**Wisconsin Department of Public Instruction
Local Educational Agency
2017-2022 Indirect Cost Plan**

A. General Information

Office of Management and Budget (OMB) published Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (referred to as the Uniform Grants Guidance). The US Department of Education released the newly updated Education Department General Administrative Regulations (EDGAR) to incorporate changes from the Uniform Grants Guidance. It provides that federal programs shall bear their fair share of indirect costs except when legislation explicitly restricts reimbursement of such costs. Local educational agencies are required to have an approved indirect cost allocation plan and indirect cost rate in effect in order to recover any indirect costs related to federal grants and contracts.

If a local educational agency does not wish to recover any indirect costs for federal grants and contracts, an indirect cost allocation plan is not necessary.

Uniform Grants Guidance and EDGAR establishes uniform principles for determining and distributing costs of federal grants and contracts. Department of Education publication, "Indirect Cost Determination Guidance for State and Local Government Agencies", is used by state education agencies as the guide for the cost principles and procedures for establishing cost allocation plans and indirect cost rates for grants and contracts issued by the federal government.

B. Definitions

1. Indirect cost rate is simply a device for determining in a reasonable manner the proportion of indirect cost each program should bear. It is the ratio of the total indirect costs to a direct cost base, such as salaries and wages, or total direct costs exclusive of specific extraordinary or unallowable expenses due to legislation or administrative restriction, such as capital outlay. The cost of the office of the superintendent of schools and board of education are unallowable costs as applied to a federal grant but are included as direct costs when computing indirect cost rates. The costs are the actual expenditures of the local educational agency recorded and reported in accordance with the Wisconsin Uniform Financial Accounting Requirements (WUFAR) handbook or the Wisconsin Uniform Financial Accounting Requirements for CESA (WUFAR for CESA) handbook.
2. Indirect costs are those costs that are not readily identified with the activities funded by the federal grant or contract but are nevertheless incurred for the joint benefit of those activities and other activities and programs of the organization. Accounting, auditing, payroll, personnel, budgeting, purchasing, and operation and maintenance of plant are examples of services that typically benefit several activities and programs and for which appropriate costs may be attributed to the federal program by means of an indirect cost allocation plan. In theory, all costs should be charged as direct costs, but where practical limitations and considerations of efficiency preclude such an approach, an indirect cost allocation plan is an acceptable alternative.

Using Uniform Grants Guidance, EDGAR and WUFAR as a guide, the following functions are identified as indirect with certain adjustments noted later.

<u>Fund</u>	<u>Location/ Organization</u>	<u>Object/ Source</u>	<u>*Function</u>	<u>Program/ Project</u>	<u>Fiscal Year</u>	<u>Local</u>
10	XXX	XXX	XXX XXX	XXX	X	XXXXXX

*Functions	251 000	Direction of Business
	252 000	Fiscal
	253 000	Operation
	254 000	Maintenance
	259 000	Other Business Administration

3. Direct costs are those that can be identified specifically with a particular cost objective. Using Uniform Grants Guidance, EDGAR and WUFAR as a guide, the following funds/functions are identified as direct costs with certain adjustments noted later:

<u>Fund</u>		<u>Function</u>
10	General Fund	*
20	Special Projects Fund	All
50	Food Service Fund	All
72	Private Purpose Trust Fund	All
80	Community Service Fund	All
90	Package and Cooperative Program Fund	All

*Functions		
100 000	Instruction	
210 000	Support Services – Pupils	
220 000	Support Services – Instructional Staff	
230 000	Support Services – General Administration	
240 000	Support Services – School Building Administration	
255 000	Support Services – Facilities Acquisition/Remodeling	
256 000	Support Services – Pupil Transportation	
258 000	Support Services – Internal Services	
270 000	Support Services – Insurance and Judgments	
290 000	Support Services – Other Support Services	
430 000	General Tuition Payments	

4. Excluded costs are those by which the nature of the expense, or because the nature of the costs require minimal administrative support, must be excluded from both the direct and indirect classification. Examples of excluded costs include food purchases, property-related expenditures, taxes, long-term interest, pass-through funds, and refunds of prior year revenues.

Using Uniform Grants Guidance, EDGAR and WUFAR as a guide, the following funds, objects, and functions are excluded costs with certain exceptions noted later:

<u>Fund</u>		<u>Object</u>	<u>Function</u>
10	General Fund	*	**
30	Debt Service Fund	All	All
40	Capital Projects Fund	All	All
50	Food Service Fund	410	257000
72	Private Purpose Trust Fd	900	**
73	Employee Benefit Trust Fd	900	**

- * Intergovernmental Payments for Transit of Aid (Object 930's)
- All Capital objects (500 series)
- All Debt Retirement (600 series)
- Inter-Fund transfers (800 series)

- ** 280 000 Debt Service Function
- 490 000 Other Nonprogram Transactions

5. Unallowable costs are those costs that are unacceptable as applied to federal grants and contracts whether applied directly to a grant or indirectly through the indirect cost rate. Unallowable costs include the following:

- a. Bad Debts
- b. Contingencies
- c. Contributions and donations
- d. Entertainment
- e. Fines and penalties

- f. Governor's expenses or office of the chief executive of a political subdivision (superintendent of schools and school board)
 - g. Interest and other financial costs
 - h. Lobbying
 - i. Underrecovery of cost under grant agreements
6. Restricted indirect cost rate is a special rate developed for federal programs that limits full recovery of indirect costs. A restricted rate is developed for federal educational programs that allow supplementing, but in no case supplanting, of state and local funds. This has been interpreted to mean that only selective administration costs, not maintenance and operation of plant costs, are eligible to be included as indirect costs. Maintenance and operation expenditures are included as direct cost when calculating a restricted indirect cost rate.
 7. Unrestricted indirect cost rate allows full recovery of indirect costs. This rate includes selective administration, maintenance of plant, and operation of plant expenditures.

C. Limitations of Recovery of Indirect Cost

1. Some of the major federal educational programs that are administered through the Department of Public Instruction, such as IASA Title I, IASA Title VI, Part B IDEA, and Vocational Education, limit full recovery of indirect cost. All have legislation that allows supplementing but not supplanting of state and local funds. The restricted rate applies to these programs.
2. Recovery of indirect costs is subject to the availability of funds. If a combination of direct and indirect costs exceeds the funds available, the locality will not be able to recover the total cost.
3. Costs must be treated consistently. Normally, administrative/supportive types of costs (indirect) are reimbursed through the development and application of an approved indirect cost rate, either restricted or unrestricted. The Uniform Grants Guidance and EDGAR followed in rate development identify the allowable costs that may be included, require that these costs meet the test of reasonableness and stipulate that they be accorded consistent treatment in this calculation. The principle of consistency basically requires that a type of cost and all other comparable types of cost or service be treated as either indirect and reimbursed through the application of the rate, or charged as a direct cost to benefiting programs. Therefore, if any of the indirect costs that are included in the rate development (see pages 11-12 of the matrix section of the plan) have been approved and allowed as a direct charge against a federal award, these costs and those for comparable-type services cannot be treated as indirect costs and must be included in the direct cost base. If any cost or groups of costs are treated inconsistently, the rate developed cannot be applied nor indirect costs reimbursed unless appropriate adjustment is made to the indirect cost pool and base to achieve consistency. For example, if a federal project provided that the cost of accounting/bookkeeping were to be reimbursed as a direct charge to the award and the indirect cost rate included other LEA accounting/bookkeeping costs in the indirect cost pool, the rate cannot be applied, because costs were not accorded consistent treatment. A certification must be provided that all costs meet the requirements. (See certification on form PI-1161).
4. The indirect cost rate can only be applied against direct cost. Capital objects, pass through funds and other costs that are excluded from the rate computations must be subtracted from the grant base before applying the rate.

D. Time Period

Expenditures from the second preceding fiscal year are to be used for the indirect cost allocation plan. For example, expenditures for fiscal year 2015-16 must be used to compute the indirect cost rate for fiscal year 2017-18.

E. Indirect Cost Rate Formula

Wisconsin Local Education Agencies (LEAs) use the fixed with carry-forward rate for indirect costs.

The formulas for computing indirect cost rates are as follows:

$$\text{Unrestricted Cost Rate} = \frac{\text{Unrestricted Indirect Costs}}{\text{Direct Costs}}$$

$$\text{*Restricted Cost Rate} = \frac{\text{Restricted Indirect Costs}}{\text{Direct Costs} + \text{Unrestricted Indirect Costs} - \text{Restricted Indirect Costs}}$$

* Restricted Cost Rate adjusts maintenance and operation expenditures into the direct cost base.

Excluded costs are removed from the computation totals. They are listed below the rate computation on the computer printout sent to each public school district.

F. Budgeting Indirect Cost Funds in Federal Program Applications

In budgeting indirect costs, use the last approved rate at the time the project is submitted for federal program approval. The rate(s) applied later to the final claim must be the approved rates for the fiscal year in which the expenditure was actually made. A budget correction may be necessary in some cases. Contact the appropriate DPI federal grant program administrator with any questions regarding budgetary items.

Example 1. School District A was awarded a \$100,000 Part B, Individual with Disabilities Education Act (IDEA) flow-through grant for the period of July 1, 2017 to June 30, 2018. The grant amount was based on the number of children counted with exceptional educational needs times a predetermined cost per pupil. The school district has an approved 1.50 percent restricted rate for 2017-18. The following illustrates how to budget indirect cost when the grant is limited to a specific dollar amount:

Grant Award	\$100,000
Capital Outlay	<u>(2,000)</u>
Net	98,000

Sum 100% + 1.50% = 1.015
 98,000 / 1.015 = 96,552

Direct Cost	\$ 96,552
Indirect Cost Rate	<u>.015</u>
Indirect Cost	\$ 1,448

Check:

Capital Outlay	\$ 2,000
Direct Cost	96,552
Indirect Cost	<u>1,448</u>
Total Grant Award	\$100,000

Example 2: School District B was awarded a \$25,000 Part B, IDEA discretionary grant for the period of July 1, 2017 to June 30, 2018. The school district has an approved restricted indirect cost rate of 1.65 percent. The following illustrates how to budget for indirect cost funds when not limited to a specific dollar amount:

Direct Cost	\$ 25,000
Capital Outlay	<u>(1,500)</u>
Net Grant Award	23,500

Net Grant Award	23,500
Indirect Cost Rate	<u>x .0165</u>
Allowable Budgeted Indirect	388

Direct Cost	\$ 25,000
Indirect Cost	<u>+ 388</u>
Total Grant Award	25,388

G. Applying Indirect Cost Rate to Federal Grants

The indirect cost may be applied to the interim as well as the final claim. The approved rate(s) should be multiplied by the amount of direct cost expense. The rate cannot be applied to costs that were excluded in the rate computation.

If the expenditure on the federal grant covers more than one fiscal year (July 1, through June 30), it will be necessary to apply more than one rate.

Example: A school district was awarded a discretionary grant in the amount of \$20,290 for the period of October 1, 2017 to September 30, 2018. The district has an approved 2 percent restricted rate for 2016-17 and an approved 1.75 percent restricted rate for 2017-18. A final claim of expenditures for the project is illustrated as follows:

<u>Type of Expenditure</u>	<u>Approved Budget</u>	<u>Expenditures 10/1/17 to 6/30/18</u>	<u>Expenditures 7/1/18 to 9/30/18</u>	<u>Balance 9/30/18</u>
Direct Cost:				
Instructional Salaries	\$10,000	\$7,000.00	\$2,000.00	\$1,000.00
Fringe Benefits	2,200	1,540.00	440.00	220.00
Staff Level	600	400.00	150.00	50.00
Printing	1,000	0.00	1,000.00	0.00
Intergovernmental				
Payments CESA	5,000	4,000.00	1,000.00	0.00
Instructional Materials	700	600.00	50.00	50.00
Equipment	<u>500</u>	<u>500.00</u>	<u>0.00</u>	<u>0.00</u>
Total Direct Costs	\$20,000	\$14,040.00	\$4,640.00	\$1,320.00
Indirect Cost (\$14,500 X 2%*)	<u>290</u>	<u>190.80</u>	<u>63.70</u>	<u>35.50</u>
Total Allowable Expenditures	\$20,290	\$14,230.80	\$4,703.70	\$1,355.50

* Last rate approved at the time the budget was prepared.

<u>Type of Expenditure</u>	<u>Expenditures 10/1/17 to 6/30/18</u>	<u>Expenditures 7/1/18 to 9/30/18</u>
Indirect Cost Computations:		
Total Direct Expenditures	\$14,040.00	\$4,640.00
Less Excluded Costs in Rate Computation		
Equipment	500.00	0.00
Intergovernmental Payments	<u>4,000.00</u>	<u>1,000.00</u>
Adjusted Base	\$ 9,540.00	\$3,640.00
Approved Restricted Indirect Cost Rate	<u>2.00%</u>	<u>1.75%</u>

Allowable Indirect Costs

\$ 190.80

\$ 63.70

H. Form PI-1161, Indirect Cost Rate Adjustments

1a. Section I, Indirect Cost Rate Adjustments-School Districts

Indirect cost rates were computed based on information taken from the annual report (Form PI-1505). Because of the increased information gathered with the implementation of WUFAR, most expenditures can be classified categorically either as indirect, direct or excluded cost with the exceptions of those listed below. All reported amounts in the categories below have been considered direct in the rate computation but could be considered indirect cost depending on the type of expenditure. It will be necessary for the local school districts to complete section I of form PI-1161 and return it to the Department of Public Instruction if adjustments are desired. All adjustments are optional and should be weighed against the cost/benefit of time spent preparing adjustments.

Known adjustment areas from direct cost to indirect cost are as follows:

General Administration: 10-xxx-xxx-230 000-xxx-x-xxxxxxx

The Uniform Grants Guidance and EDGAR exclude the superintendent and board of education costs from indirect consideration. However, a revised interpretation was received that allows some leniency for small school district administrators who, on a day-to-day basis, perform such functions identified in the plan as indirect, provided the time and effort documented for these activities are sufficient to pass an audit.

Superintendent expenditures categorized in the 230 000 function series of WUFAR are unacceptable as indirect. The Superintendent's office includes any Deputies or similar office (Components), along with the immediate support staff. Generally these Components are organizational units for both direct and indirect functions existing one level below the Superintendents unit. The costs of the Superintendent and supporting Component units are considered functions that any school would have to support, regardless of whether or not the school ran federally funded programs or grants. Superintendents of small school districts who wish to recover indirect cost on the business administration part of their job function will have to categorize part of their salary under WUFAR function 251 000 to be eligible for indirect cost consideration.

Legal cost associated with interpretation of laws and regulations may be adjusted to indirect cost. Legal cost associated with time spent on preparing for court case is not an allowable indirect cost. School census cost is an allowable indirect cost. Audit cost is allowable if no audit cost is directly charged to federal grants.

With the exception of costs associated with the board of education and the office of the superintendent, other district-wide general administration staff cost is allowable if necessary and reasonable for the proper and efficient administration of the federal grant programs.

Insurance and Judgments: 10-xxx-700-270 000-xxx-x-xxxxxxx

District liability insurance, district property insurance, and fidelity bond premiums and worker's compensation may be adjusted as indirect cost. Adjustments may also be made for unemployment compensation for employees or former employees whose costs were associated with the functions identified as indirect in this plan. You may not include judgments against the district as indirect cost.

Major Sub-Awards in excess of \$25,000:

It is the policy of the Federal government that all expenditures for sub-awards over the first \$25,000 be excluded from the calculation of indirect cost rates. For this exclusion, the first \$25,000 of the contract is included; costs in excess of \$25,000 are excluded. To be consistent, if any of these major subcontracts relate to a federal grant, indirect should be charged only on the first \$25,000 of the contract. Further clarification of this policy states that the exclusion covers all of the expenditures for a sub-award, if the award is for more than one year.

Termination Leave Benefits :

Payments to separating employees for unused leave are chargeable to Federal programs only as indirect costs. Payments to separating employees for unused leave are NOT charged as direct costs to any federal awards. Therefore, any payments made to former employees either upon separation or in future years must be considered indirect costs for purposes of calculating the district's indirect cost rate, both Restricted and Unrestricted with one exception. When computing the Restricted Indirect cost rate, unused leave costs to employees who are indirect for the Unrestricted Rate, but direct for the Restricted Rate (i.e. superintendent and their office), are considered direct cost payments for rate calculation purposes only. WUFAR Function 291000 has been established for accounting for Termination Leave Benefits. Amounts charged to this Function will be considered indirect for purposes of the indirect cost rate calculations. Lump-sum cash payments for unused vacation or sick leave upon termination of employment should also be charged to Function 291000.

Post Retirement Health Benefits (PRHBs):

WUFAR guidelines require that Districts who are funding post-employment benefits on a pay-as-you-go basis classify health insurance expenditures for former employees to Function 292000. For example, a District employee who retires and pursuant to the District's compensation policies pays for their health insurance premiums after retirement must classify those costs as indirect for both the Restricted and Unrestricted rate regardless of where the employee's salary is recorded with one exception. For purposes of calculating the Restricted rate, PRHB costs associated with the Superintendent and their Components will be treated as direct. However, districts which are funding other post-employment benefits pursuant to an actuarial determination require no adjustment on form PI-1161. These costs are treated as an employee benefit expense and are allowable as direct costs.

Described above are the known areas in which adjustments could be made to the indirect cost plan. Blank spaces are provided on form PI-1161 to allow some flexibility if we missed some unique cost not covered by the plan

1b. Section I, Indirect Cost Rate Adjustments – CESA

CESA indirect cost rates for 2017-18 are taken from the 2015-16 CESA Annual Report. Each expenditure for the purpose of developing the plan was categorized either as an indirect, direct or excluded cost. You may accept the rate as calculated or make adjustments to your plan as discussed in the next paragraph. In either case, if you wish to be considered for indirect cost reimbursement, you must complete PI-1161 and return it to the Department of Public Instruction.

All information contained within this plan is pertinent to CESA except public school district adjustments (H1a). CESA adjustments that can be made on form PI-1161 from direct cost to indirect cost are as follows:

The Uniform Grants Guidance and EDGAR disallows as indirect the chief executive cost of operating an agency. For the purpose of the Wisconsin LEA indirect cost plan, as it relates to CESA, this is defined as the salary, fringe benefits and travel of the administrator and any board related cost. Although these costs are indirect costs by definition, the federal government treats the executive cost of operating an agency as unallowable costs, and therefore, it must be treated as a direct cost item in the indirect cost plan. An exception may be granted for CESA administrators who can document time and effort spent on federal program activities.

Adjust salary and employee benefits of support positions listed in fund 25 to indirect costs. List in the comments section the position type and full-time equivalency of the positions adjusted to indirect cost. You may also adjust any travel cost of support positions categorized as indirect in fund 25.

Membership dues under Fund 25, other objects (900), required of CESA in order to do business effectively, are allowable indirect cost. Funds 21 through 24 and 29 through 99 may be adjusted from direct cost to excluded cost for any intergovernmental payments for transit of aids or capital objects.

2. Section II – Certification by Agency Official

The federal government requires this certification before rates can be approved for any public school district, CESA or other local educational agency.

I. Indirect Cost Rate Approval Notification

After receipt of Form PI-1161 or a successfully completed indirect cost rate proposal, LEAs will receive an indirect cost rate approval letter from DPI. This letter will confirm receipt of Form PI-1161 or indirect cost proposal and establish appropriate rates for the current fiscal year.

J. Retention of Records and Documentation for Audit

The provisions of 34 CFR part 75, Subpart D, require that financial records, supporting documents, statistical data, and other pertinent records be kept for a period of three years beginning with the last day of the fiscal year covered by the plan.

K. Deadline

The due date for submission of indirect cost rate adjustments (Form PI-1161) and indirect cost proposals for fiscal year 2017-18 is May 31, 2017.

L. DPI Contact Person

If there are questions on indirect cost, please contact Gene Fornecker, Department of Public Instruction, P.O. Box 7841, Madison, WI 53707-7841; telephone (608) 267-7882.

M. Public Libraries and Other Local Educational Agencies

It will be necessary to submit an indirect cost allocation plan in the general format such as that required for school districts and CESAs. Expenditure lines should be categorized as indirect restricted, indirect unrestricted, direct cost, excluded cost and total cost. Follow the information described in preceding paragraphs to classify amounts. Include sufficient information to identify types of expenditures in order that approval of a rate is possible. A matrix of accounts by classification (direct, indirect-restricted, indirect-unrestricted) for public school district LEAs, CESAs and 2r Charter Schools are included in the matrixes at the end of this document.

A certification (See Section II, PI-1161) and a copy of an independent audit report verifying totals in the proposal are also needed before a rate can be approved.
