Apprenticeship coursework. This program can lead students to a variety of career paths within the construction trades, including apprenticeship options.

CREDENTIALS EARNED: OSHA 10-Hour for Construction Certificate, and opportunity for industry recognized Youth Apprenticeship Certificate-Architecture and Construction. Students will earn a total of 21 credits through this Dual Enrollment course.

CRIMINAL JUSTICE STUDIES
COURSE # WCTC-CJS

Explore the framework of the criminal justice system, and prepare for jobs in a variety of professions or easily transfer into bachelor's degree programs at select four-year colleges. Develop critical life skills necessary for any public safety or human service job.

CREDENTIALS EARNED: The 30 credits earned through the Dual Enrollment Academy can be used to continue your criminal justice pathway.

EARLY CHILDHOOD EDUCATION
PRESCHOOL
COURSE # WCTC-ECPS

Explore the foundations of early childhood education and learn skills to support the education, healthy growth and development of preschool-aged children. Credits from this technical diploma transfer into WCTC's nationally-accredited Early Childhood Education associate degree program, so you can easily continue on the pathway to a rewarding career. Courses include five theory and skills courses, plus a capstone practicum experience in an early care and education preschool setting.

CREDENTIALS EARNED: Upon successful completion of the program, graduate candidates have the potential of being awarded the Early Childhood Education Preschool Technical Diploma and the Preschool Credential from "The Registry". The 21 credits earned through the Dual Enrollment Academy can be used to continue your educational pathway.

CAREER & SERVICE
BASED LEARNINGFIREFIGHTER / EMT
COURSE # WCTC-FE

This program combines Emergency Medical Technician (EMT) and Firefighter courses, giving students a well-rounded experience in the field of protective services, allowing them early opportunities to serve in their communities and gain insight on their strengths and interests among both pathways. Emergency Medical Technicians are trained to perform certain medical procedures, transport patients via ambulance and provide pre-hospital care in preparation for getting a patient to the next point of care. Firefighters are tasked with the responsibility of protecting life, property and the environment through fire suppression, hazardous materials mitigation and emergency medical services.

CREDENTIALS EARNED: Upon successful completion of the 20 credit program and testing, participants will earn the WI Firefighter I and II Certification, Emergency Medical Technician Technical Diploma, CPR Certification, and National Registry EMT Certification. Students may continue their educational pathway using credits in the Fire Protection Technician or Fire-medical programs at WCTC.

IT SYSTEM SPECIALIST
COURSE # WCTC-ITSS

The Information Technology industry employs over six million individuals in manufacturing, banking, retail, construction, finance, transportation, healthcare and education. This field is projected to continue to be one of the fastest growing sectors in the world economy and the lack of skilled individuals is increasing annually. Are you interested in better understanding the many aspects of IT, such as cyber security, networking or application development, but not sure what discipline is right for you? Earning this IT Systems Specialist certificate is a great way to better understand the different types of work performed by IT professionals.

CREDENTIALS EARNED: Upon successful completion of the 22 credit program, participants will earn the WCTC IT Systems Specialist Certificate. Credits earned through the Dual Enrollment Academy can also be applied to continuing education in a number of WCTC's IT Technical Diploma or Associate Degree programs. Participants will also be prepared to take the industry recognized CompTIA A+ and ITF+ Certification tests.

PRE-NURSING
COURSE # WCTC-NRS

Nurses are key to the healthcare team, serving as caregivers, educators and patient advocates. Integrate the science and art of nursing to prepare for the national licensing exam to become a registered nurse. Licensed nurses may work in hospitals, clinics, long-term care facilities or on the business side of healthcare.

CREDENTIALS EARNED: Upon successful completion of the pre-Nursing coursework, qualified students may continue on to take the additional 38 credits of core Nursing courses to complete their Nursing degree.

TOOL AND DIE / CNC
COURSE # WCTC-TDCNC

In the Tool and Die/ CNC option, gain hands-on practice and develop skills for the safe, efficient operation of the engine lathe, vertical milling machine and surface grinder. This option stresses the importance of proper machine shop practices including the selection and application of hand tools, the use of precision measuring instruments and layout procedures. Learn to operate computer numerical control (CNC) machines, interpret engineering drawings and use applied mathematics.

CREDENTIALS EARNED: Upon successful completion of the program, participants will earn a CNC Operation Certificate and CNC Setup Technician Technical Diploma. Students may continue their educational pathway by using their DEA credits at WCTC.

WELDING / FABRICATION
COURSE # WCTC-WF

In the Welding/Fabrication option, develop skills in interpreting blueprints; creating the exact shape of a part for cutting, fabrication and welding; and producing quality parts through the use of different techniques and materials. Learn the basic skills necessary to program and operate computer-controlled press brakes and shears, plasma arc cutting machines and micro-processor-based power sources. Emphasis is placed on welding techniques and joining methods.

CREDENTIALS EARNED: Upon successful completion of the program, participants will earn a GMAW/Fabrication Certificate and Welding Technician Technical Diploma. Students may use their DEA credits to continue on their educational pathway at WCTC.

WHAT TO DO NEXT

1. **January 31, 2023 OR February 9, 2023:** Information Night, 5:30-7:30 p.m.
2. **March 1, 2023:** Deadline to submit the Dual Enrollment Academy Application
3. **April 2022:** Decision notification letter sent to high school and students
4. **July 24, 2023 (2-5 p.m.) OR August 2, 2023 (8-11 a.m.):** Dual Enrollment Academy Orientation (attendance mandatory)
5. **August 28, 2023:** First day of class.

Students submitting an application after the deadline will be considered only if spots remain available. Selected students will receive a letter of acceptance in the spring, explaining steps they must take to confirm their spot in the program. Applications are available at https://www.wctc.edu/_site-pdfs/dual-enrollment-academy/dual-enrollment-academy-application.pdf

DUAL ENROLLMENT ACADEMY for high school students

AUTOMATION SYSTEMS TECHNOLOGY 19-credit program

Automated systems have become the standard in many industries to provide reliable ways to program and control machine movements. There is a growing need for qualified technicians to build, program, integrate, service and maintain automated and robotic systems.

In the Automation Systems Technology (AST) option, focus on the integration of mechanical, electrical, hydraulic and robotic methods. Learn about robotics, programmable logic controllers (PLCs), the principles of automation, and how they apply to multiple industries, and develop skills to work with complex computers and machinery in automated production lines.

Automation Systems Technology Courses

Fall Semester	Credits
414-186 Industrial Electricity	2
605-188 PLC 1	2
605-189 PLC 2	2
664-160 Robotics and Servo	-
612-115 Industrial Pneumatic Systems	2

Spring Semester	Credits
605-196 Drives and Intro to Servos	2
605-191 PLC 3	2
605-193 PLC-Siemens Controllers	2
612-110 Industrial Hydraulic Systems	2
664-160 Robotics and Servo	3

DEA Students Earn

• Automation - Industrial PLC Certificate

Continue on your educational pathway using your DEA credits at WCTC.

Equal Opportunity Affirmative Action Employer/Educator

WCTC'S DUAL ENROLLMENT ACADEMY (DEA) is designed to give high school students a jump start in high-demand occupations, awarding participants with a WCTC credential(s) upon successful completion along with earning high school credits. High school students will spend the majority of their school day, both the fall and spring semesters, at WCTC participating in DEA.

Prospective students should have a strong interest in pursuing a career in their chosen program option. Students must be in good academic standing with a minimum 2.0 high school GPA and also meet the WCTC program requirements. Parental and high school approval is required for a student to be accepted into the program.

Next Steps

1. Meet with your High School Counselor/Dual Enrollment Coordinator to see if you qualify for WCTC DEA.
2. Attend a Dual Enrollment Informational Session at WCTC.
3. Complete a WCTC Dual Enrollment Academy Application and submit it to your High School Counselor/Dual Enrollment Representative for approval prior to the posted deadline.

Questions? Contact the Dual Enrollment Academy Coordinator, at 262.691.5557 or DEA@wctc.edu

Your DEA credits count!

Pathway

9 DEA credits go toward:

Building Trades - Carpentry

Carpenters complete jobs large and small – from building highways to installing cabinetry. In this program, become proficient at using power tools, hand tools and other equipment, and work with lumber, fasteners and hardware. Develop skills for framing, roofing and exterior/interior finish work, and study blueprint reading, math and estimating.

8 DEA credits go toward:

Electricity

Learn to apply key electricity skills and knowledge in commercial, residential and industrial settings. Explore the National Electrical Code and emerging trends in the industry. Learn to read construction drawings and use appropriate safety measures when working with electricity.

6 DEA credits go toward:

Refrigeration, Air Conditioning & Heating Service Technician

Heating, ventilation and air conditioning systems are critical in residential, commercial and industrial settings, and this field is one of the fastest-growing skilled trades. In this program, learn to safely install, maintain and service HVAC equipment. Also get an introduction to alternative energy systems such as photovoltaic, wind and hydroelectric.

Plus

Upon signing an apprenticeship contract, a student can request from **ABC Apprenticeship credit for 83 of the required 200 hours of unpaid related instruction through the following courses:**

- **Blueprint Reading for Electricians**
- **OHSA 10**
- **Residential Design & Engineering**
- **Heartsaver/1st Aid/CPR/AED**

Continue on your educational pathway to a bachelor's degree!

EARLY CHILDHOOD EDUCATION PRESCHOOL

21-credit Technical Diploma

Explore the foundations of early childhood education and learn skills to support the education, healthy growth and development of preschool-aged children. Credits from this technical diploma transfer into WCTC's nationally-accredited Early Childhood Education associate degree program, so you can easily continue on the pathway to a rewarding career.

Courses include five theory and skills courses, and two practicum experiences in an early care and education preschool setting. Graduate candidates present a final portfolio to a Registry Commission for evaluation before being awarded the Preschool Credential.

Early Childhood Education Preschool Courses

Fall Semester		Credits
307-167	Health, Safety and Nutrition	3
307-110	Social Studies, Art and Music	3
307-179	Child Development	3
307-174	ECE: Introductory Practicum	3

Spring Semester		Credits
307-188	Guiding Child Behavior	3
307-108	Early Language and Literacy	3
307-175	Preschool Practicum	3

DEA Students Earn

- Early Childhood Education Preschool Technical Diploma
- Preschool Credential from The Registry

Continue on your educational pathway using your DEA credits at WCTC.

Equal Opportunity Affirmative Action Employer/Educator

WCTC'S DUAL ENROLLMENT ACADEMY (DEA) is designed to give high school students a jump start in high-demand occupations, awarding participants with a WCTC credential(s) upon successful completion along with earning high school credits. High school students will spend the majority of their school day, both the fall and spring semesters, at WCTC participating in DEA.

Prospective students should have a strong interest in pursuing a career in their chosen program option. Students must be in good academic standing with a minimum 2.0 high school GPA and also meet the WCTC program requirements. Parental and high school approval is required for a student to be accepted into the program.

Next Steps

1. Meet with your High School Counselor/Dual Enrollment Coordinator to see if you qualify for WCTC DEA.
2. Attend a Dual Enrollment Informational Session at WCTC.
3. Complete a WCTC Dual Enrollment Academy Application and submit it to your High School Counselor/Dual Enrollment Representative for approval prior to the posted deadline.

FIREFIGHTER / EMT

21-credit program

This program combines Emergency Medical Technician (EMT) and Firefighter courses, giving students a well-rounded experience in the field of protective services, allowing them early opportunities to serve in their communities and gain insight on their strengths and interests among both pathways.

Emergency Medical Technicians are trained to perform certain medical procedures, transport patients via ambulance and provide pre-hospital care in preparation for getting a patient to the next point of care.

Firefighters are tasked with the responsibility of protecting life, property and the environment through fire suppression, hazardous materials mitigation and emergency medical services.

Firefighter / EMT Courses

Fall Semester		Credits
503-142	Fire Fighting Principles	4
503-159	Fire Fighting Principles II	2
503-153	Hazardous Materials Operations	1
503-810	Rapid Intervention Training	-
503-191	Principles of Emergency Servs	2
503-105	Emer Service Employment Strategies	2
531-480	BLS Provider (CPR)	-

Spring Semester		Credits
531-301	Emergency Medical Technician	5
531-430	EMT Clinical	-
503-192	Principles Emergency Srvcs, Safety and Survival	3
503-130	Fire Internship	2

Program credits subject to change.

DEA Students Earn

- WI Firefighter I and II Certification*
- Emergency Medical Technician Technical Diploma
- CPR Certification
- National Registry EMT Certification *

Continue on your educational pathway using your DEA credits in the Fire Protection Technician or Fire Medic programs at WCTC.

** Upon successful certification testing*

IT SYSTEMS SPECIALIST

23-credit Certificate

The Information Technology industry employs over six million individuals in manufacturing, banking, retail, construction, finance, transportation, healthcare and education. This field is projected to continue to be one of the fastest growing sectors in the world economy and the lack of skilled individuals is increasing annually. Are you interested in better understanding the many aspects of IT, such as cyber security, networking or application development, but not sure what discipline is right for you? Earning this IT Systems Specialist certificate is a great way to better understand the different types of work performed by IT professionals.

IT Systems Specialist Courses

Fall Semester		<i>Credits</i>
631-183	IT Essentials A+	3
150-121	Enterprise Clients	3
150-117	Intro to Cisco Network	3
152-112	Introduction to Programming C#	3

Spring Semester		<i>Credits</i>
152-101	Python Programming	1
156-108	Intro to Databases and Reporting	1
152-105	Intro to Web Dev	2
151-106	Security 1	3
107-102	IT Support	2
156-109	Intro to SQL	2

DEA Students Earn

- IT Systems Specialist Certificate
- Opportunity for industry recognized CompTIA A+ and ITF+ Certifications

Your DEA credits count!

Pathway

Choose to continue in one of these Information Technology (IT) Associate of Applied Science degree programs!

14 DEA credits go toward:

IT - Computer Support Specialist

Prepare for positions that involve support of end users and computer systems. Gain skills in problem solving, team building, service management and interpersonal communication. Become proficient at installing and updating computer hardware, software and networks as well as troubleshooting computer problems within organizations.

13 DEA credits go toward:

IT - Network Specialist

Train in the installation and troubleshooting of network operating systems, cabling, Cisco routers and switches, network infrastructure, and wireless and other LAN/WAN technologies. Benefit from world-class network labs, case projects and an internship experience.

9 DEA credits go toward:

IT - Data and Analytics Specialist

Learn how to support the operational database needs of small to medium businesses – including configuration and management of database servers, user permissions on the database and troubleshooting performance issues, and become proficient in data analysis, reporting and data model development.

8 DEA credits go toward:

IT - Web and Software Developer

Learn to develop applications using VB.Net, Java, ASP, JSP, SQL and web development languages. Gain skills in deployment, secure coding, database access, system integration and testing that are needed to be productive in large and small organizations.

7 DEA credits go toward:

IT - Cybersecurity Specialist

Discover how to protect data confidentiality, integrity and availability while learning ways to implement security mechanisms to mitigate attacks from various vectors. Emphasis is placed on vigilant security awareness, identifying network threats and deploying appropriate incident responses.

Plus

The Information Technology field has many industry credentials that can be obtained along these pathways.

Continue on your educational pathway to a bachelor's degree!

PRE-NURSING

29 credits toward the 65-credit Associate Degree in Nursing

Nurses are key to the healthcare team, serving as caregivers, educators and patient advocates. Licensed nurses may work in hospitals, clinics, long-term care facilities or on the business side of healthcare.

Upon successful completion of the pre-Nursing coursework and admission to the nursing program, qualified students may petition for a seat. If a seat is awarded, students take the additional 38 credits of core Nursing courses to complete their Nursing degree.

Pre-Nursing Courses

JUNIOR YEAR:

Fall Term 1

801-196 Oral & Interpersonal Comm 3 credits

858-792 PAX Prep

Fall Term 2

801-136 English Comp 3 credits

Spring Term 1

809-198 Intro to Psychology 3 credits

Spring Term 2

809-188 Developmental Psychology 3 credits

SUMMER

543-200 Nursing Assistant 2 credits

SENIOR YEAR:

Fall Term 1

809-196 Intro to Sociology 3 credits

Fall Term 2

806-177 General Anatomy & Physiology 4 credits

Spring Term 1

806-179 Advanced Anatomy & Physiology 4 credits

Spring Term 2

806-197 Microbiology 4 credits

531-480 BLS Provider CPR

WCTC'S DUAL ENROLLMENT ACADEMY (DEA) is designed to give high school students a jump start in high-demand occupations, awarding participants with a WCTC credential(s) upon successful completion along with earning high school credits. High school students will spend the majority of their school day, both the fall and spring semesters, at WCTC participating in DEA.

To be eligible for the Pre-Nursing DEA, students must:

1. Be of Junior status in their first year of the two-year program. Consideration will be made for seniors based on availability.
2. Have completed one year of high school Chemistry with a C or better each semester prior to starting senior year.
3. Complete Health Requirements and Criminal Background checks upon acceptance

Next Steps

1. Meet with your High School Counselor/Dual Enrollment Coordinator to see if you qualify for WCTC DEA.
2. Attend a Dual Enrollment Informational Session at WCTC.
3. Complete the Accuplacer college placement exam for Reading and Writing.
4. Complete a WCTC Dual Enrollment Academy Application and submit it to your High School Counselor/Dual Enrollment Representative for approval prior to the posted deadline.

TOOL AND DIE/CNC

20-credit Technical Diploma

Producing parts within tolerance requires skill, patience and accuracy, which makes tool and die makers among the most highly skilled of all production workers. Their craft is an exacting one, as the parts they make enable machines to produce a variety of products used in a number of different industries.

Gain hands-on practice and develop skills for the safe, efficient operation of the engine lathe, vertical milling machine and surface grinder. This option stresses the importance of proper machine shop practices including the selection and application of hand tools, the use of precision measuring instruments and layout procedures. Learn to operate computer numerical control (CNC) machines, interpret engineering drawings and use applied mathematics.

Tool and Die/CNC Courses

Fall Semester	Credits
420-316 CNC Machining Center Operations	2
420-320 Machine Tool Operation 1	4
420-126 Machine Tool Theory	1
420-130 Industrial Blueprint Reading	-
420-186 CNC Machining Center Programming	2

Spring Semester	Credits
420-317 CNC Turning Center Operation	2
420-321 Machine Tool Operation 2	4
420-127 Machine Tool Theory 2	1
420-387 CNC Turning Center Programming	2
420-130 Industrial Blueprint Reading	2

DEA Students Earn

- CNC Operation Certificate
- CNC Setup Technician Technical Diploma

WELDING / FABRICATION

22-credit Technical Diploma

Metal fabrication involves cutting, altering and shaping steel or other materials through the use of different tools, techniques and processes. Welding is then used to fuse or join the metals parts together. Fabrication and welding projects can involve simple, basic techniques, or they can be highly specialized and complex.

In the Welding / Fabrication program, develop skills in interpreting blueprints; creating the exact shape of a part for cutting, fabrication and welding; and producing quality parts through the use of different techniques and materials. Learn the basic skills necessary to program and operate computer-controlled press brakes and shears, plasma arc cutting machines and micro-processor-based power sources. Emphasis is placed on welding techniques and joining methods.

WCTC'S DUAL ENROLLMENT ACADEMY (DEA) is designed to give high school students a jump start in high-demand occupations, awarding participants with a WCTC credential(s) upon successful completion along with earning high school credits. High school students will spend the majority of their school day, both the fall and spring semesters, at WCTC participating in DEA.

Prospective students should have a strong interest in pursuing a career in their chosen program option. Students must be in good academic standing with a minimum 2.0 high school GPA and also meet the WCTC program requirements. Parental and high school approval is required for a student to be accepted into the program.

Welding / Fabrication Courses

Fall Semester	Credits
442-150 Gas Metal Arc Welding	4
457-110 Blueprint Reading - Fab	2
457-125 Manual Thermal Cutting Process	1
457-160 Metal Fabrication 1	-
422-103 Metals Technology	1

Spring Semester	Credits
457-160 Metal Fabrication 1	5
442-180 Gas Tungsten Arc Welding	4
457-121 Automated Cutting Processes 1	2
804-107 College Math	3

CAREER & SERVICE BASED LEARNING

CAREER & SERVICE BASED LEARNING EXPERIENCES

The SDNB Career & Service Based Learning Program is part of an educational process that affords students the opportunity to be exposed to different careers and work environments through hands-on work experiences with local employers. These experiences include both paid and non-paid placements. Experiences can be directly aligned to a student's anticipated career interests.

This program requires the integrated efforts of students, parents, teachers, counselors, and employers to achieve the following purposes:

- Develop a mentoring relationship between students and professionals who work in their stated area(s) of interest.
- Allow students to find out what they like, and what they don't like, about certain careers to assist in evaluating post-secondary education alternatives.
- Link both academic and/or technical coursework with the world of work.
- Support students as they develop, monitor and refine their Academic and Career Plans.
- Provide opportunities for students to develop skills, habits, and attitudes conducive to job success and personal growth.
- Acquire or refine career related skills in actual work settings which can be incorporated into a student's personal portfolio. Some experiences qualify for State certificates and/or industry recognized credentials.

Parents or guardians will be responsible for providing transportation for their child to do any career or volunteer experience. The District has no obligation to secure an opportunity on behalf of your child as the onus is on the child as part of employability and leadership development. It is also up to the student to maintain employment by observing company rules and other requirements as identified by the employer.

To assist students in finding Career and Service Based learning placements, students should use their Xello accounts to use INSPIRE to search for opportunities as well as use the [School District of New Berlin Opportunity Board](#).

CONCEPTS IN EMPLOYABILITY & HUMAN RESOURCES I *★ 07134

CREDIT: .5
GRADE LEVEL: 10, 11, 12
PREREQUISITE: None

This course provides the opportunity to explore different career paths. Students will be provided the opportunity to develop skills needed to seek, obtain, and maintain employment. Topics will include a personal skill assessment, resume development, a job search, and the interview process. Documents will be prepared that will help a student in their scholarship search as well as their job search. Scholarship materials, which include a resume, will be developed or updated. This course can be taken prior to or concurrently with Internship. Students in this course also have the opportunity, pending their grade, to earn 1 WCTC transcripted credit for 102-101 Business Professionalism.

CONCEPTS IN EMPLOYABILITY & HUMAN RESOURCES II 07139

CREDIT: .5
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Employability I*

As a continuation of Concepts In Employability & Human Resources – I, students will continue to develop an understanding of job responsibility, organization, business ethics, teamwork and fringe benefits. **This course must be taken concurrently with a career experience in Youth Apprenticeship, Internship or SDNB Co-Op and can be repeated for credit multiple times.** This course will be offered online with monthly face-to-face meetings to allow students the opportunity to provide flexibility in continuing their work-based learning experience.

SDNB CO-OP 07210

CREDIT: .5 credits per semester, Pass/Fail
GRADE LEVEL: 10, 11, 12
PREREQUISITE: *Current enrollment or completion of Concepts in Employability & Human Resources I and/or II*

This course is offered to juniors and seniors who want to obtain experience in the world of work. Students

average 5-10 hours of paid employment per week and concentrate on the development and practice of positive work traits. Students are evaluated by their employers on attitude, quality of work, problem-solving skills, ability to get along with others, cooperation, dependability, and appearance.

Required Components to successful completion of an SDNB Co-Op placement:

- Students are responsible for finding employment - please refer to the SDNB Student Job Board for possible placement opportunities
- Successful completion of an average of 5-10 hours per week for the full year – including summer work experience

SDNB MENTORSHIP 07221

CREDIT: .5 credits per semester, Pass/Fail

GRADE LEVEL: 11, 12

Juniors and Seniors may gain experience in a chosen career path by participating in a mentorship placement. Mentorship is an opportunity for students who are highly motivated, self-directed and who have shown exceptional ability and interest in a particular career field, to investigate a career interest through planned on-the-job visitations in their chosen field. Students will be matched with an adult mentor working in the area of the student's career interest. An individual plan, developed by the student, mentor and school mentorship coordinator/School Counselor will structure and guide the experience. This experience will require 40 hours in a workplace setting outside of school per semester in conjunction with a culminating activity to receive credit. Students must have good attendance, a good discipline record, and be able to provide their own transportation.

Required Components to successful completion of an SDNB Mentorship placement:

- Students are responsible for finding employment - please refer to the SDNB Student Job Board for possible placement opportunities
- Successful completion of 40 hours per semester – including summer work experience
- Culminating activity presented to mentor and school mentorship coordinator/School Counselor

YOUTH APPRENTICESHIP 07200

CREDIT: .5 credits per semester, Pass/Fail

GRADE LEVEL: 11, 12

PREREQUISITE: *Varies by placement, Current enrollment or completion of Concepts in Employability/HR*

The Youth Apprenticeship program provides students with occupational and hands-on work experience in an effort to expose/confirm career interests. The program is designed around a course sequence that provides students an opportunity to begin preparing for a career while still in high school. **Students who participate in a Youth Apprenticeship placement are required to take concurrent coursework that connects to the program areas listed below.**

- Agriculture, Food and Natural Resources
- Architecture and Construction
- Arts, A/V Technology and Communications
- Finance
- Health Science
- Hospitality, Lodging and Tourism
- Information Technology
- Manufacturing
- Marketing
- STEM (Science, Technology, Engineering and Math)
- Transportation, Distribution and Logistic

Required Components for successful completion of an SDNB Youth Apprenticeship:

- Students are responsible for finding employment-please refer to the SDNB Opportunity Board for possible placement opportunities.
- Successful completion of required 450 work hours for the full year-including Summer Work experience.
- Successful completion of program-area courses.
- Completion of a DWD Skill Standards checklist in a program area.

Youth Apprenticeships are operated under guidelines established by the State of Wisconsin Department of Workforce Development (DWD). Students will be assessed by their employer in accordance with the DWD competency checklist. Please see the chart on p. 137 to compare different YA placement options.

SDNB INTERNSHIP 07138

CREDIT: .5 credits per semester, Pass/Fail

GRADE LEVEL: 11, 12

PREREQUISITE: *Current enrollment or completion of Concepts in Employability/HR*

The SDNB Internship program provides students with occupational and hands-on work experience to positively impact the communities' future workforce. The program is designed around a course sequence that provides students an opportunity to begin preparing

for a career while still in high school. Students that participate in an SDNB Internship placement are required to take concurrent coursework that connects to the program areas listed below. SDNB Internships are operated under guidelines established by the State of Wisconsin Department of Public Instruction (DPI). Students can choose to complete an SDNB Internship placement in one of the following programs:

- Agriculture, Food and Natural Resources
- Architecture and Construction
- Business, Management, and Administration
- Education and Training
- Health Science
- Human Services
- Marketing

Required Components to successful completion of an SDNB Internship placement:

- Students are responsible for finding employment - please refer to the SDNB Student Job Board for possible placement opportunities
- Successful completion of required 480 work hours (an average of 10 hours per week for the full year – including summer work experience)
- Successful completion of program-area courses
- Completion of DPI Competency Checklist by their employer (scoring a 2 or 3 on every competency)

GPS - MP GPS MANUFACTURING PROGRAM

CREDIT: .5

PREREQUISITE: 11th or 12th grade and must apply to GPS.

NOTE: Full Day, Year Long, Off Campus

This full day experience allows students to earn the rest of their high school credits and work (for pay) in an off-site manufacturing business. Students have the opportunity to earn multiple credentials, including the MSSC certificate and the Youth Apprenticeship certificate. If you are interested, please talk to your counselor. This experience is not NCAA approved. Students must have their own transportation.

STUDENT AIDE SEMESTER 1 09995 STUDENT AIDE SEMESTER 2 09996

CREDIT: .5 credits per semester, Pass/Fail

GRADE LEVEL: 9, 10, 11, 12

PREREQUISITE: Completion of the Student Aide application process and instructor consent. In order to be considered for a student aide position, students must request this course during the original course request window.

The Student Aide program provides students with the opportunity to assist teachers, office or library staff

with various tasks related to classroom activities. This opportunity is only available during school hours, and within the school building. The opportunities for the student will be dependent on the teacher that has agreed to have the Student Aide. Student Aides will apply 21st Century Skills of Communication, Collaboration, Critical Thinking, and Creativity to assist teachers with classroom preparation, classroom organization, laboratory set-up, and potentially assisting in the learning process.

Maximum of 1.0 credit allowed during high school. Only one period of student aid is allowed per semester.

Required Components to successful completion of an SDNB Service Learning placement:

- Students are responsible for finding placement. Please check with Student Service offices for possible placement opportunities.
- Successful completion of 40 hours per semester

SDNB JOB SHADOW

No Course Number (component on ACP)

CREDIT: This course does not receive credit.

GRADE LEVEL: 7, 8, 9, 10, 11, 12

PREREQUISITE: Completion of the Service Learning application process; consent of instructor

Students in grades 7-12 may gain experience in a chosen career path by participating in a job shadow placement. Job shadows are an opportunity for students to investigate a career interest through planned on-the-job visitations. Students will tour job sites to gain a better understanding of the industries and careers that may be of interest to them.

Students who are interested in a job shadow placement have various opportunities to participate: individually during the school day (with proper approval by building student services staff), in the summer, during vacation days, and on building scheduled Job Shadow events. Students must have good attendance, a good discipline record, and be able to provide their own transportation for individually planned job shadow visits.

Required Components to successful completion of an SDNB Job Shadow placement:

- Students are responsible for finding placement - please check with Student Service offices for possible placement opportunities.
- Completion of job shadow placement paperwork and follow-up documentation

SDNB INTERNSHIP

- **TECHKNOW HELPDESK** **07151**
 - **TECHKNOW HELPDESK & CERTIFICATION** **07152**

CREDIT: *Up to 2 credits; Pass/Fail*

GRADE LEVEL: *9, 10, 11, 12*

PREREQUISITE: *Approval of Program Coordinator; Completion of the application process.*

The TechKNOW Program is a student-centered technology support program designed to help students develop the skills necessary to provide high-quality technology support in an enterprise environment. This program is available to students in grades 9-12 with an interest in technology.

Enrollment in the SDNB Internship Program

The TechKNOW program is not a traditional course. Students will be mentored by SDNB Technology Department staff to support Digital Learning throughout the district.

Students will provide support for hardware and applications, assist with finding technology-based solutions and utilize both existing and emerging technologies to solve problems for students and staff. Staff from the SDNB Technology Department will provide the training required to perform these duties.

This program requires that students set aside 1 or 2 blocks in their schedule. Students with an interest should contact their counselor to ensure they have room in their schedule.

Industry Certifications

Students in the TechKNOW program also have the opportunity to work toward industry-standard technology certifications that provide important knowledge and skills relevant to post-secondary education and work opportunities. Specifically,

- Comp TIA A +
- Comp TIA Net +
- Google IT Support Professional
- Microsoft Office Specialist
- Microsoft Tech Associate

Industry Mentorship, Post-secondary Education

Students enrolled in this program may be provided with access to industry mentors from our local business partners. These mentors will serve as a professional resource to students as they pursue industry credentials and develop their knowledge and skills. Students may also be provided with opportunities to visit different companies and post-secondary education institutions throughout the year to inform their Academic and Career Planning.

For more information, please visit.

VISION OF OUR GRADUATE

All students will graduate “College and Career Ready” which means they will:

- Understand how their unique strengths and interests align to a wide variety of future opportunities.
- Prepare and maintain a personal plan for goal attainment that provides flexibility based on individual experiences.
- Develop a general understanding of how the problem-solving process has been applied to innovate, invent, design, and build products and systems in a variety of environments/industries.
- Effectively be able to navigate both the world of higher education and employment to support a transition to adulthood.
- Possess confidence in their level of mastery of the following in relation to their personal and career goals:

PLEASE SEE

[College and Career Readiness Framework](#) and [College and Career Readiness Blueprint](#) for information about how to achieve a College and Career Ready designation at graduation.

KNOWLEDGE:

- Core subject areas
- Global, civic, environmental, financial, health, media literacy
- Career
- Technological literacy

SKILLS:

- Academic
- Career-specific
- Life
- Interpersonal
- Technology

DISPOSITIONS:

- Demonstrate citizenship through good work ethic, being a good person and accepting personal responsibility
- Communicate and interact effectively
- Analyze ideas, data and textual evidence to draw conclusions and solve problems
- Collaborate with others through interdependence, flexibility and compromise
- Demonstrate creativity by generating original ideas

We Support the Vision of our Graduate by:

- Providing developmentally appropriate opportunities to learn and demonstrate required/desired knowledge, skills and dispositions
- Guiding all students through the academic and career planning process
- Supporting students as they strive to master required and desired coursework
- Encouraging active engagement in extra-curricular activities and career/service learning programs
- Collaborating with partners to provide exposure to a wide range of industries and careers
- Aligning curriculum to a variety of post-secondary opportunities.

COLLEGE & CAREER READY FRAMEWORK

The “College and Career Ready Graduate” is able to effectively navigate the worlds of post-secondary education and employment at the time that is right for them. All students should graduate confident that their knowledge, skills, and dispositions are sufficient to pursue the personal, academic, social and career goals that they set for themselves. *We all learn in a variety of ways. Students should be able to demonstrate readiness in a variety of ways.*

College & Career Ready Formula

Students are guided to relevant opportunities through the **Academic and Career Planning** Process to meet as many indicators of future success as is relevant and practical.

Indicators of Post-Secondary Success

These **indicators** demonstrate knowledge, skills and dispositions that increase the likelihood of **completing** a post-secondary credential.

» ACADEMIC INDICATORS

- Standardized testing
- Grade-point average
- Algebra II proficiency
- College-level coursework

» CAREER INDICATORS

- National Career Readiness Certificate
- Industry credentials
- Success in career-related coursework
- Attendance
- Two or more organized co-curricular activities

» LIFE-READY INDICATORS

- Ability to apply ACP process
- Meets SDNB financial literacy benchmark
- Exhibits positive dispositions for success
- Meets SDNB community service benchmark

NONDISCRIMINATION

The School District of New Berlin is committed to equal educational opportunity for all students in the District. It is the policy of New Berlin schools, pursuant to s. 118.13, Wis. Stats., and PI 9 that no person may be denied admission to any District school or be denied participation in, be denied the benefits of or be discriminated against in any curricular, extracurricular, pupil services, recreational or other program or activity because of the person's sex, race, religion, national origin, ancestry, creed, pregnancy, marital or parental status, sexual orientation or physical, mental, emotional or learning disability.

**MATERIALS
FROM
DPI FILE**

Date: March 4, 2024

To: John Schmidt and Leah Reynolds

From: Kathy Fry, School Administration Consultant
School Financial Services, DPI

Subject: Small Territory Detachment; Right to Appeal **File 2024-19**

The petition, **file 2024-19**, to detach property from the West Allis-West Milwaukee School District and attach it to the School District of New Berlin, has been denied. Petitioners whose property detachment requests have been denied have a right to appeal under the provisions of section 117.12(4), Wisconsin statutes.

The law provides that a majority of the electors residing in the territory, or the owners of 50% or more of the territory, may appeal the denial to an appeal panel by filing notice of appeal with the secretary of the School District Boundary Appeal Board **before** the March 15 following the denial. See s.115.01 (13), Wisconsin statutes, for a definition of electors.

The law further provides that the State Superintendent may charge a filing fee for such appeals. The appeal filing fee is \$750.00 – see <https://dpi.wi.gov/sms/school-district-boundary-appeal-board> for the fee schedule.

Enclosed is a form that may be used to file a notice of appeal. The request should be sent to the address noted and must be accompanied by the required filing fee. **The request and required filing fee must be received at the DPI, 125 S. Webster Street in Madison, by 4:30 p.m. on Thursday, March 14.** You may wish to consider Priority Mail or in-person delivery to ensure timely arrival. Materials received after March 14 will be returned as not timely.

If you have any questions, feel free to contact me at (608) 224-5343. Thank you.

Date: March 28, 2024
To: John Schmidt and Leah Reynolds
From: Kathy Fry, Secretary
School District Boundary Appeal Board (SDBAB)
Subject: Request for SDBAB Review – File #2024-19

This memo acknowledges receipt of your request for review by a panel of the School District Boundary Appeal Board (SDBAB) of File 2024-19, a petition to detach property from the West Allis West Milwaukee School District. We have also received your check in the amount of \$750.00.

SDBAB hearings are generally held during May so that final orders may be issued by June 15, as required by state statute. For us to try to accommodate your schedule, please inform us by **Friday, April 12** which of the following dates you would be available: May 7, 8, 9, 13, 14, 15, 22, 23, or 24. **NOTE: In most cases, hearings will be held virtually.**

Hearings are typically held between 8:30 a.m. and 4:00 p.m. Hearings generally take between two and four hours and two or three may be scheduled on the same day. We will do our best to schedule the hearing for a day you are available but cannot guarantee that will occur. **When the hearing schedule is finalized, you will be notified in writing of the date, time and location of your hearing before the SDBAB panel.**

Petitioners have the right to submit materials that will be provided to the SDBAB members and district representatives before the hearing. If you plan to submit such material, please email it to me no later than three days before the hearing. Additional information regarding materials and procedures will be provided when notice of the hearing date is sent.

If you have any questions about the hearing or the procedures, please contact me by phone at (608) 224-5343, or email at kathleen.fry@dpi.wi.gov. Materials may be sent to my attention at DPI, P.O. Box 7841, Madison, WI 53707-7841.

Thank you.

RE: Appointment

Pursuant to Wis. Admin. Code § PI 2.05(4), I appoint Kathleen Fry as the non-voting chair and secretary to assist each of the following Appeal Panels that have been convened to hear appeals filed with the School District Boundary Appeal Board.

- 2024-01: Jefferson – Oconomowoc
- 2024-04: Stoughton – Oregon
- 2024-07: Reedsville – Denmark
- 2024-08: Palmyra-Eagle – Mukwonago
- 2024-10: Reedsville – Wrightstown
- 2024-11: Durand – Eau Claire
- 2024-13: Cambria-Friesland – Markesan
- 2024-16: Fall Creek – Altoona
- 2024-18: Iowa-Grant – Mineral Point
- 2024-19: West Allis-West Milwaukee – New Berlin
- 2024-27: Eau Claire – Fall Creek
- 2024-30: Poynette – Lodi

I further delegate to Kathleen Fry any additional duties under Wis. Admin. Code ch. PI 2 for which I am responsible in connection with the Appeal Panels identified above, including, but not limited to: appointing Board members to sit on each Appeal Panel; setting a time and place for each Appeal Panel to meet; and any notification to school districts and other interested parties regarding each Appeal Panel.

DocuSigned by:

Carey Bradley
